SAN FRANCISCO, April 6 .- (Staff Correspondence.)-Jimmy Whalen, the Seal twirler who shut out Chicago twice and Seattle once, gave the Portland Giants a coating of hencoop varnish this afternoon, and the score stood 3 to 0 when the curtain was rung down. Win French pitched seven innings,

but on account of a sore arm he had to give way to Ely Cates. The game by this time, however, was lost to the Webfooters, for the Seals had assessed French's lame delivery for a bunch of singles in the fourth and fifth innings, and they collected two runs.

Whalen never pitched in better form

in his life. He had speed and curves to burn. Not a Weblooter was able to get any nearer a run than first base, and the only man that got that far was Clark, who managed to poke one of "De Whale's" benders into safe ter-ritory in the closing chapter of the enent. Schlafley was the only other Northerner to get a safe hit off Whalen.

Team Supported Whalen.

Naturally in a game of this sort there was a world of sharp fielding. If Whalen had not received gilt-edge support he would have received a drubbing, for the ball was hit so hard that in nine times out of ten they would have been

all of these hard sineshes were cor-ralled by the sharpest kind of fielding on the part of the local team. Cates, who had not been wised up on the enforcement of the balk rule, was guilty of giving Hildebrand a base after he had reached first on a dinky htt. This balk was responsible for the third run. Aside from this Cates pitched a clever

For three innings he mowed the Seals down in one-two-three order. The run which was scored in the fourth was an umpire gift, for Spencer was caught at third by a town lot. The score: SAN FRANCISCO.

Exposition Games Sanctioned. Official sanction for the Lewis and

Clark athletics was received from Herbert Hauser, of the P. A. A. of the Amateur Athletic Union yesterday, and now the road is clear for the events to be held under proper authority. That these athletics are attracting wide attention is shown by the letters of inquiry received daily by Manager Kerrigan. INCREASE THE TAX ON BEER Answer to Movement for Import Duty on Coffee.

OPEGONIAN NEWS BUREAU, Wash ington, April 4.—In many quarters the suspicion exists that the United States Brewing Association is giving support to the movement to impose a duty on coffee, and several members of Con-gress stand ready to insist that, if such a duty is to be enacted, it shall be ac ied by an increase in the inter nal revenue tax on beer. They point out that the profit on beer is so great that, when the additional \$1 per barrel tax was imposed during the Spanish war, the price to retailers was scarcely affected, while to the consumer it remained the same. In other words, they say that when the tax was repealed it merely transferred \$30,000,-Treasury into the pockets of the brew-

The time has now come, they say to reduce customs duties and to have a general readjustment of the tariff and internal revenue laws, and in the shakeup to increase the tax on beer at least 50 cents a barrel, which will add \$15,-000,000 anually to our revenues.

There is more or less talk of in-creasing the tax on alcohol, but it is discouraged, as various Commissioners of Internal Revenue have stated that to increase this tax would decrease the consumption and incidentally the revenue. Besides, it would be resented by all manufacturers who use alcohol, who are trying to get the tax reduced from \$1.10 to 90 cents per gallon. On the other hand, when it comes to a question of taxation, beer has no friends except the brewers, and many are inclined to believe that an increase in the tax on it will meet with gen-eral approval.

DON'T RUSH TO MINIDOKA LAND Pumping Problem for Irrigation Has Not Been Solved.

OREGONIAN NEWS BUREAU, Washington, April 4-The attention of the director of the Geological Survey has been called to the fact that a misapprehension exists on the part of certain citizens of Idaho as to the plans of the Reciamation Service in regard to some important de-talls relating to the Minidoka project. This mismderstanding has arisen, it is believed, by reason of the effort of many settlers to anticipate the plans of the engineers and secure choice holdings of land. The Government from the first has warned intending settlers to go slow in making entries on the lands embraced in this project, and has called particular attention to the fact that the plans for urigation, especially those involving pumping plant, were merely tentative, and could not be worked out as quickly as those for the gravity system. While nothing has arisen to prevent the ultimate development of a pumping plant, so many delicate engineering features are involved that careful consideration must be given to these before any definite conclusions are reached or the final plans are ap-

Thus, apparently, while no reason exjets for believing that the pumping fea-tures of the Minidoka project will not ultimately be utilized, the engineers very wisely have decided to give this question more study and consideration before rec ommending it for construction,

Postoffice to Be Moved Before That Date-Repairs Almost Finished.

Before the last day of May the Treasury Department of the United States will have spent \$15,000 in furnishing the new quar-ters for the Postoffice, the Federal Courts and the offices of the clerks, Marshal and District Attorney and for fitting up the offices of the railway mail department on

Now that the wirk of reconstruction on the Federal building at Fifth and Morri-son streets is nearing its end, the department is beginning to hurry matters to a finish and will have the furnishings ready as fast as they can be put in place. Orders have been given to the custodian of the building in Portland to have plans made for the interior furnishings. bench in the courtroom, the chairs and settees throughout the different offices, the counters in the mail order, postoffice and railway mail service departments and the furnishings for the other Government offices will all be made to fit into the cooms where the articles are to be used. The interior of the building will be finished in oak and wasnut, much of which is now on hand in the old fixtures and furniture scattered throughout the building now used by the offices. All of the old material will be used that can be worked over, but the estimate of \$15.000 is exclusive of anything now on hand.

The orders for the furniture to be used in the Department of Justice have already been made, and the courtroom, the office of the clerks and the Marshal will be ready by the first week in May. Owing to a change in the stairways it will be necessary to hoist all of the furniture for these offices through the upper windows. After the Federal Court and the other divisions of the Department of Justice have been moved, the work of changing the confifer from its present loss on the postoffice from its present location at Sixth and Ankeny will be commenced. It was decided that the Postoffice Depart-ment should be moved after the courts, in order that there would not be the trouble in moving the furniture, as the crowds in the corridors would prevent work once the postoffice was in operation on the

It is expected and intended to have all of the departments in the new building by May 31. The new quarters will be of a ern construction and as convenient as is possible. Enunciators will be placed in every room, so that the different officials will be able to communicate with one another at any time.

A special effort is being made to get the building in shape in order that the land-fraud trials will not be postponed any longer than is necessary. Under ordinary circumstances the trials would have started about the latter part of April, but It was decided to wait until the move was made, in order that no interruption would be met with once the trials were called.

HITCH IN BONDHOLDERS' DEAL British Government Refuses to Touch Revenue of Venezuela.

LONDON, April 6.-A serious hitch in the agreement recently signed between British and German bondholders and the Venezuelan government threatens to render the scheme for the satisfaction of the former's claims unworkable.

A clause in the contract provides that the proportion of the revenues allocated to the bondholders shall be paid to the British Legation and Consular officials in Venezuela, but the British government refuses its consent. The bondholders are discussing an alternative arrangement, but considerable doubt exists that the contract will be carried out.

NEW YORK, April 6 .- Experiments carried out at the Governeur Hospital in this city, has resulted in the decision by the medical stag that there is no hope of establishing a cure for cerebro spinal meningitis by the diphtheris anti-toxin. In trials from January 20 to Jate, it was found that a death rate of the same percentage prevailed as last year, when the anti-toxin was not used. Meanwhile the

epidemic continues its spread.

Between Saturday noon and the same hour Wednesday, there were 47 deaths in Manhattan, against 46 in the four days of the previous week. Since Saturday noon there have been seven deaths in the Bronx, against four in the entire week previous.

In Brooklyn, the epidemic is on the decline, temporarily at least. There have been only ten deaths there since Saturday. Two deaths were reported Wednesday in Jersey City.
