Football Casualty List.

CHICAGO, Nov. 25.—The Record-Herald today says: Thirteeen deaths have resulted from football this season. The casualty list is the same as last year, but the number of serious injuries during the season just closed will exceed that of any year since the introduction of the modern college sport. The players injured number 196.

Army and Navy Elevens Arrive.

PHILADELPHIA, Nov. 26.-The Army and Navy football teams, accompanied by substitutes, trainers and coaches, arrived here today. The two teams will meet on Franklin field temorrow afternoon in their annual football conjest. The West Point team is a slight favorite.

Williamette to Play Soldiers. WILLAMETTE UNIVERSITY, Salem. Or., Nov. 35 - (Special.) - Williamette

play the Fort Stevens soldiers' team tomorrow on Willamette Field. None of the
Willamette men were injured in the
Thanksgiving game with Albany. The
game with the Fort Stevens men was
scheduled for next Wednesday, and the
date was changed at their request.

Willamette is very hopeful of securing
the University of California for a game
early next week, though the date has not
been definitely fixed as yet.

There has been great rejoicing among
the 'varsity supporters because of the victory over Albany College. The score was
the same by which Multnomah defeated
them, and the Willamette men feel that
they have proved themselves to be in the
first rank of the college teams of the
state.

rate.
Coach McGee believes his team can defeat either Eugene or Corvallis.

Sports at Vancouver Barracks. VANCOUVER BARRACKS, Wash.
Nov. 25.—Mounted wrestling between
artillerymen will be the feature of the
field day at the Barracks today. Other
events include 120-yard hurdles, equipment race, 440-yard run and a wallscaling centest. The gun will crack for the first contest at 9:30 A. M. and it will be completed at noon.

Urges Law Prohibiting Football. CHICAGO, Nov. 25.—State legislation forbidding the playing of football in Illinois, Indiana, Michigan and Wisconsin is urged by James F. Rowley, of Chicago, whose son died of injuries re-ceived in a game on November 5.

Yanger Defeats Sayers.

MILWAUKEE, Nov. 25.—Benny Yan-ger won from Maurice Sayers, of Mil-

waukee, in a six-round bout before the Milwaukee Boxing Club tonight. Yan-ger won the fight by a good margin, and at no time was he in danger. Low Prices at Horse Sale. NEW YORK, Nov. 25.—The day's prices realized at the Old Glory horse sale today were low. All told, 107 head were disposed of, bringing a total of \$30.65, or an average of over \$26. During the last five days 546 have been sold at an average of over \$57.

PARK NEEDS ROADS

Crater Lake Should Be Made More Accessible.

REPORT OF SUPERINTENDENT

He Recommends \$8000 Be Appropriated for Improvements During the Fiscal Year of 1906-Review of Conditions at Resort.

OREGONIAN NEWS BUREAU, Washington, Nov. 25.-The Secretary of the Inerior has made public the annual report of W. F. Arent, Superintendent of Crater Lake National Park, reviewing conditions in the Park at the present time, and pointing out improvements that are most imperative. To carry out the recommendations of Superintendent Arent would require the appropriation of nearly \$8,000. The amount is modest enough, and 00. The amount is modest enough, and may be made available by Congress at the coming seasion. At least the more important items are likely to be provided. The following are the estimates sub-

horse
Improvement of trail inside of crater.
Don railing on Victor rock.
Begister and supplies and house for same
Lumber and transportation for same.
Spikes, boits and other hardware for
bridges. hase of tools for 1906...

\$7918 The item of \$1500 is the estimated cost of making a change in the road from about 3½ miles west of the summit of about 3½ miles west of the summit of the mountain in the park to the Anna Creek bridge. The building of this new plece of road, which would shorten the distance about one-half mile, would place the road upon good ground with easy grades, and would eliminate from the traveled road the very high hill at the summit of the mountain, which is on either side one of the steepest and hardest hills on any road in Southern Oregon. "It would also bring the travel to the new and casy road to the lake, thus obvisting the necessity of climbing the very steep, rocky, and rough mountain on the

steep, rocky, and rough mountain on the old road.

"This proposed piece of new road is an improvement that is much needed, and would be of great convenience and benefit to the people coming into the park and visiting the lake, and in my opinion would cost, to make a good and creditable road, the amount placed in the stimate, \$1500.

