WE MAKE THEM.

RUST-PROOF Umbrellas cannot rust off at the top and break through the material, for the ribs are finished with brass. It is impossible to turn them wrong-side-out if they have the Wind-Proof

THE COVERING of these Umbrellas is made of a wood-fibre and worsted, the strongest material known for wear and rough usage and one that we guarantee not to split. Get our make and you get the best.

BINGHAM SPRINGS, OREG Tuberculosis is curable. It requires proper dist, a pure atmosphere and rest of mind and body. Climate alone has little influence. It takes mentits of ordinary treatment, however, to start the patient on the road to recovery. Fatiants at the Bine Mountain Sanatorium have the additional advantage of the use of our INHIBITORY EXELUATION. This secum is harmless and non-intiming. It promptly arrests the disease, slope fever, cough and expectoration, and the patient recovers in constant the time required in other institutions. For information address. DR. J. E.
