EXPORTS OF COTTON

Oriental Countries Are Taking Increased Quantities.

GROWTH OF TRADE IN DECADE

Japan Draws Upon This Country for Raw Article, Which It Manufactures Sells Product to China -Opelng for Americans.

WASHINGTON, Feb. 16.-Some figures just piled by the Department of Commerce and oor, through its Bureau of Statistics, suggood the possibilities which await the cotton consufacturers of the United States when they may find time to enter seriously upon the task of turning into the manufactured state the cot-con produced in this country and now supplied n the natural state to the manufacturers of

eration of cotton manufactures from Japan to thine during a term of years, but as Japan draws largely from the United States the raw cotion with which it produces the minu-latures in question the suggestion which they offer is naturally an interesting one to us. These figures of exports of cotton manufac-tures from Japan to China show that the total value of cotton yarms exported from Japan to Chine. in 1893 was \$29,580, and in 1903 \$14,112,807; and of other cotton manufactures in 1893 \$221.785, and in 1903 \$2.015,587, making the total of cotton yerns and fisthed cotton manufactures sent from Japan to China in 1803 \$251,062, and in 1903 \$16,126,054. ported from the United States to Japan has grown from 783,242 pounds in 1893 to 161,601,-219 pounds in 1900, the value of the same being to 1883 \$68,425, and in 1860 \$12,712,619. The quantity and value in 1860 were somewhat reduced by reason of the very high price of American cottons and the fact that Japan in nds a shorter staple and therefore lower prices. The general fact, however, that Japan increased her purchase of our raw cotton from \$88,000 in 1893 to \$7,500,000 in 1903, and in he same period increased her sales of manu-actured cotton to China from \$251,000 in 1833 o \$16,000,000 in 1907, suggests the possibili-ies which await the cotton manufacturers of the United States when they may choose to norn the cotton produced in this country into the finished state before permitting it to pass to the cotton consumers of the world.

Tiels industry, which has recently sprung up Japan, of buying American cotton, turning into the manufactured state, and selling it so other countries is, of course, merely a reeduction of a process which has been going on for many years in the older manufacturing countries of Europe. The United Kingdom, for example, took in 1903 \$125,000,000 worth of cetton from the United States, basing this smoked tatement upon our figures of exports to that rele. E. country; and in the same year exported \$322, 90,056 worth of finished cotton goods and \$30,000,000 worth of cotton years. Germany in the same year bought \$55,000,000 worth of cotton from the United States, as shown by our own figures of exports to that country, and exported \$50,000,000 warth of cotton manufactures, of which \$71,000,000 was finshed goods and the remainder parts.

France took in 1903 \$35,000,000 worth of cotton from the United States, backing this state-ment again upon our export figures, and ex-perted \$55,000,000 worth of cotton manufac-tures, practically all finished goods, the quanton from the United States, basing this statement again upon our export figures, and exported \$25,000,000 worth of cotton manufactures, practically all finished goods, the quantity of yarms exported being less than \$1,000,000 in value. Japan, as already indicated, took in 1903 \$7,500,000 worth of cotton from the United States, as indicated by our export figures, and exported \$25,000,000 worth of cotton from the United States, as indicated by our export figures, and exported \$25,000,000 worth of cotton from the United States, as indicated by our export figures, and exported \$25,000,000 was finished goods, while \$15,500,000 was finished goods which the older countries is apparently due in part to the fact that her manufacturing establishments have not yet reached that stage of perfection in the production of finished goods which the older countries of Europe have at taking and in part, also, to the fact that the people of her largest customer, China, utilize yarrs largely in the household manufactures of cotton clothe for domestic use, especially in varies of finished goods. National contents of the production of finished goods. States are follows: Barrels, 190; half-barrels, 28c; boxes, 50c per 100 pounds; maple sugar, 15g18c; continually the pound at \$150.00 (cost Rica, fanty, 1822; condinux, 26g18c; condinux, 26g1

Expected to Advance.

Great firmness marks several of the leading articles in the staple grocery list. The most nierest attaches to beans, in which there line less an advance in all grades in California, especially in small and large whites, owing to the Eastern demand, which has lately caused

reavy shipments from the Const.

The strength of the salt market gives indicaion of a further advance in a few days. Flour is also expected to go up in price in he near future. The market at the moment very strong and in view of the high wheat prices being paid, it is thought that the adwance to flour quotations will be considerable

PHILOMATH, Or., Feb. 18.—(Special.)—Despite reports of alarmism that crops have wastained serious durings as a result of the receil cold wave and of the subsequent spell of freezing and thewing weather, there is little scorers among farmers, who would not fall to detect any damaging results of the freeze.