"It should be born in mind that access to the park and to the lake proper is had from two directions, viz, from the southern or Klamath side and from the western or Rogue River side, over which latter road all the tourists and visitors from all the western and northern parts of the State would pass, and in order for the travel approaching from the western or Rogue River side or direction to get the benefit of the new road now in pro-cess of construction from Anna Creek bridge to the rim of the erster it would be necessary to extend the amount men-tioned, otherwise, the people from the western side would receive no benefit, as without it they would be compelled to cross over the high, steep mountain to the new road, or still travel the old and

almost impassable road up the mountain to the lake as heretofore. Under favorable circumstances we may be able to reach the rim of the crater be able to reach the rim of the crater with the new road now in course of construction, but this would by no means complete the road. For the benefit of the work, we have only partially completed the road in many places, doing only what work was necessary, so as to pass over with our teams to the work farther on, a considerable amount of work being necessary along much of the construction of the constru DENVER, Nov. 25.—Clarence Forbes, of Chicago, and Martin Devaney, of Denver, boxed ten hard rounds to a draw tonight before a local club.

Total rounds in widening grading and smoothing, etc., to put it in first-class condition, Eight hundred dollars would be necessary for this work during the fiscal year of

"On the road between Whitehorse and the crater is a piece of road extending a distance of about \$0\$ rods, at the base of the summit ridge, that passes over ground that is wet and in places boggy, made so by springs rising at the base of this mountain and along the road, and which is much in need of improving by cutting a deep ditch above and in several places across the road and by making small bridges or culverts over such drains. This is a very bad plece of road, and should be repaired. It would cost \$250 to do the necessary amount of work "On the road between Whitehorse and \$250 to do the necessary amount of work

"The banks inside the crater are very precipitous, and, there being but one place from which the water is accessible, and the trail leading from the summit to the water's edge being very steep and crooked and in many places dangerous (so much so that it is only the stronger individuals who are able to make the descent and as-cent), and, as a trip down into the crater to the water is one of the chief attractions it is urgently necessary that better facilities for making this trip be provided.

The stretching of a small cable along the The stretching of a small cause along the side of the trail, in connection with widen-ing out, straightening, cutting steps, and the general improvements suggested, would be of very great assistance in mak-ing the trip down and up the bluff, and very materially lessen the danger. There-fore, \$500 is placed in the estimate as the amount which will be necessary for mak-

amount which will be necessary for making this much-needed improvement.

"Eight or ten rods below the rim of the crater is a promontory of rock called Victor Rock, where nearly every visitor goes for a good view of the lake and the sur-rounding country, at the summit of this rounding country, at the summit of this rock, where many people congregate, it is rough and uneven, and in some places alopes toward the lake; below, it is vertical; in fact, hangs over for almost 1600 feet above the water. It being one of the most prominent points on the lake rim, and there being danger of accident and even loss of life, owing to the character of this rock. I would earnestly recommend that \$150 be expended in placing a strong iron railing along the outer edge of this rock. The improvement would be a great protection at this, the most prominent and perhaps the most dangerous point on the rim of the crater.

"Owing to the fact that during the Sum-

"Owing to the fact that during the Summer months the entire time of the super-intendent is required in superintending the improvements and other affairs of the park, as there is danger at any time of destructive fires breaking out—and these fires do start every Summer—and as there hree do start every summer—and as there is more or less of trespassing in stock grazing upon the park lands, and as it is very difficult almost impossible, to restrain some people from cutting green timber in the park, it is deemed absolutely necessary that there should be at least two patrolmen in the park from the listh of June to the listh of October, 1905, to attend to those matters above vanding. tend to those matters above specified. Sixty dollars per mouth each would be reasonable compensation for such serv-ices. I have, therefore, placed in the list of estimates, as a necessary exp an item of \$660 for this purpose. "Having personally superintend and every item of work and impe

conducted all of the affairs pertaining in any way to the parks, and seeing plainly the utter impossibility of making the necessary improvements with the small appropriations that have been made for this and the previous years, and being well acquainted with all of the conditions existing in every locality of the park, and believing that each and every item contained in the estimate for necessary improvements for the fiscal year of 1996 are necessary to only a moderate development of the park, and if made would add very thaterially, not only to the attractiveness and convenience of the reserve as a resort and pleasure ground, but would be of inestimable benefit in managing, improving and protecting the park, I therefore earnestly recommend that the sum of \$7915 be appropriated for the management, improvement and protection of the Crater Lake National Park for the contained that the sum of \$1915 be appropriated for the management, improvement and protection of the Crater Lake National Park for the contained the contained that the sum of \$1915 be appropriated for the management, improvement and protection of the Crater Lake National Park for the contained the co provement and protection of the Crater Lake National Park during the fiscal year

DYING MAN SHIELDS MURDERER

Other Gambler, However, is Unmoved and Refuses to Shake Hands.

