

HOPS ARE FIRMER

Buyers Are Beginning to Show More Anxiety.

ARE OFFERING 25 CENTS

Unable to Fill Eastern Orders—Oregon Sell at Advance in New York—Crop Prospects in This State.

HOPS—Local market firm; dealers anxious to buy, but holders refuse to sell; Oregon higher in New York.

WHEAT—Firm with heavy California movement; club, \$2.80; green, \$2.85.

OATS—Firm; white feed, \$2.25; gray, \$2.20.

BARLEY—Dull; feed, \$2.25.

BUTTER—Speculative buying causes more steadiness; city creamery, 20c; state creamery, 17 1/2c.

POULTRY—Chickens, weak at 14c; other kinds steady to firm.

EGGS—Supply large, demand slow and market weak at 17 1/2c.

MEATS—Veal weak, pork firm, mutton and beef steady.

FRUIT—Firm; Mt. Taber berries received.

More pressure to buy hops is shown by dealers, but their search for goods is unavailing.

A number of orders were on hand yesterday at 24 1/2c, but could not be filled.

Buyers representing local dealers were counting on country, and reported everything tied up.

Growers out as well as inside the combine are holding out in the market.

The market at the moment is in sellers' favor, and if present conditions last, an advance in price is inevitable.

It is the first time in several weeks that dealers have shown any anxiety to purchase, and holders are quick to take advantage of this fact.

Advices from New York are to the effect that 90 cents for hops is being sold.

There at 27 cents, which would put the market here about on a 20-cent basis.

A short time ago buyers were only offering 25 cents here.

Much talk is heard of unsatisfactory progress in the hops, but it is early yet to say anything definite about crop prospects.

While the vines are growing, there will be plenty of time for growers to get in.

In favored localities the hops have reached the tops of the vines, but in other places are just coming out of the ground.

This condition is not regarded as alarming. It is to be expected that reports and estimates at this time of year would vary according to the interests of the parties concerned, growers predicting a small crop, the buyers a large one.

One thing seems certain, however, and that is that Oregon will this season produce the largest crop in its history.

The estimate of a harvest double of a crop of 1904 is regarded as excessive, while the opinion of the producers of a 50,000-bale yield is probably the small.

It is probable that the small crop of hops here will be an output of from 100,000 to 110,000 bales.

BUTTER IS STEADY.

Storage Baring Alone Improves the Market.

Front Street Cleaned Up.

The butter market, while much steadier, can scarcely be described as firm.

The improvement is the result of speculative buying, which will continue only as long as prices are not advanced.

Front street is kept cleaned up every day, and it is probable that the price of butter will be advanced.

It is probable that the price of butter will be advanced.

LIQUIDATION IS RENEWED

HEAVY SELLING OF STOCKS AGAIN BREAKS MARKET.

Closing Out of Large and Important Accounts—Northwestern Railroads Are Discussed.

NEW YORK, May 4.—Liquidation was renewed on a very large scale in today's stock market, and very few stocks presented themselves to absorb the large offerings. So much was obvious from the volume of the dealings and the movement of prices. As to the sources of this liquidation and the motive for it, the indications were not clear, and the elements of mystery were made the most of in the active conjectures of stock market operators, according to the habit of that class. It was a fair inference that the liquidation was of a concentrated character, and represented the closing out of some large and important accounts held by a few individuals, presumably able of power and resources in the financial world.

The fact of liquidation of this character taking place was of decisive effect on sentiment. It was supposed that very large holders, who had been withholding from the market during the demonstration of Saturday and Monday were now being pressed for sale to take advantage of the revived strength of prices. This very evident liquidation disappeared, however, when the market began to settle down, and the heavy selling was not to be looked for was a dull and sluggish market.

In the general situation it still appeared in a large degree, but the renewed weakness in stocks today caused some queries of possible developments in the financial world, and the general situation.
