ST. PETERSBURG, March 3-13 A. M. Black clouds are again lowering over the industrial situation of Russia. The strike at Moscow has been resumed on a larger scale, amarchy reigns in the Cameasus, and at St. Petersburg the measures which the government advanced to quiet discontent and restore good re-lations between masters and men appear to have falled, with the probability of causing the storm to break anew.

labor delegates representing th whole of the industrial population of St. Petersburg, who were elected to choose 50 members of the Schidlovski onciliation committee, met again yes terday and affirmed the resolution adopt ed the previous day which threatened in case the demands were not granted, not only to refuse the elect labor representatives to the commission but to order a resumption of the general strike. These demands are for the release of im-

prisoned workmen, freedom from arrest, unhampered speech full publicity of meet-ings of the commission and the abelition

of the censorship.

A practical ultimatum was delivered calling for an answer today. There is little expectation that the government will grant the conditions demanded.

The strike already has assumed large proportions here, about 50,000 men being out. Among those who struck yeaterday are the employes of the St. Petersburg sheps of the Warnaw Ralirond. The strike has not yet extended to the trainmen, but the leaders may decide to order them out in order to paralyze one of the most important railroads in Russia.
