MONEY DOES NOT RELAX

RESTRAINING INFLUENCE IN STOCK MARKET.

Expectation of Decision in Securities Case Affects Union Pacific, Erie and New York Central.

NEW YORK, April 3 -- An element in the no reason for any further restraint on an ac-tive demand for stocks, made its presence fell of the price movement and by the moderate, volume of the transactions. The artivity in the railroad list was concentrated in a few stocks. In the industrial department there

stocks. In the industrial department there was manifest a spirit of adventure which wandered freely through the list.

The first animation in the reliroad list was awakened by renewed consideration of the topic of the Northern Securities case. The report was circulated early in the day that the decision in this case was to be handed down on the reassembling of the court at noon after the Spring receas. Union Pacific sprang into prominence, as had been the case whenever this subject is actively discussed in the stock market. There was a renewed assumption that the final disposition of this case was the event awaited for the putiling into force of long-rumored projects of a Union Pacific and New York Central combination. In today's market large lurying of the Eric stocks was executed in such a way as to give the appearance of coming from the same source as the Union these in such a way as to give the appearance of coming from the same source as the Union Pacific and New York Central boying. The effect was a leap to the conclusion that Eris was to be included in the supposed combination. This first report from the Supreme Court after soon findicated a stay, witch might involve a further indefinite delay, and prices in the group had a sharp setback.

In the indestrial deservation of Sambara

In the industrial department the Souther iron stocks were again conspicuous in connec-tion with the merger report. The United States Steel Stocks were comparatively quiet. There were rumors of a dividend in National Biscutt and reports of a successful outcome of a vig-orous competition with a rival. The New York public utilities suffered from the immlences of a decision on the constitutionality of the

The mort important restraining influence was found in the money market. Conditions there did not relax so completely as had been hoped would occur after April 1. Sterling exchange also was well maintained, although exchange also was well maintained, atthough discounts dropped in London, where the aftereffects of the quartarly settlements are always felt very promptly. The weekly statement of the Imperial Bank of Germany showed the extent of the quarterly settlements by the huge changes in its principal items, eash on hand increasing \$22,360,000, while the other securities were increased \$85,00,000 and the note circulation was expanded \$83,145 feet. note disculation was expanded \$85,145,000. The immediate future of our money market is doubtiess dependent on the rapidity with the enormous requirements on foreign

additions continued highly encouraging. The or very few stocker.
