Chicago Inquisitors Dive Into Eight Trunks Containing True Story of Big Six Packers'

eight mysterious trunks, unearthed by Government Secret Service men in the vaults of the National Safe Deposit Company, occupied the attention today of the Federal grand fury which is investigating the affairs of the beef trust. A subpens duces tecum for Daniel Peckham, secretary of the Safe Deposit Company, was issued by Judge Landis to force the company to produce the trunks in the The trunks were taken to the office of District Attorney Morrison, where, it is said, they were opened and their contents examined.

What the trunks contained and what connection they have with the case is not known, as the Government officials refuse to discuss the matter, declining to' either deny or confirm the explanation current that the trunks might belong to the packers.

"I do not know a thing about these trunks," said Mr. Peckham, after having been served with the subpens. "I was served with a subpens to deliver them to the Government officials at once, and of course, did so. I cannot say who deposited the trunks in the vaults here, because that would be violating confidence and not in keeping with our policy. All that I know is that I was served with a subpens by a Deputy Marshal and I did what I was commanded to do. All I can say is that a large, well-dressed man with s smooth-shaved face, on March 23, appeared at our place and deposited the trunks with us."

the action by which the trunks were seized after a witness, whose identity is carefully guarded, had startled the grand jurors with revelations as to the business methods of the packers. He is said to have testified that a double system of bookkeeping had been employed by certain packing firms, one set of books showing the secret relations of the alleged combine and being accessible only to trusted employes, and the other set showing figures to which the packers invited the attention of the Government experts who in-

vestigated for Commissioner Garfield. close the identity of the person or persons who stored the trunks with his company, he admitted that this was baif the entire civilized population the grand Jury began its investiga-

Suspicions have been entertained for a long time by the Federal officials connected with the investigation that the readiness with which the packing firms welpomed an examination of their books by the Government experts was not altogether genuine. The work of the Secret Service operators produced results, it is said, which tended to strengthen these suspicions, and, when a witness who testified more than a week ago let drop the hint that Commissioner Garfield's experts had not seen all the books of the packers, he was called upon to explain.
