the adoption of the partially free elective system. That change was made as a result of the firm growth of state high schools, thus making it possible for the university not only to abolish the preparatory department, but also to place the atudent upon his own responsibility in choosing a course of study.

Aside from the change in the university requirements of scholarship, many improvements have been made about the campus. Elaborate equipment has been installed in the various departments and the general perspective of the university has been beautified by the construction of new, roadways and the tearing away of old fences and buildings. It has been a year of growth.

"Yes," said Mr. Watkins to a reporter "it is true that I have been cured of ataxia by Dr. Williams' Pink Pills." "Are you sure you had locomotor atazis?"

"The doctors themselves told me so Besides I recognized the symptoms." "What were they?"

"Well, the first indications were a stiffness about the knee joints that came on about four years ago. A few months after that appeared, my walk got to be uncertain, shaky-like. I lost confidence in my power to control the movements of my legs. Once, when I was in the cellar, I started to pick up two scuttles of coal, and my legs gave way suddenly. and I tumbled all in a heap in a basket. I couldn't close my eyes and keep my balance to save my life. Then I had fearful pains over my whole body and I lost control over my kidneys and my bowels."

" How about your general health?" " Sometimes I was so weak that I had to keep my bed and my weight fell off twenty pounds. Things looked pretty bad for me until I ran across a young man who had been cured by Dr. Williams' Pink Pills and who advised me to

try them. "Did these pills help you rightaway?" "I didn't see much improvement until I had used six boxes. The first benefit I noticed was a better circulation and a picking up in strength and weight. I gradually got confidence in my ability to direct the movements of my legs, and in the course of seven or eight months all the troubles had disappeared."

"Do you regard yourself as entirely well now?

"I do the work of a well man at any rate. I can close my eyes and stand up all right and move about the same as other men. The pains are all gone excent an occasional twitch in the calves of my legs.
