Commission Will House, Feed, Doctor and Amuse Its Men-Yellow Fever on Decline-Either Taft or Root Good

OYSTER BAY, L. I., July 14.-Theodore P. Shonts and John F. Stevens, chairman and chief engineer of the Isthmian Canal Commission, went over the subject of the canal with the President presty thoroughly this afternoon, this being the first opportunity the President had to discuss it with Mr. Stevens. As both Mr. Shonts and Mr. Stevens expect to sail for Panama on July 20, the President desired to consult with them before their departure. It is not likely that Mr. Stevens will be made a member of the executive committee of the Commission, a post occupied by his predecessor, Mr. Wailace. It can be said, however, that he has been given practically a free hand to do the construction work. He has his own ideas about the methods to be pursued and will not

tails to be worked out by Mr. Shonts, Governor Magoon and the Commission. Stevens Will Organize Staff.

district. His desire is to dig the canal

and to that great undertaking he will

devote all his energies and ability, leav-

ing the executive and administrative de-

After the conference with the President Mr. Shonts talked frankly about the work of the commission and canal conditions He said:

"The President desired to see Mr. Stecens before we left for the Isthmus, and to discuss with both of us the progress of the work. Just now we have about 12,000 men at work on the canal. This is about as many as we could employ under the existing conditions. We have our executive staff thoroughly organized now, but the organization has not been completed on the Isthmus. That is a part of the work Mr. Stevens will have to do. His engineering staff must be organized and its work mapped out. We must make arrangements for the housing, feeding and general care of our employes, in itself a great task, and we must complete the sanitary arrangements in the American zone. All this will require time and energy and hard work, but it will be accomplished successfully. I have about concluded arrangements with a man who is to go to the Isthmus to arrange for the recreation of the canal employes. We will have reading rooms, amusement halls and all that sort of thing, by means of which the mer will pass their idle hours pleasantly and

Sanitary Conditions Better.

"No, the sanitary conditions on the frightened by the yellow fever, but it is not so had as might be expected. In fact, the reports from the 1sthmus regarding health conditions have been grossly exaggerated. Out of 30 cases of yellow fever in May we lost only two and in June out of more than twice that number we lost only four. The sanitary conditions are being bettered all the time and as soon as we complete arrangements for a more adequate supply of pure water we shall have little or no difficulty. My belief is that the actual digging of the canal will have to be done by laborers inured to the tropical climate. That labor we shall be

able to get without any serious trouble. "We have been devoting a good deal of time recently to the Panama Railroad. It is now in excellent condition. While it is only 47 miles long, the road, including the necessary sidings and spurs, has nearly 500 miles of track. The traffic over it is very heavy. Such business as is purely commercial is handled just as it ould be by any other railroad and such business as the road does for the canal is charged against the Canal Commission as part of the canal construction ex-

Can Work Under Taft or Root.

Mr. Shonts was asked whether he could say anything regarding the proposed transfer of the Canal Commission and its affairs from the War to the State De-

"I think," he replied, "you would better get that Information from the President. I can say, however, that no definite conclusion has yet been reached. So far as I am personally concerned, it would make no difference whether the canal affairs were directed by Secretary Taft or by Secretary Root. Both are equipped admirably for the work. The transfer is a matter with which I have nothing

Mr. Shonts did not know how long h might remain on the Isthmus.

REFERENDUM ON STRIKE

Express-Drivers Submit Their Differences to Popular Vote.

CHICAGO, July 14.-At a meeting of the Express Drivers' Union tonight, it was decided to submit to a referendum ote on Monday night the question of calling off the teamsters' strike as far as the express drivers are concerned. Recent disclosures regarding the action of truckdrivers and other teamsters in doing the work of nonunion drivers, combined with a failure on the part of the strike leaders to collect sufficient funds to pay benefits promptly, it is declared, have led to rebellion in the ranks of the

express drivers.

The Baggage and Parcel Delivery Drivers of the ers' Union has ignored the demand of the Department Store Drivers and voted down a motion to call a strike against the six express concerns that control the Chicago Cartage Company, which is making deliveries to strike-bound houses.

Burglar Killed in Furious Fight.

SALT LAKE CITY, Utah, July 14.-In an attempt to rob the co-operative store at Union, a small town south of here, early today, an unknown burglar was shot and instantly killed.

Two men were seen to enter the place and an alarm was immediately given, which brought a crowd of a dozen vil-lagers to the scene and the place was surrounded. One of the burglars made his escape with a posse following him. The other, after being caught, was placed in charge of R. F. Forbush. The burglar, taking advantage of Forbush's attention seing turned away, threw himself on the latter's back, A desperate struggle for possession of a double-barreled shotgun followed. Forbush finally succeeded in getting the weapon pointed at the thief and discharged both barrels, almost tearing his head off.

