Twenty-Five Men Entombed by Cave-In in Colorado.

DIGGING DOWN TO RESCUE

Believed to Be Alive. Shaft Is Being Sunk to Them—First Disaster on Gunnison Irrigation Work.

MONTROUSE, Colo., May 30.—One hundred men, toiling like demons, are to-night digging a shaft to pierce the Gunnison irrigation canal tunnel at a spot under Cedar Creek, where 25 of their fellow-workmen are entombed in momentary danger of death through suffocation.

The men in the tunnel were replacing rotten timbers 200 feet from the western entrance when the cave-in occurred. This portion of the tunnel is under the creek. Rescuers immediately started to dig them out. After several hours' toil it was found to be impossible to reach the imprisoned men in this way, as the water and mud seeped into the tunnel faster than it could be removed.

When asked last night relative to his views on the causes that contributed to the sweeping victory of Admiral Rojestvensky, General Anderson was at first disinclined to discuss the subject, modestly contending that his knowledge of naval affairs was very limited.

Engineer McConnell, a United States engineer in charge of the works, states that he hopes to reach the imprisoned men in time to save their lives.

MIGHT SUGGEST ARMISTICE

WASHINGTON, May 30.—(Special.)—Diplomatic Washington declares that talk of peace between Russia and Japan is premature at this time. It points out the fact that Russia has not yet received official advice as to the outcome of the naval battle, and that the czar and his counselors are so dazed, in view of the disaster that has befallen them, that the formulation of plans looking to a cessation of hostilities is out of the question.

Every foreign ambassador and minister, excepting Count Cassini, and including Minister Takahira, is favorably to peace. Some of them have unofficially conveyed their belief to the president. Just what the latter is doing is at present only known to the Russian and Japanese governments.

ROJESTVENSKY IS TAKEN PRISONER

Staked All on One Battle.

NEW YORK, May 30.—Rear-Admiral C. H. Davis, of the United States Navy, was in this city today to meet his wife and daughter, who arrived on the Zealand. Speaking of the Russian naval defeat, the Rear-Admiral said: "If the cables are true that there has been no relative Japanese loss in the battle in the Korean Straits, Russia will be in a position where she must make peace. I consider Admiral Rojestvensky's action in forcing the Korean Straits, a very daring and hazardous undertaking, for it placed him in Togo's hands. My opinion was, and this opinion was shared by other naval officers including Captain Mahan, that there would be no engagement and that the Russians would be allowed to get to Vladivostok. I did not think the Japanese would risk an engagement on which depended their all."

WHY RUSSIANS WERE BEATEN

Ran Into Trap and Can't Shoot Straight, Says General Anderson. When asked last night relative to his views on the causes that contributed to the sweeping victory of Admiral Rojestvensky, General Anderson was at first disinclined to discuss the subject, modestly contending that his knowledge of naval affairs was very limited.

Contention of Washington Food Commission is Upheld. OLYMPIA, Wash., May 30.—(Special.)—The Attorney-General has decided that the Food Commission is right in its contention of the pure food law that takes effect June 9, and that all food packages must have printed or stenciled on the outside the names of the ingredients, or component parts of the contents. The ruling will be far-reaching in its effect on manufacturers who in nearly every instance object to publishing the formula of their products. It is possible that if the court upholds this construction of the law some manufacturers will withdraw their products from the market in this state.