"I cannot see that the cold snap has injured grain. A furnight of but little rainfall had inga upon low ground where water had collected," and County Commissioner Jolly, when interviewed today concerning the probable of rected," and County Commissioner Jolly, when TALLOW-Prime, per pound, 485c; No. 1 and grease, 25,65c. fect of the recent zero weather upon sown grain. A fortnight of but littl rainfall had prepared the ground so that any ill effects of a freeze were reduced to a minimum.

PORTLAND MARKETS.

Grain, Flour, Feed, Etc. The excitement in the Chicago wheat market has its effect here, but it is largely sentimental. Prices are strong and, on a party with the East, somewhat higher, but there is hardly any demand and quotations are almost nominal. Some insuly is reported from the East, but local dealers report that they are not doing much. Farmers' ideas have been strengthened by the Eastern bulge and it is very difficult to get wheat even at the quoted values. It may also be noted that only

STRENGTH IS SPOTTY

Northern Securities Advances to High-Record Price on Curb-Money in Abundant Supply.

ow of spoity strength was about the same loday as yesterday, except that some different stocks were affected. In some cases it was apparent that the movements were due to operations by pools in the particular stocks. in some others there was news or rumors which offered ground for higher prices. Low-grade industrials continued to play a con-apionous pert in the market and in the rallroad list the low-priced non-dividend-paying stocks came into greater favor. Stocks of the Morgan group, including United States Steel common and Rock Island, were examples in

this class. Union Pacific advanced again to slightly above its high price of yesterday. But the fallure of a stock exchange house which was said to be due to uncovered commitments on the short side of the market, was believed to explain to some extent yesterday's sharp rise in Union Pacific. The strength of the stock in consequence did not hold throughout the day. There was, however, a corresponding advance to a new record price for Northern Securities on the curb and buyers of the stocks professed confidence that an early in-crease in the Union Pacific dividend rate was

Testerday's runors of a transfer of control of Ontario & Western to New York Central were denied on authority, but that stock continued to show strength and the minority ipterests were said to have faith that they would

be granted lucrative terms.

The decline in exchange rates continued an money was in abundant supply. The time is now approaching, however, when the tide of the currency movement from the interior is approaching the turn as indicated by the decline in the interior rates for exchange or New York. This periodical course of the a tendency to anticipate it even before I does develop.

given to the contest for control of the ener-mous resources of one of the great life inmous resources of one of the great life in-surance companies. Aside from the personal phases of the contest and of the merits of the dispute over the manner of administering the important affairs involved, the hitterness evoked by the struggle is witness to the vast importance attached to the control of the in-surance companies. The effect was not stimu-fating upon the speculation in stocks.

Further cuts were announced on freight rates in the progress of the war for experi traffic and there were complaints of freight obstruction from the stormy weather. An uncertain tone developed in consequence and the sharp selling movement of the last hour wiped out

WHEAT SHORTS STILL FRANTIC TO COVER.

Result is Advance to High-Record

Mark of Season in the Chicago Pit.

CHICAGO, Feb. 16.-The attention of wheat raders today centered around the May delivery. Trading in the option was at high ten sion all through the session. There was apparently constant fear of unexpected developments. At the start, May was up %6% to %6%c at \$1.20@1.30%. July was unchanged to %q higher at \$1.00%691.02%. Commiss houses generally had orders to buy at \$1.20 for customers who were short. Filling of there orders was attended with no little citement. Within a few minutes after the pening May sold at \$1.20% and July at \$1.02% 01.02% Statistics appeared to have lit-tle effect, the compested condition of the mar-ket for May wheat being the all-absorbing topic of conversation. At the initial advance there was long wheat for eale in large quantitles by outside holders. Later the seiling was sugmented by offerings from houses that have been trading largely for Wall street speculators. As a result prices experienced a sharp setback. On covering by shorts May quickly reguined much of the loss. July, however, was in poor demand. The market was extremely nervous the remainder of the session. Just before the close another sharp advance occurred as a result of repewed covering. May rose to a new high record mark on May were at \$1.21%. July

the Chicago boxin and trade noth in leaves and spot was inactive. Barley options opened weak, but closed higher for May. Other increase were quiet and featureless at unchanged to he lower at \$75,474c and closed to he lower at \$75,474c and closed

good demand for vessels seems probable.

Conditions and prices in the fruit market are unchanged. Rainy weather checked trade.

Oregon Burbank pointoes were firmly held on telegrams that the next steamer brings only 1200 sacks. Hiver pointoes were dull and easier. Sweets were steady. Onlors are to few hands and stronger. Holders of favore to 311,62319c. soid off to 311,62319c. and off to

The leading futures ranged as follows: WHEAT. May ... \$1.20 \$1.21\(\frac{1}{2}\) July ... 1.02\(\frac{1}{2}\) September ... 94\(\frac{1}{2}\) ... 94\(\frac{1}{2}\)