Despite Orders of Governor, Superintendent of Insurance Imposes Impossible Terms - New

Directors Elected.

NEW YORK, July 14.—For a second lime within 24 hours District Attorney Jerome today made an unsuccessful ef-fort to procure from the New York office of the State Superintendent of Insurance an official copy of the Super-intendent's report on his investigation into the affairs of the Equitable Life Assurance Society. The report had been made public at Albany last night. Mr. Jerome's personal representative. Assistant District Attorney Garvin, went to the office of Deputy Insurance Commissioner Hunter today bearing a letter from the District Attorney, to-

gether with a formal demand for an official copy of the document.

Mr. Garvin and Mr. Hunter were closeted for more than half an hour, and when the Assistant District Atemptyhanded. He admitted that he did not get the desired document, but re-fused to discuss what took place at the conference. Mr. Jerome said he would conference. Mr. Jerome said he would inform the Governor of the failure of the Insurance Department here to turn the Equitable testimony over to the District Attorney's office, as promised. When Mr. Jerome again called up the

state capital this afternoon he was unable to reach Governor Higgins, but talked with his secretary, Mr. Perley, and it was arranged that Mr. Jerome should send to the Governor all copies of the correspondence between the District Attorney and the Superintendent of Insurance relative to his attempts to get a copy of the Equitable testimony. Mr. Jerome said tonight:

Mr. Garvin, having left my letter of July 3 at the office of the Superintendent of insurance in the City of New York this morning, had a conversation with the Deputy State erintendent. Mr. Garvin was authorized efused to deliver it to him without the Do rict Attorney's signing a paper acknowledging that the copy was the property of the Sup intendent of Insurance, agreeing to return within a reasonable time and return it of demand at any time. As I understood from the Governor's letter that the Superintender of Insucance had been instructed to give m a copy of the testimony and had stated to the Governor that he would do so as soon as one could be prepared, it did not seem t me to be proper to receive a copy undeonditions apparently not designed by Governor to be impossible. OREGONIAN NEWS BUREAU, Washngton, July 14.-Major S. W. Roessler is relieved from duty in the office of the Chief of Engineers, to take effect July 31, and will then proceed to and take the station at Portland, relieving Major William C. Langfitt of the fortifications and river and harbor work in his charge, together the money, property and records pertain ing thereto.

Major Langfitt will report to this city for duty in the office of the Chief of Engi-

Major Langfitt has represented the En-gineering Corps in Portland for nearly seven years. Under his supervision many thousands of the Government's dollars have been expended. He has had control of some of the most important pieces of work anywhere in the West. He is known all over the North Pacific Coast.

The exchange of duties is according to the custom of the department. Four years is the usual length of time a supervising engineer remains at any station. That Major Langfitt has been here for a longer period is evidence that the Wash-ington officials apparently do not consider he has fallen into the dreaded rut.
It is probable that Major Langfit's new work at Washington will be supervision of

some line of engineering activity through-out the country. A man of his rank has charge of the fortifications of the United States, another of the river and harbor improvement, another of the engineering school at Washington, and so forth. Major Roessler is one of the senior Ma-jors of the corps, and a somewhat older man than his predecessor. So far as known by the officials here, he has never been assigned to Pacific Coast duty be-

It was immediately after the close of the Spanish-American War in 1898 that Major Langfitt was sent to Portland. Dur-ing the war he had been in charge of en-gineers at Honolulu. He was then a Captain, but two years ago was advanced to his present rank. Owing to the conditions prevailing at the time, Major Langfitt had to take charge of two distinct offices—the engineering and river work and the for-tifications. Each office was formerly sep-

TRANSFER NEWS TO ENGINEER

But Major Langfitt Expected It to Come Very Soon

ASTORIA, Or., July 14.—(Special.)—Ma-jor W. S. Langfitt, United States engineer, arrived down from Portland at midnight. Tomorrow morning he will leave on the Quartermaster's department steamer Major Guy Howard to inspect the work being done on the fortifications at Fort Canby. When asked concerning his transfer to Washington, D. C., Major

Langfitt replied:
"If I have been transferred from this station, it is news to me, although not a surprise. Some time ago I received an intimation that I should be transferred soon, but have received no official noti-fication that the order had been issued. I have been in charge of this district for six years, which is much longer than the any one place, so, if I have been transferred, it is not surprising.
"As to when I shall leave. I cannot say.

but, if the order has been issued, of course shall go."
Asked if his transfer to Washington would be a promotion, Major Langfitt

a change of work. The department usual ly transfers the engineers every four years, and as I have been here over that time the transfer may be simply in line with that custom. That I will not know until I receive the official notification."
