inc. and the excess of experts over imports is smaller than in any maprils since October, 1886, except the three months of April, May and June, 1897, when imports were exceptionally high by reason of preparation for the change in tariff which occurred in July of that year. These figures are from the official publications issued by the Department of Commerce and Labor through its Bureau of Stattetics.

een indicated, due chiefly to the falling off the quantity of wheat experied and a re-

heen indicated, due chiefly to the failing off in the quantity of wheat exported and a reduction in the price per pound of cotton exported. The wheat exports in the month of February amounted to only \$100.421, against \$1.200.043 in February of last year, and the flour \$2.575,14h, against \$5.511.541. The exports of cotton in February fell nearly \$11,000.000 in value below these of February of the preceding year, and this was due entirely to the fall in prices, the quantity exported in February, 1906, being considerably greater than in February, 1906.

Turning to the import side, the large increase in importations apparently occurs chiefly it manufacturers materials and articles at food. The detailed figures of the imports by articles are only available up to the end of January, the February figures not yet having been completed. The seven months emiling with January, however, show an increase of \$33,000,000 in imports of articles in a crude condition for use in manufacturing and of about \$30,000,000 in articles of food. The increase in importations of manufacturing and of about \$30,000,000 in articles of food. ing and of about \$30,000,000 in articles of food. The increase in importations of meanufacturers' materials occurred chiefly in India rubber, mean't \$6,000,000, raw all \$12,000,000, and about \$5,000,000 in certain other articles used by manufacturers. The increase in importations of food stuffs occurred chiefly in coffee, about \$17,000,000, and sugar about \$14,000,000. In manufactures the degree for the sever months endire with because othe ending with January also a slight reduction as compared with Lanuary slow a slight reduction as compared with the nor-responding month of last year, though in those statements with reference to details of imports it should be understood that the figures are for the seven months ending with January, the details for Telemary not having been com-

CHICAGO, March 21.—Sentiment in the wheat market was bullish throughout. At the start May was unchanged to he higher at \$1.14% \$0.115%. July was up high at \$2.5% \$0.25%. Unexpected strength at Liverpool, following meakness here pesterday, was partly accountable for the opening fromess. The May option was the chief attraction early in the day. A leading bull trader was the principal buyer. Owing to small offerings, May ross rapidly to \$1.15% and July to \$56. The market then weakened somewhat on profit-taking, but the reaction was soon overcome by buillish news from the Northwest. Shorts were moderate purchasers late in the day. The market closed firm with May he higher at \$1.15%. Final quotations on July were at \$2.5 \$0.25%. a gain of he.

Boston Market in Strong Position,

Are in Fair Demand.

Boston, March 21—While the Boston wool
market is considered by dealers to be in a
strong position, business is light in most
grades. The demand, as a rule, favors the
fine wools. The slow movement of domestic
mools is due, in part, to small available supply. Foreign wools are in fair demand and
moving rather freely at sustained prices.
