President Gives Pledge to Labor Leaders.

EXPLAINS CHINESE ORDER

Tells Gompers How He Stands and What Diplomats Must Observe. Eight-Hour Law Must Rule Government Work,

OYSTER BAY, July 12.-Immigration to the United States and its relation to the well to accept these manifest facts and labor problem formed the subject of a concept these manifest facts and consider the value which British concepts this afternoon between the President and two of the Important leaders of organized labor-Samuel Gompers, of Washington, and James Duncan, of Quincy, Mass., respectively the president and one of the vice-presidents of the American Federation of Labor.

The conference was devoted particularly to a consideration of the order recently issued by the President regarding the en-forcement of the Chinese exclusion law. An impression has been gained by many members of labor organizations that the order, to an extent, at least, let down immigration hars, so far as Chinese are concerned. The President assured his callers, however, that no such construction properly could be placed on the order, and that he was just as vigorously op-posed to the admission to this country of Chinese coolies as they could be.

Mr. Gompers urged upon the President the desirability of an intelligent, practical and rumane consideration of the general question of immigration by the people and by Congress. The people of this country and of the whole civilized world are tion of the problem.

Mr. Gompers said, after the conference: Will Not Let Down Bars to Coolies.

We directed the President's attention to the interpretation placed by some persons on his recent order, issued at the lastance of the American Aslatic Association, concerning the admission to the United States of Chinese. By many of our people and by many Chinese that order was looked upon as a letting down of the immigration bars, so far as the Chinese are concerned. The President assured us that no proper reading of the order would warrant such an interpretation and that nothing was further from the tion and that nothing was further from the intension than that such an impression should be gotten from the order. His determination is that both skilled and unskilled Chinese is-States, and he says the law will be rigidly

States, and he says the law will be rigidly enforced.

His order related only to the so-called exempt classes—merchants, students, travelves and the like—who heretofors have had difficulty in gaining admission to this country because of the many fraudulent certificates is used to them and to coolies who are not entitled to certificates in any event. We went over the entire matter thoroughly, the conference being perfectly satisfactory to us.

The President suggested that in the course of five ar six months we again bring the matter to his attention in the light of the experience of that length of time in working under the order.

The President says he is determined that the diplomatic sand consular representatives of the United States in Chinas shall perform their duties thoroughly and impartially and that the law as to the issuance of certificates to members of the exempt Chinese classes shall be compiled with absolutely. He added that any officer of the Alnited States who issued a false certificate would lose his official head the instant his misconduct was discovered.

also discussed with the President the on government work. We instanced violations of the law and requested him to consider them. He asked us to present the Tacks in a formal document, he refusing to take up the subject at once. Meantime he expressed himself as being in entire sympathy with the law and insisted that it must be observed. We pointed out to him that officers of the war department under whose direction much Government work is done were not inclined to insist upon an observance of the law, and many of them had declined to regard it as their duty to being suit to compel his enfercement. The President agreed with us that the Government officers ought to see to it that the eight-hour law was obeyed. eyed. s Our talk with the President was most sof-

Postmaster Enjoined From Holding Up Mail for Lewis' Bank.

ST. LOUIS, July 12 .- A temporary restraining order was issued today by Judge Smith McPherson, of Iowa, sitting in the United States District Court, against Postmaster Frank Wyman, requiring him to discontinue stamping the mail of the People's United States Bank and E. G. Lewis as fraudulent and returning it to the sender. In the meantime mail will not be delivered to the bank or to Lewis, but will be held at the St. Louis post-

office pending final action.

The petition for the restraining order complained of the treatment accorded the bank and E. G. Lewis by the postal au-thorities at Washington, and asserted that the bank could produce abundant proof that it was sound and solvent. It was contended that the fraud order was issued without a hearing before the At-

torney-General in person.

It stated the belief that there was now over \$5000 in the accumulated mails directed to the bank, which would not be delivered, and it was argued that the right to receive mail was a constitutional one, and that the affiants had been deprived of this right without due process of law or trial by jury, and that the fraud order declares them guilty of a crime without a legal trial.

Receiver S. P. Spencer, for the bank stated today that he has little idea of the length of time that the receivership

was received by express and through other channels while hundreds of letters are held at the postoffice.

PARIS, July 12.-Former Foreign Min ister Delcasse, in the course of an in-terview published by the Gaulois today upon the British and French naval ame-nities at Brest, was induced to discuss

his general policy relative to Great Brit-ain and Germany. He said: "The policy of nations nowadays is not based on sentiment or antipathy, but upon their material interests. As between Germany and Great Britain, our commercial balance shows where our inter-ests lie. Great Britain is our best purchaser, while Germany buys almost nothing of us and tries to sell us all she can. Moreover, it is evident that we could not leave open irritating controversies with Great Britain which might pre-cipitate an armed struggle, for Great Britain holds indisputably the empire of seas. For every warship we build builds four or five. It is thus far tualities. The greatest intrinsic value of such co-operation would be the virtual im-possibility in which it would place Ger-

attering and bettering our plans, so as to make it impossible that that particular cheek shall hangen again.

