RIFLES TO FIGHT CHICAGO MOBS

Rioting on Streets Grows More Vicious and Many Nonunion Meu Are Injured-Strikebreakers Pour Into City.

CHICAGO, May 1.-Conditions in the teamsters' strike were worse today than at any preceding time. The strikers were in a more ugly mood, the rioting was more open and vicious and the attacks on nonunion men were more frequent and daring than at any time since the commencement of the trouble.

The chief cause for the increased belligerency on the part of the strikers and their friends is the fact that the Em-Teaming , Association today brought 1500 men into the city to take their places and 500 more are said to be now on the way and will arrive within twelve hours. These men will receive the full pay of union men and it has been guaranteed to them that their positions will be permanent. Among them are 200 farmer boys from the surrounding states who have volunteered their services and sought positions as drivers.

Tomorrow Winchester rifles will be carried on all wagons of the Employers' Teaming Association in open view. number of non-union men have been ar-rested on the charge of carrying concealed weapons and today the attorneys for the Employers' Teaming Association called upon Chief of Police O'Neil and asked if their men had not the right to carry weapons, provided they were held in open view and were not concealed. Chief O'Nell replied that there was no law against it and arrangements were omptly made by the employers to place Winchester rifles on every one of the

Mayor Wants No Arms Carried.

When Mayor Dunne was informed of the fact that rifles would be carried by the nonunion men, he was visibly disturbed and declared that the police will not be permitted to authorize the carrying of arms by anyone, whether in the employ of the Employers' Teaming Association or affiliated with the strikers. "The chief of police will give no authority to anyone to carry arms," he

that Mayor Dunne was about to force an adjustment, but he declared tonight that it was incorrect.

Four men were seriously hurt during the fights today, but the number actually intured is greatly in excess of this and it impossible to state it accurately for the reason that many of those burt disappear in the crowd or are carried away their friends as soon as they are injured. Small Increase in Strike.

It is not expected any of the injured will die. No great increase of the men on strike was made today, the most important accession to the teamsters being the drivers of the delivery wagons of retail grocery stores. These declared that they would in no case call for goods at any wholesale establishment where a strike existed. As teamsters are on strike at practically all wholesale groceries in the city, the apparently visible supply of food for the citizens of Chicago is limited to the stocks now held in the retail grocery stores. The retail drivers also declared that they would refuse to handle

meat if any strike occurred in the stock

The Employers' Association this after noon drove home a wedge into the ranks of the Chicago Team-Owners' Association. This latter organization is composed of men who do toaming for many of the houses, particularly in hauling coal. They have fought shy so far of aiding the employers to the extent of making deliveries on their contracts, going to the leagth of asking employers refrain from requiring them to haul merchandise and asserting that, if their men were stopped while on the streets there was nothing for them to do but to return to the barn. The employers this afternoon informed the team-owners that they must make deliveries at once and continue to make them from this time The team-owners agreed to make deliveries as demanded

day at Jackson boulevard and Franklin street, near the headquarters of the Em-ployers' Teaming Company, the organization formed to suppliant the striking teamsters. John Williams, a colored non-unicnist driver, was sitting on one of the wagous of the Employers Company wait-ing for caravans to be formed. A crowd of several hundred persons had gathered and was jeering Williams and other non-unionists. Suddenly a bottle, thrown from a window, struck Williams on the lead. The negro drew a revolver and fired toward the window. The action of the colored man angered the crowd, and a concerted rush was made toward him. Williams jumped from his wagon and fied down the street. The mob soon caught him and he was being savagely beaten when the police rescued him. Williams

Prices of Produce Rise

The strike presents a serious outlook for produce dealers. Today they were almost unable to get supplies, as teamsters refused to haul express company goods, and if forced to do so ould quit. Prices for fruit, vegetables, poultry, butter, eggs and similar articles showed a tendency to advance While five coal wagons from the Daniels Coal Company were being unloaded in the rear of the Union League Club today, missiles were thrown at the nenunion teamsters, when one of the detectives guarding the wagons fired several shots in the air. It was further announced that union teams would be supplied to any "fair" house whose team companies had sold out to the new teaming company. Practically the first victory of the strikers came from Fuller & Puller's wholesale drug house. Manager Peters announced that his firm had employed

NO NEW RESERVES EYEGLASS

Heyburn Opposes Forestry Policy in Idaho.

THRIVING TOWNS INCLUDED

He Accuses Men Who Made Examinations of Ignorance of Conditions-Carries His Pro-

test to President.

