Belief That Schooner's Men Found Graves at Sea.

## NO TRACE OFF COLUMBIA

Coasters Enter River Without Seeing Vestige of Small Boats, or Other Signs of Captain Wagner and His Seamen.

The fate of the crew of the schooner C. Klose remains as much of a mystery today as when the water-logged and abandoned vessel was sighted Friday. Shipping men generally believe that the crew attempted to escape from the schooner in small boats, and that the boats were swamped in the tremendous sea running.

The coasting steamers Rodondo and Cascade arrived last night, but neither had seen any trace of Captain Wagner and his men. Both vessels had received reports from the coast that the schooner was in the river, and that the crew had been sighted.

All coasting vessels have been notified to keep a sharp lookout for any small boats adrift, but the chances of the crew's rescue appear slight. The schooner, which it was hoped would find some trace of the missing men, is still bar-bound at Coos Bay.

The Agnes is owned by Charles Deland, of Vancouver, Wash., and last season was chartered as a tender to a Columbia River sailing ground.

During the month of July she brought a number of passengers from the sailing ground to Astoria, and a fine of \$500 was imposed for this, as the steamer's license as a tug did not permit her to carry passengers. An appeal was taken by the owner to the department in Washington without result, and the matter was referred to District Attorney to collect the fine. On the latter's report and recommendation the fine has been reduced.

## LUCAS IS ENJOINED

May Not Organize Baseball Team in Spokane.

## DECIDED IN SUPERIOR COURT

While Acting as President of Pacific Nationals He Used His Position to Do the League an Injury.

SPOKANE, Wash., March 27.—(Special.)—W. H. Lucas was today restrained by Judge Pindexter from organizing a baseball team in Spokane during the season of 1905 under protection of the National League. An injunction pendente lite was issued, but as the merits of the case were gone into on the hearing, the granting of the injunction virtually settles the case so far as the Superior Court is concerned. The injunction was secured by the Spokane Baseball Exhibition Company, Pacific National League.

The allegation was that Lucas, while serving as president of the Pacific National League, had used his position to have that league's contract with the National League for protection cancelled and to have the protection extended to a new league composed of clubs at Spokane, Bellingham, Vancouver, Victoria, Walla Walla, Penticton and Everett.

The contentions of the plaintiff was that Lucas, having secured this right from the National League while acting as plaintiff's agent, could not benefit from an act of hostility to his employers.

Has Someone Cured by Liquezone. Won't You Try It—Free?

## We Paid \$100,000

For the American rights to Liquezone and the rights in other countries have sold for proportionate sums. We mention this fact to indicate the value of Liquezone—the value to you. Price has never before paid such a price for any discovery used in the cure of sickness.

## What Liquezone Is.

Liquezone is a product which in the past two years has sprung into worldwide use in the treatment of germ diseases. It is now used by the sick of nine nations, by physicians and hospitals everywhere. It is constantly used in millions of homes in America.

The virtues of Liquezone are derived solely from gas, made in large part from the best oxygen producers. No drugs, no alcohol—nothing but this gas enters into it. The process of making takes 14 days, and requires immense apparatus. At the end of two weeks we get one cubic inch of Liquezone for each 1200 cubic inches of gas used. The attainment of this product has, for more than 20 years, been the constant subject of scientific and chemical research.

The main result is to get into a liquid

## How Liquezone Cures.

The greatest value of Liquezone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. For that reason, medicine is almost helpless in any germ disease.
