

ITS BEST GOOD

Samples of 1905 Wool Clip Are Coming In.

EASTERN OREGON SHEARING

Many Growers Still Selling the Product on the Sheep's Back. Prices Are Strong Here and in the East.

Sheep shearing is general now in Eastern Oregon. The few animals that have been received here show very good quality, as compared with former clips. It will be a full month before all the sheep are sheared east of the mountains, and two weeks before shearing begins in the Willamette Valley. There is still much contracting in all the sections. The sheep are generally in good condition, and the growers are holding their wool for the scheduled sales days. Prices are on a very firm basis, and it is the general opinion in the trade that if there is a change in values it will be in an upward direction. Dealers here are quoting Eastern Oregon wools at 10 1/2 to 11 cents and Valley at 10 1/2 to 11 cents.

The sales days as fixed for Eastern Oregon are as follows: Pendleton-May 22, June 13 and June 25; Heppner-May 22, June 3, June 20 and June 25.

In addition to the sales in various parts of the state recently reported by the Lakeview Herald, of April 13, says:

Bailey & Massingill during the past week made the largest wool purchase made in Lake County this year, making a total of 100,000 pounds of wool belonging to Scott & Adams. They are among the largest woolgrowers in this section, and while they reside in Modoc County their sheep are grazed in Lake and Malheur Counties, principally in Lake. There still remains in Lake County perhaps 100,000 pounds of wool that has not been sold, belonging principally to William Harvey and Philip Lynch.

The firm notes of the Eastern markets is shown by the following from the Boston Commercial Bulletin of April 15:

The situation has become stronger here, with a lively interest in foreign wools shown. Australian wools, and to a lesser extent South American, have been the feature of the week, with a movement of 8000 to 10,000 bales, mostly Australian, reported. A feeling in sympathy with the market is shown in the West is apparent to all. Operations continue in the Western sheep states with unabated vigor. Connections in Iowa, and the buyers are scrambling for wool and offering all kinds of prices. In Idaho, Utah, Wyoming and California prices are hardening. Several hundred thousand pounds of wool have been contracted in Idaho at 18 to 20 cents, and at least 600,000 pounds in Utah at 16 1/2 to 18 1/2 cents. In Wyoming the wool clip, amounting to 1,000,000 pounds, is being sold at 16 to 18 cents last year have brought as high as 22 cents this season. The farmers of Montana want 25 cents for their wool, but as buyers the present market is 18 to 20 cents. A little contracting has been done here lately. Texas eight months wool is now being short, with bids of 35 to 40 cents. In California are selling 20 to 22 cents. One lot of Utah wool amounting to 200,000 pounds brought 16 1/2 to 17 1/2 cents last year was sold at 16 1/2 to 17 1/2 cents in the West. In California wool is selling at 17 to 18 cents, and the rest of the clip is now on the way here. There is more doing in Oregon, but contracting in that state is slow. In California the practically all contracted, with the bulk of the clip sold around 20 to 22 cents.

There is nothing done in spot Oregon wool in the Boston market, as stocks are well cleared up. Prices will remain nominal until the arrival of the new clip. California wool is in demand, and a few small lots of scoured which are held on a basis of 20 to 22 cents.

Montana Wool Sold in Advance. BUTTE, Mont., April 20.—A Lewiston (Mont.) dispatch says woolmen there say that almost the entire clip will be contracted before the market opens. The contractors have secured the state, and while the clip will be unusually large, it is thought less than 30 per cent will be left when the regular time for public sales arrives. The average price being paid in the neighborhood of 20 cents.

Washington Crop Report. The Washington weekly crop bulletin says in part: The weather was very favorable for Spring work, such as plowing, sowing, etc., and planting. It was not unfavorable for the growth of grain and grass, although the cool nights have made growth somewhat slow. Winter wheat is coming in slowly, and the present condition is very satisfactory. Considerable early sown spring wheat has come up, and only a few days more will be needed for it to be ready for cutting. Spring wheat sowing is nearly completed, in all except late localities. Barley and oat sowing is also well advanced, except in some of the lowlands of Skagit County, where it is not half done yet. Farmers are not very active in planting potatoes, but those who have planted are getting on well. Early potatoes are not growing rapidly. Early gardens are in a satisfactory stage of progress.

Vegetables, Fruit, Etc. The steamer product received yesterday was good condition, and the market is strong. Among the day's receipts was a lot of Australian grapes packed by the Department of Agriculture at Portland. They were of high quality and were quoted at 25 to 30 cents per bushel. Strawberries were more plentiful and were lower. They will be decidedly cheap Saturday. Cabbage is higher, being quoted at 1 1/2 for San Francisco and 1 1/4 for Los Angeles, which is coming up under load. A car of new early York cabbage and new cauliflower arrived last night, and will be offered today, the former at 1 1/2, the latter at 2 1/2 per crate.

STOCKS SLEW AWAY

MANY FACTORS WEAKEN NEW YORK MARKET.

Northern Securities Situation Leading One—Effect of International Politics on Speculation.

NEW YORK, April 20.—The cloud of suspicion and distrust which has been gathering over the stock market during the whole of the week broke today with some violence. The decline was contained in the early stages, but gathered force as it was extended. The quick exhaustion of the buying demand on the occasional rallies was a sufficient evidence to the professional trader that the speculative position was still unfavorable. They returned to the attack, and on each successive rally and again, and on each successive rally the weight of the offerings disclosed was greater. The market proved to be honeycombed with stop-loss orders, which have been greatly increased as the confidence in the stability of the market was impaired. The amount of the decline was sufficient to wipe out some of the margins of the more substantial classes, and in all classes of speculative holdings to impair the margin for speculators with stop-loss orders, which have been greatly increased as the confidence in the stability of the market was impaired. The amount of the decline was sufficient to wipe out some of the margins of the more substantial classes, and in all classes of speculative holdings to impair the margin for speculators with stop-loss orders, which have been greatly increased as the confidence in the stability of the market was impaired.

Butter, Eggs, Poultry, Etc. Liberal quantities of butter are now being stored and this is helping the market somewhat. The butter is of good quality, and the market is strong. Eggs are strong under a good Easter demand, which will not last beyond today. Poultry receipts were fairly good yesterday, but cleaned up at top prices.
