HOTS—There is no hop market to speak of.

Beens dealers look for a revival of activity about the middle of this month, but others are not so sanguine that business will be resumed on a satisfactory scale before Spring. In the meantime holders are waiting firmly for better prices, and show no inclination to let go until they get them. There is no material change in the situation in the East or abroad. The Journal of Commerce of December 31 said of the New Tork market:

Stimulating Effect of Northern Securities Decision Loses Much of its Force.

previous break in the stock keeps alive this spirit of apprehension.

The atimulating effect of the Northern Securities decision had but some of its force today, and Northern Securities on the curb, and all the stocks related to it on the exchange, were reactionary. It is taken for granted that plans are far advanced toward agreement, and there is remaining force in the consideration that the terms fixed for the redistribution of the properties in the merger will east the control secured by the Union Pacific of the old Northern Pacific, thus in a measure relegating conditions to the same stale as that existing before the colossal contest between the glants of the railway world in 1901.