NEW YORK, Nev. E.—Guy Roche, the gambler who was shot by Stewart A. Feiton, another gambler, in a crowd on Broadway yesterday, is still alive, but there is no chance for his recovery. Last night Roche declined to name his assailant, saying he "would settle matters" if he recovered. Today, however, when the physicians made him realize the seriousness of his condition he consented to physicians made him realize the serious-ness of his condition, he consented to have Pelton brought before him and said he would identify him as the man who fired the shot. When the man was brought to the wounded man's bedside Roche said: "Yes, Frank shot me, but he was justi-fied. I would have done the same to him." Then addressing Feiton, who had appar-ently not been moved in the least by this declaration, the dying man said: "Good-bye, Frank, old boy. I don't

"Good-bye, Frank, old boy. I don't

"Good-bye, Prank, old boy. I don't blame you."
Roche told the detectives that he and Felton had quarreled, but he could not recall the cause of the trouble.
At the close of the interview the wounded gambier turned to Felton and said: "Won't you shake hands, Frank?"
Felton did not reply, and did not appear to notice Roche's request.
"Oh, don't act like that Frank. We're old pais, shake hands with me."

old pals, shake hands with me."

Felton did not turn his head and the detectives then took him away.

After the officers had entered a cab

After the officers had entered a cab
that their prisoner they tried to put
him through a third-degree inquisition Suddenly in the midst of it Feltion broke his silence.
"Say," he cried, "you have got me
wrong. I never shot that man. I never
carried a gun in my life."

The theory of the police is that Felton carried a revolver in the pocket of
a light overcoat, which they allege he
wore at the time of the shooting, and
that the coat with the revolver utill in
the pocket was carried away by a conthe pocket was carried away by a con-federate after the shooting had occur-

red.
Felton was later arraigned in Police Court and held without ball for exam-ination tomorrow. Should Roche die before Sunday the prisoner will be taken immediately before a Magistrate and remanded to the Coroner.

The police believe that the trouble between Roche and Felton which cul-minuated in the shooting was over a woman who had transferred her affec-

tions from Roche to Felton.
To Coroner Scholer the wounded man repeated his statement that Felton was his assailant, but insisted that the shots were fired in self-defense and that the act was justifiable. Roche told the Coroner he had been drinking heavily yesterday, and that while going along Broadway he met Feiton in front of the Marlborough Hotel. After a few words a quarrel arose. Feiton, he said, tried to quiet him, but his condition was such that he only became the more angered. He said he told Felton that he was going to shoot him and walked away to get a gun. He returned in a few minutes, and as he approsched Felton he put his hand to his hip pocket to draw the wespon he says he had secreted. At this movement Roche told the Coroner, Felton drew his revolver and fired two shots at

Roche declared that he has no relatives. At the moment he was saying this, however, a well-dressed young woman, who had previously called at the hospital and asked to see Roche, claiming to be his sister, was waiting for an opportunity to see him. She

ten years ago from Kentucky. The arrest of Feiton, charged with the shooting, was one of the quickest cases of the kind managed by the police in some time. One of the pursuers was a stenographer, J. S. King. He went to the starapher, J. Aling. He went to the sta-tion and, at the request of the police, took on the spot the testimony of all the witnesses. King declared that he saw Feiton fire at Roche, and George P. Auld, a Paymaster in the Army, confirmed his words, saying he stood close beside Feiton

at the time.

Half a dozen men were also examined, and Feiton, who gave his birthplace as Ohio, was searched. In one pocket was a roll of \$200 in bills of large denomination. The prisoner showed absolutely no

by which patrons could enter, after which it would be let down. In case of raid they could escape in the same manner. Twice within the last three months he has been a prisoner, each time for as-saulting a woman, once with a cane.

TIMBER-SEASONING PROCESS. Bureau of Forestry Will Soak Poles in Water.

WASHINGTON, Nov. 23 .- The Bureau of Forestry, at its new experiment sta tions in Wisconsin and Michigan, will make seasoning tests of cedar and tamarack telephone and telegraph poles which have been submerged in water for varying lengths of time. This is an entirely new line of experiment. That immersion in water seems to affect the rate of seasoning has often been noticed. Rafting is said by many lumbermen to
improve timber, and logs which have
lain for a long time in swamps are in
some places eagerly sought for their
superiority for certain uses. But just
why this should be true, and what practical use can be made of the fact in seasoning generally, are matters which have
never been thoroughly ascertained.

It is known that the sap of green wood
contains certain soluble substances—altions in Wisconsin and Michigan, will contains certain soluble substances—al-bumen, starch, sugars, tannin, etc.— which undoubtedly are bleached out of timber immersed in water to a greater or

less extent. In ordinary seasoning these substances are left behind as the water evaporates and are deposited on the cell wails. As seasoning begins on the out-side these deposits must act as clogs which virtually bottle up to a certain de-gree the water in the interior. It is pos-sible also that chemical or physical changes in the wood cells are produced

Timber seasoning is at best tedious and slow work. It can be done fairly well in 10 or 12 months, but thorough seasoning requires from 18 to 24 months, the time

laid only one layer deep. At the expiration of every 20 days each pole will be weighed, and also measured to ascertain any shrinkage of its circumference, Un-soaked poles have furnished a circum-ference shrinkage of one-sixteenth to one-eighth inch in 20 days, and of one-fourth high in all research

SPECIAL TODAY \$1.35

fourth inch in six months.

