### **GRAIN FOR THE EAST**

Northwest Purchases Almost All Delivered.

CAR SHORTAGE IS RELIEVED

Railroads Are Mastering the Serious Problem of Handling 15,000,000 Bushels Usually Destined for Export.

Within the next 60 days all of the immense quantity of grain-probably exceeding 15,000,000 bushels-which has been sold to Easterners will have left the three North Pacific States. The congestion due to lack of cars, which has been worrying the wheat merchants of this city, is nearly at an end, and before the month of January is over, the state will have been wiped off, so far as the local trade and the railroads are concerned, and a fresh start can be made, provided the Eastern consumers still want Northwestern wheat and are willing to pay the

The handling of this great volume of traffic presented obstacles which the railroads naturally had not foreseen. Some of them met the emergency and some of them did not. Loud and long were the emplaints made by dealers of this city at the inadequacy of the car service, as they saw golden opportunities of making money of which they could not take advantage, for the greatest difference in prices between the Northwest and Chiago were at the very time they could of forward the grain. Happily, the trouble is now nearly over, and cars are being rushed in so rapidly that the grain remaining in the country will be dis-patched to its destination within the time equired by the contracts.

The total amount of wheat bought in this country for the East cannot be stated accurately, but well-informed grainmen say it is not less than 15,000,000 bushels. Of the amount still to be moved, the mates range from 25 to 40 per cent. A conservative estimate is that twowarded, and at the rate that the grain being moved the remainder, some bushels, will be sent across the Rockies in this and the coming month The O. R. & N. has to date moved about ,400,000 bushels, and the wheat handled by the Northern Pacific will aggregate imost as much, though some wheatmer believe that its shipments will exceed that of the O. R. & N. The Great Northern has also handled a considerable quantity, though little in comparison with

Wheat Dealers Are Pleased.

The wheat dealers of this city are greatly pleased with the treatment given them by the Northern Pacific. At no time dince the Eastern movement began has any serious delay occurred in moving the along, and this notwithstanding the movement was wholly unexpected. the beginning of the season no one had any idea that so large a portion of the Northwestern crop would be turned toward the Eastern States, instead of following the customary channel by water to Europe. The tide of traffic was diverted suddenly, but the officials of the Northern Pacific were equal to the ocin their power possible to further the Had they been so inclined, the company

could have stopped the traffic completely, for they were on the point of advancing for the point of adv ited quantity required by certain cereal manufacturers. It was proposed about is remembered that the peculiar condi-tions that made the Eastern shipping of heimer, J. R. K. Irvine, J. J. Hirshi tions that made the Eastern shipping of wheat possible likewise put several millions of dollars more in the pockets of the farmers than they would have received from European consumers, it will be seen that the railroad was not wholly selfish in taking the stand it did. The wheatraisers of these states have been enabled to take advantage of the crop failure in the Middle West whereas had the tariff port basis during the past three months.

The Northern Pacific has not only moved all the wheat offered it, but has also taken care of the other freight originality. in this territory, the hops, wool, livestock, salmon and various products of the forest, and this with no interruption what-

Sixty Cars Pass Huntington Daily. The improvement reported of late on the Harriman system is most gratifying to shippers, as a large quantity of wheat had accumulated in O. R. & N. territory that they were particularly anxious to have forwarded. It is said that 60 cars a day are now passing Huntington Eastward bound, and more cars are available to expedite the movement. These extra cars are from the connecting lines which willing to lend their equipment for the purpose, as their roads get the haul after the cars leave the Union Pacific

Whether or not the Eastern demand for Pacific Const wheat will revive after the Pacific Const wheat will revive after the supplies now bought are sent along remains to be seen. Chicago prices have of late been tending downward, while foreign markets have slightly advanced, and thus diminished the likelihood of much of an Eastward movement to follow, but speculative markets are hard to forecast and the scale may yet be changed. At any rate, there is not much = more wheat left in this country to be shipped, only about 15 per cent of the crop remaining in first hands, with seeding requirements and home consumption yet to be taken care of.

UP TO HIGH SCHOOL.

Anti-Cigarette Lecturer Addresses a Large Number of Students.

At a special assembly of the High Scho pupile held at 2 P. M. yesterday Rev. Walace R. Struble, of Chicago, spoke con-League and the pernicious effects of cigar-

"I have spoken in all the schools of the City of Portland," said Mr. Struble, "and this assembly has been purposely reserved for the close in order that I might come to you with the results of the campaign estimated and ask for your co-operation in the great work which the league seeks to do in behalf of the boys of younger years than you in the public schools of this city. The mind of the little boy naturally turns to the high school boy as an example for emulation, and the lateral content of the responsibility that in the great work which the league seeks as an example for emulation, and the latter cannot escape the responsibility that is upon him; this is true of the girls also—the little girl imitates her mother or older sister and frequently parades with the skirts of the eider lifted jauntily North Pacino States, and the temperatures

in true woman fashlon. I come to you young people of the High School in the name of the nearly 6000 boys and girls of the grade schools who have become mem-bers of the Anti-Cigarette League and ask for your sympathy and co-operation in the work of depopularizing and de-stroying the great curse of boyhood, the cigarette-an instrument of destruction so baleful in its results as to be feebly de-scribed by the term 'curse."

Mr. Struble dwelt especially upon the harmful effects of this gas taken into the blood corpuscies by inhalation and also upon the puckering, shrinking effect of empyreumatic oil, a product of the burning cigarette paper-the outcome of the inhalation of which would be the disarranging of the nerve tissues, the shrink-ing of the lung area and the general de-moralization of the vital organs.

In closing the speaker paid a high trib-ute to the youth of Oregon and said that they were near to his heart on account of the associations of former years. He said the youth of today were at the threshold of the greatest century of the world's his-tory and the boy of today should come up to manhood's estate, "not with blear eyes, palsied body and enfeebled brain to look out upon a low morase of defeat and despair, with the grave just a year or two beyond to receive his decaying carcass, but he should come up with a perfect body, a mind equipped and alert, a pure soul and with clear eye look out upon mountain ranges of success whose snows peaks of promise might invite him on to splendid victories in life's battlefield."

#### OFFICERS ARE ELECTED.

George Wright Post, G. A. R., and

held in their hall at 193½ First street. Much business was transacted at both manufacturers. It was proposed about the beginning of the season to advance the tariff on this commodity, but as soon as it was seen that there would be an immense movement of wheat for general commercial purposes the Northern Pacific officials indefinitely postponed the advance and bent all their energies to getting cars out here to move the crop. When it is remembered that the peculiar conditions that made the Eastern shipping of
