KRAMER EQUALS RECORD.

American Champion Bicycle Rider of World Leads in Six-Day Race.

NEW YORK, Dec. 5 .- Frank Kramer, the champion sprinter of the world, in the sixday bicycle race, equaled the world's rec. ord for an indoor quarter-mile during the afternoon, making the distance in 0:24 2-5 Tonight the riders settled down to their monotonous work, spurts being few and fruitless. Some of the many splils have resulted in severe bruises. Keegan has a broken nose and discolored eyes, while Newkirk has lacerated legs. Opthers are similarly bruised. Keegan, the Lowell. Mass., boy, was quite badly hurt. He was forced to leave the track. While the nen were engaged in a heart-breaking sprinting match Rockowitz suddenly went lown, and Agraz, of the Australian-imerican team, who was following close behind, crashed into him. Just as both riders started to slide down the embank-ment Keegan came around at a terrific. burst of speed. His wheel struck Rocko-witz and Agraz with terrible force. Keegan struck on his face on the board track. He was a pitiable sight. His face was covered with blood which flowed from his nose and a deep cut across his fore-

BANKS REJECT IT.

Will Not Accept Bill of Lading as

NEW YORK, Dec. a -- At a conferen of bank presidents, it has been decided, according to the Journal of Commerce, that the uniform bill of lading which the Trunk Line Association of Railroads proposes to put into general use in the East on January 1 is not negotiable. Following this decision, announcement was made to shippers that the banks represented at the meeting will not accept the bill of lading as collateral for loans.

It could not be learned just what bank officers were present, but it is known that the president of one large institution recently submitted a copy of the new bill to the bank's legal representatives, and got the opinion that with the words "non negotiable" printed on it, the bill most certainly could not be accepted as

This opinion will be submitted to the Interstate Commerce Commission during its investigation into the workings of the uniform bill of lading in Chicago this

Nan Patterson, the Show Girl, Is No Longer Nervous.

THREE JURORS ARE CHOSEN

but Has Not Yet Been Reached Aged Father of Prisoner in Court.

NEW YORK, Dec. 5.-The second trial of Nan Patterson, accused of the murder of Caesar Young, the wealthy bookmaker, in a cab on West Broadway six months ago, commenced today in the criminal branch of the Supreme Court, and when adjournment was taken for the day, three jurors had been chosen. Miss Patterson, who has been ill with tonsilitis for several days, appeared in excellent spirits. Her manner was very vivacious, and the nervousness noticed during the progress of the first trial had entirely disappeared. She was scated by her aged father.

After nine talesmen had been examined and refused, Justice Duvis, who will preside at the trial, intervened and assumed the role of examiner. Miss Patterson carefully considered the capabilities of each talesman and frequently suggested questions for her counsel to propound. She expressed a desire that no other men

POETRY AND PULSE BEATS. Thoughts Suggested by the Claim of a Noted English Scholar.

These experiments, begun some time ago in a field heretofore unexplored by psy-chologists, are of a delicate nature, and the university at Berkeley, we are in-formed, is one of the few institutions in the United States which posses apparatus sensitive enough to record the results

Professor Dixon has already discovered an emotional curve in poems like Long-fellow's "The Bridge." Experiments are now being conducted to discover a law of relation between stress in poetry and the beat of the human heart, and of the relation between the lines of poetry and the respiration. A large number of tests have been made, and some provisional conclusions have been reached, but before

ly complicated machine that records the pulse-beat of the person reciting the poetry, the stress, the number of lines, the respirations, and the time taken. All these results can be preserved, so that in a little time, perhaps, we will be able to follow exactly the heart and lung action of the young lady who recites "Cur-few Shall Not Ring Tonight," and fol-low perfectly the curves and pulse-beats

low perfectly the curves and pulse-heats of the man who does "Casey at the Bat."

Take Tennygon's "May Queen" for example. Professor Dixon's experiments show that the three divisions into which the poem is divided vary in a decided manner. The first, giving a mood of heightened happiness, uses 11 per cent more syllables than the second, which is a mood of degreession. The third diin a mood of depression. The third di-vision is in a mood of resignation or sorrow, and uses 3 per cent less syllables than the second.

Not so many elecutionists as formerly of them every word means a stress and a pulse-throb, and that the couplet comsed by Colonel John A. Joyce and Ella Laugh, and the world laughs with you;

ture of organic effort and no small degree of exhaustion of the vital forces.

It would be still more interesting if Professor Dixon, whose scholarship Professor Dixon, whose scholarshi seems to be equal to anything, would produce records showing us at just what point in the course of an hour's reading of Alfred Austin, Browning, or even of Kipling, in a social club meeting, the curves, pulse-beats and heart-throbs of the listeners call for the spilling of blood.

