last week caused some damage, as considerable hay had been cut, and was lying en the fields at the time. Quite a large quantity of hay that was cut in Washington was also damaged by the rain, and some of it completely destroyed. This was particularly true or alfalfa in the eastern countles. Harvesting of the first erop of alfalfa is still in progress in Idaho, and reports indicate that an

average crop is being saved in good condition While the hay market has succeeded in holding its own up to the time that the new crop is coming on, the same is not true of the oats and barley markets. Both are depressed by liberal offerings of new-crop grain from California, and some sharp declines have been made in prices in the past week.

## NOT ENOUGH FRUIT RECEIVED,

Front Street Is Bare of Many Needed Varieties.

lessie fruit doulers have more difficulty now in getting supplies than in disposing of them. The market was entirely bare of some lines yesterday, and no variety was in oversupply. The greatest scarcity was in peaches, plums, apricots and such varieties of tree There was a shipment of 50 crater f yellow peaches, but they did not go far. Lemons and oranges were also very scarce A lot of green Hartlett pears brought up some time ago are ripening now, and sell well at \$2.50 a box. Herries brought good prices in the forencon, but those not sold early wilted in the afternoon and were sacri-

More Eastern Eggs Coming

Eggs continued firm yesterday with sales reported at 20, 20% and 21 cents. The demand was heavy, Oregon receipts were only fairly good and Eastern stocks were about exhausted, which led to the strength of the market. However, two cars of Eastern eggs till be on hand today which will check any tendency toward an advance, and probably sold the market steady for a few days.

Commission houses also bought freely. As trading progreated, the demand became more urgent and the market developed additional etrength. The increased aggressiveness of buyers was due chiefly to a report made by a St. Louis trade journal, claiming that recent rains in the Southwest had delayed threshing over a large area, and that, in many sections, as a result of wet weather wheat had appouted in the shocks. The demand was further angmented by fresh reports from the Northwest, telling of damage by black rust. In Septem-ber the highest point of the day was reached at 885gc. Union Pacific was subjected to profit-taking sales and was thus held in check in spite of the good returns of net carnings for May made by the Harriman Pacifics. To offset the profit-taking, there was some diversion of professional support to other quarters of the market, and this gave the market an appearance of somewhat greater breadth than that of yesterday. Some of the low-priced nondividend paying railroad stocks were brought into activity. Pennsylvania and Erics were both

strong. There was little news bearing on values or on the movement of prices.

The report of the week's currency movement did not indicate important change in the cash item of the banks and not much attention was paid to it. An interesting development was the large increase in the development was the large increase in the dimend for time loans. This was declared overations there. The tone of the prospective steady, but there was no important change in the rates. The wheat market reflected some anality over the wet weather reported from the crop regions, but the stock market was

NEW YORK, July 7 .- Today's transactions in stocks yielded no larger total of sales than yesterday. Reading and Union Pacific still held a conspicuous place in the trading. Read-ing extended its record price, as it has each day for some time past, and there seemed no limit to the speculative confidence of those who have advanced the stock. It is suspected that the ventures on the short side of those who do not share the confidence in the present price of the stock on a 4 per cent dividend basis have served to further the campaign of those who are builing the price. Many ru-mors are current of the large outstanding short interest which is driven to cover by the persistent rise in the stock.

tion of a holiday except that warm weather gave impetus to the distribution of seasonable wearing apparel, sporting goods and outing Widely varying reports are received regarding the crop situation, prices rising higher than would be the case if manipulation were less vigorous and exports are adversely affected. Several threatened labor controversies have been averted by agreement upon wags scales for another year and building operations are

unusually brisk for the season.

Inventories show a good volume of business for the first six months of the year, and still greater netivity is expected in the last half, Railway earnings in June were 6.5 per cm Hallway earnings in June were 6.5 per cent larger than lass year's, but foreign commerce at this port for the last week shows a loss of \$4167 in exports and a decrease of \$4167 in exports as compared with 1804. Increased as vity is noted in the hide market. The demand emanates chiefly from one prominent interest and is confined mainly to native steers. Foreign hides are duil. Salesmen have returned from Western trips, buying liberal orders for Spring shoes, and buyers in the Boston market are operating freely on

last year. Failures in Canada number 21, against 16 last week and 12 last year. LABOR IS WELL EMPLOYED.

Failures for this week in the United States are 160, against 250 last week, 195 in the preceding week and 206 the corresponding week
