the movement of currency has turned in full

Although a comparison of receipts today with those of the corresponding day a year ago this not show a sufficient decrease to create did not show a sufficient decrease to create buildstness, the figures were enough smaller to keep alive some hope in buil traders. Business, however, was much restricted during the early part of the seasion, pit traders being bearishly inclined and waiting to avail themelves of a possible sump. Workness of course grains brought out some profit-taking in wheat by local longs. Offerings were not readily taken, and in consequence prices eased off a trifle. May declining to \$1.14\$, Later in the day a firmer time developed, mainly as a result of reports of improved demand for cash wheat at all the principal centers. A factor that helped to increase builts gestiment was Bradstreet's report showing exports of wheat and flour of 1,412000 bushels for the week. The high point on May for the day was reached, \$1.156. The market closed with May at \$1.15.

May at \$1.15.
Early in the session the corn market exhibited much weakness, being subjected to renewed selling by several prominent commission houses. May opened unchanged to a shade higher, at \$455c to \$45000000; and closed at \$455000000; combined with some abort selling, caused an early break of tie in the oats market, but nearly all the low was subsequently regained by aborts. May closed at \$95500000.
