

BUYERS HAVE LEFT No More Contracting in the Wool Districts.

ADVANCE HAS BEEN CHECKED Most Activity is in California, Where the New Clip Has Come On—Status of the Boston Market.

The local wool market is dull, so far as future business is concerned, and contracting in Eastern Oregon has also been suspended. Private advices from the East and London are not encouraging, and contractors have consequently drawn off. The wool bought to date has been at prices averaging fully 25 per cent over those paid last year. Local dealers say they do not see a quarter of the entire Oregon clip has been contracted for. In Idaho, however, the output has been well bought up.

Oregon wool has made its appearance again in trading in the Boston market, according to the Commercial Bulletin of March 4. A line of staple has been floated out at better than 25c. It is scored not well up to the highest quoted on such wool at any time this season. California wool is fairly active in Boston in sales of half-soured lots. Average Fall with a slight deficit, said at 50c per pound. No more contracting is to be done in Boston at 25c last year are getting that much now in California. The Commercial Bulletin says of general conditions: There have been no fresh developments. The market is a waiting one, though rather more active than in the past. The volume of business has given more confidence. A better general demand is expected this month and larger sales. Those who have supplies wish to market can see evidence of strength, prominent among which is the extensive concentration, equal if not in excess of any period in the history of wool manufacturing in this country. Manufacturers' holdings of raw materials are being reduced to a minimum. It is believed that the production of clothing in time they must be replenished. It is in this condition which buys up large holders of wool, for they believe that the volume of business will be found a place for their property between now and the appearance in large quantity of the new United States clip. There is perhaps less activity in the wool market than in any other part of the wool trade. They are not hurried to make additions to their holdings, and will not until they believe that the volume of business has been imported by numerous sellers has not helped matters. When imported supplies are offered at the market, it is difficult to get the buyer to think that it is a good time to wait. With plenty of patience and the requisite amount of "hand," it is not difficult to get the buyer to think that it is a good time to wait. With plenty of patience and the requisite amount of "hand," it is not difficult to get the buyer to think that it is a good time to wait.

Grain in Farmers' Hands. WASHINGTON, March 10.—The monthly report of the Chief of the Bureau of Statistics of the Department of Agriculture will show the amount of grain remaining in farmers' hands on March 1 to have been 111,000,000 bushels, or 20.1 per cent of last year's crop, as compared with 20.8 per cent of the crop of 1903 on hand on March 1, 1904, and 24.5 per cent of the crop of 1902 on hand at the corresponding date of 1903.

CONFIDENCE IS GENERAL WEATHER IS FAVORABLE FOR TRADE IN MOST SECTIONS.

Merchandise Movement Expands in All Sections Except Portions of the South.

NEW YORK, March 10.—R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow: Confidence has become general through revivification of work, improvement of weather and expectation that the war will soon terminate. Weather conditions are favorable in most sections of the country, and there is little uncertainty regarding labor conditions. Some inconvenience was caused by the local strike, and retail trade suffered temporarily, but in the aggregate the commercial loss was not excessive. The most gratifying news of the week emanates from the iron and steel industry. Commodities are in good demand. Dime's number advances slightly to \$101.92 on March 1, against \$101.62 a month previous, which indicates that the people are consuming freely. This is also shown by the large increase in merchandise imported last week, although in the last week there was a decrease of \$2,900,000 compared with last year. Exports gained \$2,071,017.

FAVORABLE CROP WEATHER. Reports Cause Weak Wheat Market at Chicago.

Merchandise Movement Good. Railroads No Longer Suffer From Congested Car Trouble.

CHICAGO, March 10.—Reports of favorable conditions of fall-sown wheat caused a decline of 24c in the market today in the price of the July option. Part of the loss was subsequently regained on covering by shorts. The close, however, was weak, with July down 1/4c. May was off 1/4c. At the start the feeling was rather nervous, initial quotations on May being 1/4c lower to 1/2c higher, at 11 1/2c. The market became more active, and the price of the July option advanced to 11 1/2c. The market became more active, and the price of the July option advanced to 11 1/2c.