HOW TO PROTECT PHEASANTS Best Way is to Prohibit Absolutely

the Killing of the Hens.

PORTLAND, Dec. 5 .- (To the Sport Editor.) - Regarding the gestion published in The Oregonian a few days ago for the enactment of a law to prevent the use of dogs in hunting upland game, especially the Ringneck pheasant, the proposition is a freak and must have been propounded by an amateur who has but crude knowledge of pheasant culture and general methods of hunting them. Furthermore, his idea of the true sportsman, who is naturally a most ardent game protector, is very far-fetched. Since Game Warden Baker has appeared in print as indorsing these ideas, he can only be classed in the same grade.
Although the "Ringneck" is a new bird to some sportsmen of the Pacific states, it has with several closely ailied species been extensively cultivated with great success in the older countries of Europe for many generations Oregon sportsmen will do well to be largely guided by the success gained in the experiments pursued by those who have been there before them than to try to force any new theory on the The individual quoted in Sunday's

Oregonian makes a practical assection that he will not, and that a certain class cannot be expected to observe the game laws, unless they be constructed to suit his ideas. This may readily be construed as an incitement to violate the laws of the state, and it is surprising that our Head Warden, as a state officer, should come so near endorsing the sentiments of this person whom he should rather keep closely under his observation. The most successful method of keep-

ng up the pheasant supply known to the best authorities is a law prohibit ing the killing of hens at all times, which is now universally adopted in all civilized countries except perhaps Oregon. It is not necessary to go farther than British Columbia, where our cousin sportsmen, being familiar with the good results obtained by such a law, enforce a penalty of \$50 for every hen killed. As an example, I may here quote a statement made by a prominent citizen from just across the border, recently visiting in Partland. This person owns a half section of land in British Columbia and on the first day of the present open season had no trouble in bagging 36 cock pheasants, on which there is no limit. The state provides a good tres-pass law by which the farmers may protect themselves from those whom they do not wish to hunt on their land and every fair sportsman would be glad to see it enforced, as it would in time mean plenty of game for every one, particularly if the killing of hens were pro-

The penalty for killing out of seaso should be imprisonment, supplemented by a fine as the case might warrant. A hunting license of \$1.00 a year, as suggested, should be strictly enforced. I may further say that in the best pheasant countries they do not hunt them with dogs, not because they fear the dogs will find every bird and hold him to the muzzle of a gun, but because pheasants prove the most wily and unsatisfactory of game birds to work a dog on. They are now almost univerdog on they driving. MULTNOMAH.

BANKER MAKES CONFESSION. Representing Himself as Agent Said Notes Were Genuine.

CLEVELAND, Dec. 5.-In the United States District Attorney's office today President Beckwith, of the failed Citizens National Bank of Oberlin, made a confession regarding the bank's transactions with Mrs. Cassie L. Chudwick. Mr. Beckwith said:

Chalwick began three years ago. The attorneys for Herbert D. Newton, the Brookline, Mass., banker, have stated that their client lent Mrs. Chadwick money only after a note signed "Andrew Carne-gie" had been indorsed by the president and cashier of a National bank. The men who indorsed the note were President Beckwith and Cashier Spear, of the Citizens' National Bank Oberita O. Relating this matter, Banker Beckwith continued his story of the bank's transac-

tions with Mrs. Chadwick as follows: "Yes, we indorsed the note, in addition to one other note for \$500,600, but never for the purpose for which they were used."
"Do you mean to say that there are two \$500,000 notes in addition to the note for \$250,000?" was naked Mr. Beckwith.

"Yes, notes aggregating \$1,250,000." "It has not been generally understood that there were two notes for \$500,000, was suggested.

"I know it, but the notes exist just the same," said Mr. Beckwith, "One of them is in the hands of the receiver, and the other ought to be in the hands of Mrs. Chadwick. If she has disposed of it, she has done something which she swore she would not do, so please make it plain that a solemn oath was taken that the notes which bear our indorsement were never to be used by Mrs. Chalwick for the purpose of raising money and she knew it.

Did you have the slightest suspicion that the notes carrying the name of Andrew Carnegie were not genuine?"

I guess my inquiries reached the ears of Mrs. Chadwick, in the light of events of the past two weeks. I guess Mrs. Chadwick was greatly interested the moment she learned that inquiries for business had been made of it. At any rate, she came to Oberlin, and it was there the thing began. A second interview, and I made a small loan. It was promptly met. In addition, we secured additional splendid business, and all transacted in a business way. From there on the story leads into a maze, the end of which I wish to God I could now see. It leads down to a time when I went to New York. In my pocket I carried one of the notes signed with the name of Car negie. When I started I had in mind an attempt to raise money on the paper to put funds in the bank. When I got to New York my heart failed me, for something told me that all was not right. I came back home without any attempt to raise money on the note.
