Work Work Hides Nic. in the opening dealings in stocks today in a fairly uniform manner. But that was the last of uniformity in the day's market. There were many strong epots, and they were developed in rotation, spreading the effect of the strength through the session of the Stock Exchange, but the general list did not become animated at any time, and the day's business was considerably contracted from the recent average. Some of the most notable features of recent advances were laggard or inclined to eag on light offerings. As against the sharp gains in special stocks, there were no well defined weak spots, but only duliness and heaviness. There is still unablated confidence that the tranquillity of the money market is not to be disturbed for the year-end requirements, aiof uniformity in the day's market. The apparent anomally is easier to understand when it is considered that both classes of stocks are likely to be not widely distributed, and in consequence easy to move. The junior Vanderbills were conspicuous examples of the class today. A distinctly detected absorption for investment of this group of stocks is of greater semimental effect on the market for securities than almost any other act that could be named in the operations of the market. For this reason a concerted advance in the group is a favorité device of the market leaders to help along the rest of the market by sympathy. is a favorité device of the market leaders to help along the rest of the market by aympathy. The rapid manner in which these prices were advanced today was sufficient to mark the movement as suspicious, the railroad investor, as has been truly observed, not following the manner of a bargain-counter rush to secure his holdings.

The rise in Amalgamated Copper was based on rumons of an intended increase in the dividend on one of its subsidiary companies. Hailroad earnings reported were generally favorable. The conclusion of the London settlement occasioned a favorable influence from that source. The December settlements hers and the payments of a \$20,000,000 installment on Southern Pacific stock induced a firmer tone both for call and time loans, but this was not an effective influence in the stock market. WASHINGTON, Dec. 1.—Today's statement of the Treasury balances shows: CHICAGO, Dec. 1.—At the start wheat was strong. Higher prices at Liverpool and unexpectedly small receipts in the Northwest were the factors mainly responsible for the initial firmness December was up is to % cents to \$1.08% @1.08%, and May up %8% cents at \$1.08% \$1.10. Owing to exceedingly light deliveries in December contracts, shorts were active bidders for that option, and as offerings were hard to find. the price quickly advanced to \$1.09. sympathy May sold up to \$1.10%. Toward the end of the first hour, sentiment gradually shifted to the bear side. With increased With Bales.

BOSTON, Dec. i.—(Special.)—Private cable offerings by pit traders, prices eased off. The weather was still dry throughout the Winter wheat country, but Kansas City sent will have a serious effect upon the Boston and reports of some snow flurries in parts of Misthe American wool markets generally. A gensouri. The prospect of moisture in drouth-stricken region gave courage to ers. In regard to the effect of the dry weather, a Cincinnati trade paper asserted that the time had not yet been reached for everything in Buenos Ayres is now at a standstill, while thousands of bales of wool are assuming a positively pessimistic view and this helped to allay some of the uneasiness of the market. Late in the day, buying took an hidditional set-back as a result of Enormous purchases for Boston account were made early in the month, with rush orders at tached, but nothing can leave there.
