The probability of the treaty being brought up in the future as a precedent and freely in the committee towas discus day, and it was predicted that the pro-cedure was a forerunner of what may be expected to take place in regard to Venezuela. It was declared, too, that this lovernment may have to take over Santo Domingo as territory of the United States. In this connection, an amendment will be offered in the Senate striking out that part of the preamble whereby the United States agrees to respect the complete integrity of the Dominican republic.

This smendment, which was suggested the committee, was regarded as against is policy of the Government, and this, it believed, will be the judgment of the Senate. At the same time, it was pointed out that Santo Domingo lies between the United States and Porto Rico, and that the government, as now constituted, is a "bas methics." bad neighbor.

Protest From Exiled Dominicans.

Discussion of the treaty in executive session of the Schute today was co cated by a protest submitted by Teller from members of the Haytian and Do-minican colonies in Europe. It was dated Paris and was directed against the protoool of January 30, which was negotiated immediately prior to the present protocol but nover was submitted to the Senate-it is asserted by the protestants that President Morales, of the Dominican Re-President Morales, of the Dominican Re-public, is a dictator and by entering into this agreement with the United States is indirectly attempting to cede to the United States territory which he fears he cannot hold. They declare further that Morales is actuated by a desire for per-sonal gain. They declare against what is termed an unconstitutional alienation of government rights and forms without the executive first submitting the quee-
