NEW YORK, April 3.—Although no official statement was made today, the news was confirmed that the Phoenix National Bank of this city will be operated by interests which have been affiliated with J. P. Morgan & Co.

Viewing the Campaign Impartially, It is Seen That Judge Dunne, the Democratic

candidate, stands first and above all for "immediate municipal ownership."

On the other hand, Harlan stands for municipal ownership "when the people have decided for it and it is practicable."

"Immediate municipal ownership" in Chicago is fundamentally impossible. The traction issue has been taken out of the campaign and thrown into the state courts.

Harlan proposes to end collusion of police with thugs, while Dunne talks of municipal ownership.

The Democrats are charging that this week Morgan and Wall Street sent to the aid of Harlan \$3,000,000 in cash.

One powerful influence in favor of Harlan is the knowledge that President Roosevelt has expressed a wish that he be elected.

Neither Harlan nor Dunne has the united support of his party. Once, when denied the nomination, Dunne preferred to be independent and scored the second highest vote.

Professional politicians—the class that makes up the party where spoils are to be distributed—touch in every place.

Commission Must Resume on Isthmus —Red Taps Out—Powers of Heads of the Departments Defined.

WASHINGTON, April 3.—The President has carried out his plan for the reorganization of the Isthmian Canal Commission as to the personnel and business methods, generally on the lines of the legislation he suggested to Congress at the last session, which failed in the crisis of business in the closing hours of today, within half an hour after the President's departure from Washington.

The change of headquarters and power from Washington to the Isthmus will doubtless require a radical change in the office of the commission in Washington.

Order of the President.

The President's action is indicated in the following reply: The White House, Washington, D. C., April 3, 1905.

Members of New Commission.

The personnel of the new commission is as follows: Theodore P. Shouta, chairman; Charles E. Magoon, Governor of the canal zone; John F. Wallace, chief engineer; Rear-Admiral M. T. Hindcott, United States Navy; Brigadier-General Peter C. Hains, United States Army (retired); Colonel Oswald M. Ernst, corps engineer, United States Army; Benjamin H. Harrod.

Duties of the Chairman.

For convenience of executing the work to be done there shall be constituted three executive departments.

Duties of the Governor.

The head of the second department shall be the Governor of the zone, with the duties and powers indicated in the executive order of May 9, 1904, which includes in general: 1. The administration and enforcement of law in the zone.

SUSPICION OF DYNAMITE

Mine Where Armed Guards Held Strikers at Bay for Two Years Becomes the Tomb of Thirty-Four Men.

ZEIGLER, Ill., April 3.—(Special)—Thirty-five miners were instantly killed and perhaps as many more injured, more or less seriously, some of them fatally, by an attack and mysterious explosion in the mine here at 7 o'clock this morning.

Although officials of the miners union insist that the explosion was due to accumulation of gas or accumulated dust, freighting causes for the disaster, there is a strong suspicion that there may have been another cause.

Double Explosion Wrecks Shaft and Kills Majority of Men.

BENTON, Ill., April 2.—Some 50 miners were entombed tonight in Joseph Leiter's mine at Zeigler by a terrific explosion of gas, and it is probable that 30 or 40 of the buried men are dead.

Rescuers Can't Penetrate Far.

These bodies were found 48 feet from the bottom of the air shaft and this is as far as the rescuers have been able to penetrate the shaft.

Letter of Secretary Taft.

War Department, Washington, March 30, 1905. Mr. President—In the matter of the reorganization of the Isthmian Canal Commission it is to be built, I beg first to call your attention to the extreme importance of fixing a definite plan with respect to which you may feel reasonably certain that it can be practically executed and will result in a navigable canal.
