It is for the purpose of securing this Government work that the latter class of bills has been introduced, providing for the employment of a director of a geological bureau located at the State University and the maintenance of a mining exhibit at Portland.

For the purpose of learning what other states have done in this direction the University of Oregon has sent out blanks to the bureau of the main force of the geologists of the country, asking for replies to a number of questions with regard to their form of organization, etc. Replies have been received from 23 states, 21 of which support state geological surveys and two support mining bureaus.
