and send me the bill. Why do work and worry and excess and strain and overinduigables break down consil-tuitions and makes men and women worn out and run down and restless and alcepiess and discouraged and morose? Because they weak-en the tiny, tender nerves on which life itself degends. Mot the nerves you ordinarily think about-ne the serves that govern your movements and your thought and day, keep your heart in motion-control the digestive apparatus-regu-late your thought and day, keep your heart in motion-control the digestive apparatus-regu-ter the automatic nerves that, unguided and waknown, night and day, keep your heart in motion-control the digestive apparatus-regu-late your liver-operate your kidney. These are the nerves that worry wears out and work breaks down. It does no good to treat the alling organ-the irregular heart-the disordered liver-the rebellious stomach-the destanged kidneys. They are rot to blame. But go back to the nerves that control them. There you will find the does no good to take stimulants and nar-offect which mercely postpones the final day of references. These motions new about this-mothing any

cotice, for theirs, at heat, is but a temporary effect which merely postpones the final day of reckoning. There is nothing new about this-nothing any physician would dispute. But it remained for Dr. Shoop to apply his knowledge-to put it to practical use. Dr. Shoop's Restorative is the result of a quarter century of endeavor along this very line.