An important matter in seasoning is the loss in weight. Past experiments with white cedar poles have shown a loss in weight of about one-third after 60 days of drying. In the case of chestnut poles the same length of time showed a 10 per cent loss. These poles are long and very cent loss. These poles are long and very heavy, and such a large weight reduction means a decided saving in freight charges, and increased ease in handling. But this advantage, though important, is small in comparison with the gain in lengthened service. Further, with greater resistance to decay it will be possible to lower the present butt diameter requirement, which is now based on the certainty that rot will soon weaken the power of the pole to withstand strain at the surface of the ground. Altogether, if the soaking process infilial what it seems to promise, it will have a notable bearing on one of the large branches of, timber consumption, as a moment's thought of the number of

moment's thought of the number poles in use in the entire country will ROAD 5000 YEARS OLD. Scenes Along One of the Most Ancient Highways in the World.

Scribner's Magazine.

The road from Homs to Hama runs almost due north, a straight white line cutmost due north, a straight white line cutting across the green fields. It is one of the oldest routes in the world. Caravans have been pensing alon it for at least five thousand years, just as we saw themong strings of slow moving camels with their bright colored bags of wheat.

One could almost imagine that Pharoah was again calling down the corn of Hamath to fill his granaries against the seven years of famine. But even here the old things are passing. Just beyond the long line of camels was a longer line of disappears of the corn of the

and Felton, who gave his birthplace as Ohlo, was searched. In one pocket was a roll of \$290 in bills of large denomination. The prisoner showed absolutely no concern over his arrest.

After the hearing had been completed, Police Captain Cottreil declared Felton to be one of the worst men he ever had to deal with in the precinct and that Reche was equally bad.

"As a gambler," said the Captain, "Felton has given me more trouble than any other man in New York. For a long time I have had men stationed in front of his place in Thirty-sixth street, and also at the rear entrance, and have tried my best to drive him out of the city."

Other policemen declared Felton was driven out of Chicago several years ago and was known all through the West, At one time he ran a gambling house, it was charged just back of the station house. This place had a movable bridge.

One could almost imagine that Pharoah was again calling down the corn of His way and so wood. If the different kinds of wood. If the different kinds of wood. If the Buresu of Foresting was again calling down the corn of His warying with the different kinds of wood. If the Buresu of Foresting was a longer line of fellah women, their dry blue robes killed above their dry being the more. This would prove an exceedingly valuable economy. If, in addition, the durability of the poles can be increased in this way, the saving both to users of his place in Thirty-sixth street, and also at the rear entrance, and have tried my best to drive him out of the city."

Other poles from it kinds of wood. If the Buresu of Forest preservations from these new experiments, the time required for seasoning poles will be expectations from these new experiments, the time required for seasoning poles will be roomable much to fill his granaries against the seven years of familine. But even here the old things are passing. Just beyond the four things are poles will be made to fill the fearer periods of fellah women, their dry blue robes killing the wood of the new French railway. The carria

wheat fields are different from ours. Only wheat heads are discretic from sors. Only a few yards in width, they are often of tremendous length. I hesitate to commit myself to figures, but it is certain that the thin, green fields would stretch away in the distance until lost over some little elevation. At one place the road was cut through a hill honeycombed with rock tombs, which the hat said were Jewish. tombs, which the haj said were Jewish tombs, which the haj said were Jewish. Every now and then we passed a tell, or great hemispherical mound, hullt up of the rubbish of a dozen ruined towns, for even as late as Roman times this was a well cultivated and populous country. There is now no lumber available for building purposes, and in a number of villages the houses are all built with conical roofs of stone. Where the rock happens to be of a reddish tingle the houses remind one of nothing so much as a colremind one of nothing so much as a col-lection of Indian wigwams; where the stone is white, as at Tell et Bisch, it glitters and sparkles like a fairy city

TONG WAR IN NEW YORK. Chinese Fail to Hit Each Other, but Wound Two White men.

out of loaf sugar.

NEW YORK, Nov. 25.-Fully 50 oistel shots were exchanged in the Bowery to-night between eight or ten Chinese and as a result two white man were wounded, one probably fatally. The shooting was between members of

the Hip Sing Tong, a reform organization and members of the On Leong Tong a Chinese secret society, which is reputed to foster optum traffic. None of the Chinese was hit, but John Baldwin received a bullet in the abdomen, which will likely cause death, and Horace Landi was shot
