Doctor Brigham Says

MANY PHYSICIANS PRESCRIBE Lydia E. Pinkham's Vegetable Compound

The wonderful power of Lydia E. Pinkham's Vegetable Compound over the diseases of womanhood is not because it is a stimulant, not because it is a palliative, but simply because it is the most wonderful tonic and reconstructor ever discovered to act directly upon the generative organs, positively curing disease and restoring health and vigor.

Marvelous cures are reported from all parts of the country by women who have been cured, trained nurses who have recognized the virtue of Lydia E. Pinkham's Vegetable Compound, and are fair enough to give credit where it is due.

If physicians dared to be frank and open, hundreds of them would acknowledge that they constantly prescribe Lydia E. Pinkham's Vegetable Compound in severe cases of female illness, as they know by experience it can be relied upon to effect a cure. The following letter proves it.

Dr. S. C. Brigham, of 4 Brigham Park, Fitchburg, Mass., writes: "It gives me great pleasure to say that I have found Lydia E. Pinkham's Vegetable Compound very efficacious, and often prescribe it in my practice for female difficulties."

"My oldest daughter found it very beneficial for uterine trouble some time ago, and my youngest daughter is now taking it for female weakness, and is surely gaining in health and strength."

"I freely advocate it as a most reliable specific in all diseases to which women are subject, and give it honest endorsement."

Women who are troubled with painful or irregular menstruation, bloating (or flatulence), leucorrhoea, falling, inflammation or ulceration of the uterus, ovarian troubles, that bearing-down feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, at Lynn, Mass., for further free advice. No living person has had the benefit of a wider experience in treating female ills. She has guided thousands to health. Every suffering woman should ask for and follow her advice if she wants to be strong and well.

of the considerations mentioned in the two deeds were only nominal, that to Assignee George D. Beatty, being \$1 and that to the old company, being \$1.

There is much behind this transaction as far as the Cornucopia mines are concerned, and much in it of interest to the creditors of the Sealer's estate. The sale of the Eastern property has reduced the H. H. Rogers estate against the Sealer's estate to \$1,000, but if this arrangement goes through he will again be in the saddle. Pierre Humbert, the promoter, developed \$20,000 to pay off certain claims against the mine, but under this new scheme he is to have \$15,000 worth of the stock from the trust company to pay him for this little accommodation and some other things he promised. The "tiger in the fence" is that Rogers is suspected of having advanced the \$20,000. The other \$15,000 worth of stock is all that is proposed to have the Sealer's creditors get out of this valuable property. Seen in the claims will gather in the New York courts, and the fight will get warm again.

EXPOSURE CAUSES DELIRIUM

Young Man, Thrown From Moving Train, Lies Out All Night.

WARDNER, Idaho, April 27.—(Special.)—With his mind deranged from a night of exposure and hunger while suffering from a sprain of both ankles, a young man was brought to town today by R. L. Brainerd, who found the sufferer beside the road a few miles out.

Judging from the man's incoherent talk his name is Butz, and he was riding in a taxicab in Wardner when he was ejected by a brakeman. In the fall both ankles were sprained. Suffering intense agony the victim crawled from the railroad to the county road and lay there all night.

When found by Brainerd this morning young Butz was delirious with fever and hunger and exposure had made his body almost stiff. While his rescuer went for assistance Butz crawled to the river and drank of the water which is poisoned by being used at the mine concentrators. To-night the young man is in a serious condition, almost comatose, and is a danger to his life and all his delirium turns toward feasting. Evidently he had eaten nothing for some time before being thrown from the train.