What is being done in Panama is but a sample of the things that this country has done during the last few years, of the things in which your profession has borne so prominent a part. Take what we did in Cubal where we tried the experiment which had not been tried for \$60 years, of desailing the cities. One of the most important items of the work done by our Government in Cubal is the work of hygiene, the work of deaning and disinfecting the cities so as to minimize the chance for yellow fever, so as to do away with as many as possible of the conditions that told for direase. This country has never done better work, work that reflected more bottor upon the country or for humanity at large, than the work done in Cuba.

And the man who above all others will be responsible for Joing that work so well was a member of your profession. When the call to atms came he himself went as a widler to the field, the present Major-General Wood. Leonard Wood its in tubar fust the kind of work that, for instance, Lord Cromer has done in Expt. We have not been able to reward Wood in anything like the proportion that services such as his would have been no meaner and more unpleasant manifestation in all our public history than the feelings of envy and jeklousy manifested toward Wood. And the foul assaults and attacks made upon him, gentlemen, were largely because they grudged the fart that this admirable military officer should have been a doctor.

DIE IN A SUNKEN YACHT

Guests Try to Climb Through the Portholes. NEW YORK, July 12.-Three lives were

lost by the sinking of the steam yacht Normandie, which was run down last night in the Hudson River off Dobbs Ferry, by the Norwegian tramp steamer Volund. Those who perished were: Miss Gladys Dodge, of New York, a guest aboard the yacht; the captain, William Storm, of Hyde Park, New York, and the engineer, Stewart Gracie, of Brooklyn. Their bodies were not recovered.

The Normandie, a vessel of 13 tons, was chartered for the month of July by her owner. C. W. Dumont, to John H. Rudd, of the Yonkers Yacht Club. Mr. Rudd last night invited Miss Dodge and John F. Charter before the New York to the State of the S E. Greene, a banker of New York, to take a sail with him up the river as far as Peekskill. On the return trip, when off Dobbs Ferry at 9 o'clock, the Normandie was struck amidships by the Volund and sank instantly. Mr. Rudd, Mr. Greene and Joseph Hannigan, the deckhand of the yacht, managed to keep affoat by clinging to the wreckage until they were picked up by a boat from the Volund, and were taken aboard. Nothing more was seen of the three other persons on the yacht, and they undoubtedly went down with the vessel.

Today Mr. Rudd made a formal statement, in which he said that, as the Normandle was running down stream in the middle of the river, a steamer was seen coming up, head-on, about 600 yards away. The pilot of the yacht gave one whistle but the steamer continued to come on until within 150 feet of the yacht, when she whistled twice and swerved to port, striking the Normandie amidships. An explosion followed immediately, and the yacht went down within five seconds. Coroner Frank Russell, of Westchester County, visited the wreck of the yacht today and found long strands of hair streaming from one of the portholes. He tonight caused the arrest of Joseph Han. nigan, the deckhand, and issued an order for the arrest of Mr. Rudd.

HE WILL DIE BY TORTURE

Intending to Rob Captain, He Stows Away on Board Schooner-One Woman Escapes and Causes Capture in Honduras.

NEW ORLEANS, July 12.-A shocking story of murder, with robbery as the motive, was brought to this city today by Captala Hans Holm, of the Norwegian fruiter Brattan, which plies between New Orieans and Honduras ports. It was confirmed by the officers of the truit steamer Rosina, which came in later in the evening with additional details. The little island of Utilla, lying off the Honduran coast, and whose population is an indis-criminate mixture of whites, Caymanites and Caribs, was the scene of the trabedy, in which 12 lives were sacrificed.

The captain of the schooner Olympia was about to make a trip to Ruatan, Truxillo and Belize. She had about 1400 sols and was to buy cattle at Truxillo to sell at Belize. She carried a crew of four and quite a number of passengers. making the total list of people aboard number 11. Among these were two women and two children. The vessel left the har-bor of Utilia at 11 o'clock Friday night, June 30, and after she had been under way less than an hour everybody was aroused by a shot, and, rushing on deck, found a negro armed with a rifle, shooting down the men one after another. This negro was Robert McGill, and, as it afterward developed, he had stowed away on board with the intention of robbing captain and then swimming ashore.

Kills Woman and Child Also.

After he had killed all but one of the en, he ordered the last survivor to go below and scuttle the ship. When the unfortunate reappeared on deck and ported, the negro shot him dead. He then put the two women, Miss Elsie Morgan and her sister, Mrs. Walter Rose, in the dory with Mrs. Rose's six-weeks-old infant, steering for the mainland,

He changed his mind about allowing the women to live and killed Mrs. Rose and her infant. Then he began ahooting at Miss Morgan, who had leaped overboard, and wounded her in the arm. He fired at her ineffectualty, but his ammunition evidently gave out, for he promised immunity from harm if she would come back to the dory. She started back, and, when within an oar's length, he struck her on the head with an oar, stunning her. Believing she was dead, he rowed away toward the mainland.

Miss Morgan awam back to the island, where she was thrown on the beach by the waves, exhausted. She feared that the negro would follow her, so she hid in the bushes, and for two days suffered from the heat and exposure until found by a women from her neighborhood and rescued from starvation.

In the meantime the dory had been washed ashere, and there was excitement on the island, as it was believed the Olym-Miss Morgan told her story, an immediate search was instituted for McGili, and the authorities on the mainland were notified.
