Strikers at Ziegler Send in 500 Shots.

AN ALL-NIGHT FUSILLADE

Response Is Made by Four Gatlings at Mines.

ONE PERSON IS WOUNDED

Lelter Arrives With More Men From Chicago-Company of Militia Also Comes, and Force is Likely to Be Increased.

BENTON, Ill., Nov. 29.-Zeigler was fired upon last night from sundown to daylight. It is intimated that no less than 500 shots were fired at the town. The town was completely surrounded, and the firing came from every quarter. sponse to this fuelliade was made by four Gatling guns placed at various points about the mine buildings. Assistant Adjutant-General Reece and the Carbondale militia company arrived at Zeigler today, and General Reece will remain several days to investigate the situation. It is thought that still more troops will be

brought Joseph Leiter reached Zeigler today with more miners from Chicago, Examination of the ground this morning showed that the men who were firing have powerful guns. They were stationed from onehalf to three-quarters of a mile away from the town. Almost a bushel of empty shells of every size were found in the woods. A trall of blood was found on a rail fence, and from this it is supposed at least one person was wounded. Further trouble is anticipated.

Union Leader Says No Troops Needed.

BUQUERN, Ill., Nov. 25.—John Conroy, president of the local branch of the United Mineworkers, said today: "There is no need of soldiers at Zeigler. There has been no violence, nor is any anticipated. Our men are comfortably quartered at their camp, and have made no demonstration whatever. It is presumed that Leiter intends importing expert miners from Pennsylvania, and that he has induced Sheriff Stein to ask for assistance simply to have the soldiers act as guards, the same as Deputy Sheriffs have been doing since the strike began,

"I believe that Governor Yates has been misinformed as to the situation. The miners are convinced that Leiter is un-dertaking a hopeless task; others have tried what he is now trying and gave it up. He will find his efforts more expensive than his failure to corner wheat."

All persons, including newspaper men, are barred from the stockades of Zeigler. No one but Joseph Leiter, it is said, can through the control of the corner of the ne permits passing any one through

SAYS "OPEN SHOP" IS GAINING Parry So Reports in Annual Address

to Industrial Association. NEW YORK, Nov. 29.-Members of the citizens' Industrial Association, representing all sections of the country, were present when the second annual convention of the association opened here today, and the convention to bring It is the wish of the convention to bring about a complete organization of manu-facturers, business men and all employ-ers, and to advocate the open-shop idea. All employers not affiliated with the association were invited to attend the con-vention.

President David M. Parry, in his an-

President David at Patry, in his annual address, reviewed the growth of the "open shop" movement, and said that within a year 1999 factories have opened their doors to workmen who do not belong to unions. In some of these factories, he said, the output per man has been increased from 25 to 50 per cent. Mr.

"If trades unionists had become domi-nant in this country," he said, "I have not the least doubt that our industries would languish and our streets would be filled with idle men. No other results could possibly result from a system that would base a reward of labor, not on merit but on the power of organization to dictate terms, a system that would restrict our output, discourage enterprise and permit the indolent and least effi-cient to set the pace for industry." Mr. Parry declared that the courts have

air. Parry declared that the courts have with practical unanimity held that the closed shop cannot be maintained by means of contracts between employers and unions, for the reason that such con-tracts are illegal and void, in that they tracts are niegal and void, in that they tend to produce a monopoly and are un-constitutional and against public policy. "The question," he said, "then arises, whether the closed shop can be main-tained in the absence of contracts by the method of the unions refusing to work

I believe that when any organization takes concerted action to quit work merely to prevent men not in their organization from earning their right to inbor, an injury is inflicted upon the men forced out of employment which should entitle them to some redress. The unions must also remember that while they have the right to quit work, the employer has the right to employ whom he pleases." Mr. Parry, speaking of the Socialist

"It may be considered unfortunate by some that the result of compelling the unions to abide by the laws is to drive a portion of their membership into the Socialist party, but certainly it is no argument to say that the unions should be permitted to follow their own sweet will in order that their members may not be-come Socialists. The growth of the So-ciolist party simply adds additional force to the necessity that confronts the employers to take an active part in shaping public sentiment to the end that our great individualistic form of government may be maintained."

may be maintained."

In closing Mr. Parry laid special stress on the educational feature of the work of the Citizens' Industrial Association. He said the association has made marvelous progress in the first year of its organization, and that it was certain to become one of the most powerful and influential forces for good to be found in the world. The work he said, that it has undertaken must and shall go forward.