OREGONIAN NEWS BUREAU, Wash ington. April 30.—Senator Heyburn baving another round with the For having another round with the For-stry Burean because of the intention of the Government to create half a dozen new forest reserves in idaho. Mr. Heyburn is one of the most active opponents of the existing forestry pol-icy of the Administration. Like many other Western Senators, he believes the West is getting too much scienthe West is getting too much scien-tific forestry; he thinks the thing has been carried far enough, and wants to call a halt, in his own state at least.

There are now in existenc a number

of temporary withdrawals in Idahe, embracing several million acres of land, which will ultimately be permanently reserved, unless present plans miscarry. Mr. Heyburn wants most of these lands restored to entry, and in a letter to Land Commissioner Richards sets forth his reasons. Hils letter is selfexplanatory, and is as follows: I desire to enter a protest against the pro-posed reservations as follows:

Henry's Lake Reserve. Against all that part of the Henry's Lake Reservation obvering Beaver and Spencer sta-tions and the adjacent country, and to all that part lying south of the standard parallel and extending custward into the Yellowstone National Furk.

the growing towns along the railroads should not be included within a reservation. The the reservation south of the standard paralle and extending to the Nettonal Park amounts shuply to an enlargement of the Yellowstone Park, in Idaho, without carrying with it the privileges of the park, and practically shuts off catry from idaho into the National Park over its own barder. Much of the lands included within this proposed reserve are not timber lands at all and power will be. An examination the results of the proposed reserve are not timber lands at all and power will be.

Sawtooth Reserve Addition,

he stopped by the creation of a forest reserve over it. That it also includes the town of Atlanta, which is one of the oldest towns in the state and in which millions of dollars are invested in mining and kindred enterprises, which, after a long period of stagmation incident to the financial reverses of a rw years ago, have just started on a ne growth with renewed energy. That it also includes Rocky Bar, notwithstanding that a parrow strip has been condited along the road from Mountainhouse into that town. This is one of the oldest towns and sections in the state, and the estiments and sections in the state, and the estiments are spreading every year in every direction from this center. It also includes the new astifements of Edna and Sawtooth, and crowds close down to Pioneerville, one of the oldest mining towns in the Boise Basin.

A timber reserve might be safely created A timber reserve might be safely created running along the watershed to the northeast of flanner. The towns I have resultanced have schools, churches, homes and permanent settlements, which would be rendered comparatively useless by the creation of such reserve. This reserve should be confined to the mountains above the settlements and towns. It also includes Twin Springs, which is at the head of the Boise Valley and near Boise Basin.

Payette Addition.

With reference to the Payette Addition. objections are based upon the fact that it includes a vast quantity of land upon which there is no timber. It also includes the town of Warren, a settlement since 1862, round and about which are some of the best mines in the State of Idaho. This reserve has evidently been selected without any personal knowledge on the part of the selector of the conditions upon the ground in this section. It covers a considerable portion of the state wagon road constructed by the state to enable extiters to get into this. ettlers to get into this very country. country from the north by a barrier which imounts to a prohibition against those who incounts to a prohibition against those who iterize to operate these mines from that direction, and they are easier of access from the torth than from anywhere else. The reservation covers a large amount of the mining country now being taken up and settled about and adjacent to the Thunder Mountain district. To withdraw it is to paralyze the rapid growth now going on in that section of the country.

I believe the proposed reserve covers the Thunder Mountain mining district and the lown of Recessery, which is own of Rocsevelt, which is one of the r rapidly growing and prosperous new places in idaho. There are several thousand people in that section of the state who went there with the intention of staying, provided they could have the rights of settlers in other sections of the country without being supervised.

As to the addition to the Bitter Root reserve, which includes the towns of Newsome and Florence, there is absolutely nothing to be said in favor of it. Like the Bitter Root forest reserve, it is at the head of streams flowing into regions where irrigation is not needed, and where the complaint is "too much water" rather than not enough. The town of Florence, which was settled in 1802, and which, with its immediate surroundings has produced over \$100.000,000 in gold, is still a flourishing and producing sountry, and is built up with schools churches, public institutious and homes. A statement of those facts should, in itself, be sufficient to make the consideration of the creation of a forest reserve impossible.

reserve impossible.

I have already discussed the town of Newscome in a former protest; it is a growing and prospecius lows on the stars wagon road. The country lying between these two points com-
