NEW ORLEANS, July 30.-Though this was Sunday, the work of sanitation, fumigation, oiling and screening went on just the same and will continue daily until the city has been thoroughly screened and made mosquito-proof.

The record for today shows little change from that of yesterday, except deduction of the number of deaths. The decreased number of new foci is also a new en couragement. A new complication was disclosed today, when Superintendent Curran, of the New Orleans & Northwestern Railway, announced that two passengers who had remained the required length of time in the Slidell detention camp and sought admission into Mississippi had been turned back.

If the Mississippi health authorities now refuse admission to holders of certificates of detention issued by the Marine Hospital, it will result in the Government oning those camps and then travelers will either have to stay here or go to points in the North and East and spend ten days before they can return

to Mississippi. The location of the Louisville & Nashville camp has not yet been fixed, but Dr. Guiteras hopes to get into comunication with Adjutant-General Fridge of Mississippi, who is in charge of the state quarantine on the Gulf coast, and finally arrange the matter. The Missizsippl troops are now doing guard duty on the coast.

#### Statement of Health Officer.

City Health Officer Kohke, who has Immediate charge of the situation in the city and who has been subject to some criticism from various sources, today gave out the following statement, which shows how the authorities handle the infection as soon as it was discovered:

"The first intimation of yellow fever in New Orleans was had on July 11, when two physicians reported two cases of illness resembling vellow fever, which cases were submitted to the president of the State Board of Health at his office. The health officer of the city was summened mmediately and the cases reported, one being already dead at the time, were by n considered, for sanitary purposes, actual yellow fever, and the premises were treated accordingly; that is, the disinfection methods employed were those against yellow fever infection.

"The diagnoses of these cases being judged a matter of later consideration. he health officer immediately instituted pected of infection and this investigation disclosed evidence pointing to prior cases in the same neighborhood,

"All measures were employed against vellow fever infection wherever suspicion sinted. In a few days it was learned that several squares were infected apparently to a Jegree justifying the fumigation of every house for the positibly existing infected mosquitoes. The neighborhood operated upon is almost wholly inhabited by an Italian population, many of whom are connected with the handling of bananas and the unloading of such cargoes from fruit ships arriving from Central American ports.

### Every Means Is Employed.

"Every means was employed, from soft persuasion to brutal force, to reach infected places, and the wholesale fumigation was in progress during a period of ten days or more, during which period an autopsy demonstrated the nature of the disease, which must have begun at some time during the second half of May. From the infected neighborhood at varying times residents removed their domicles to other sections of the city and in this way cases of the disease developed in persons infected not only in the Italian district, but residing in other districts at the time of the first appearance of the first symptoms.

"Today there are few cases in persons not connected by any known way with the infected district and all cases of the disease known to exist are isolated and subjected to the proper measures of prevention based on the mosquito law of transmission. The spread of the disease has not been as great as was at first feared and hope is entertained that it may be controlled. Citizens are alding

authorities in the neighborhood containing cases of the disease, the citizens generally are entirely engaged in ridding the city of the yellow fever mosquito by the fumigation of dwellings, the object of this being to render barren of yellow fever infection the sections at present containing no cases of the disease.

### Quarantine of Fruit Vessels.

"Quarantine of Fruit Vessels."

"Quarantine methods against fruit vessels have been made more stringent to prevent the introduction from Central America and the fruit ports generally of yellow fever infection. The situation is recognized as one offering an opportunity for the people of New Orienas to demonstrate their willingness, determination and ability to care for yellow fever after its introduction and no effort of energy or expenditure of money is spared to attain successful results. So far as is now known no infection has occurred from the cases outside of the infected district, and organization will, it is expected, be so complete in a short time that the stamping out of any such secondary infection is not likely.

"The impression that the authorities withhold information as to the extent of infection is occasioned by the necessary delay incident to the investigation upon

the result of which the official report is

President Souchen, of the State Board of Health, has also taken cognizance of Governor Vardaman's comments about evasion and dissimulation and today gave

Governor Vardgenan's comments about evasion and dissimulation and today gave out the following statement:

"I most emphatically deny the assertion made by Governor Vardaman of Mississippi that I knew there were a great many cases of yellow lever in New Orleans hefore the announcement of the fact was made. That assertion is false and erratic and quite in keeping with the well-known temperament of Governor Vardaman.

"The first case came upon me like a thunderbolt from a clear sky. I had not even heard of rumors. As soon as I had seen four suspicious cases, which all came to my knowledge within four days. I wrote the following letter and sent the following telegram to Dr. Hunter of Mississippi, Dr. Taher of Texas, Dr. Sanders of Alahama, and Dr. Wyman of the Marine Hospital service."

Dr. Souchen then quotes his letter and telegram notifying them of the presence of cases presenting symptoms of yellow fever.

This forenoon, in response to the call of Dr. Souchen, a conference was held to discuss freight and passenger regulations. No representative of the other states was present except Dr. Baxter, of the Ten-nessee board, who expressed himself as

"I am thoroughly satisfied with every m I see, both as regards energy

White, United States Public Health and Marine Hospital Service, said that freight cars were being fumigated whenever there was a possibility of their con-taining infected mesquitoes and wherever else there was a demand for furnigation on the part of the authorities of the states to which or through which the cars were to run.

#### Care Taken by Railroads.

Statements from D. D. Curran, super-intendent of the New Orleans & North-eastern Reilrond; by O. M. Dunn, super-tutendent of the Illinois Central, and an-nouncements by others familiar with the situation, was that every passenger train run out of New Orleans was either suprun out of New Origans was exter sup-plied by a shuttle tracing at a point be-yond possible infection or was fumigated prior to departure and run closed through the states demanding such regulations. There is much gratification at the action

There is much gratification at the action of Texas in rabbing the quarantine against the state, except at points of infection, which is in line with the statement of Dr. Taber that this course would be taken just as soon as the state was quarantined against the infected points. On the other hand, the Mississippi authorities are drawing the lines tighter every day, as was shown by the refusal to admit passengers with certificates from the Slidell detention camp on the New Orleans & Eastern road. Surgeon White has taken this question up with the authorities of Mississippi and hopes to be able to atraighten out the tangle.

Today, acting on the suggestion of Rev. Dr. Beverly Warner, who is general superintendent of the campaign of education, every preacher referred to the work now in hand and in all the Protestant churches the Episcopal prayer in times of committees which are offing and screen-ing cleterus, and it is believed that this

will have a splendid effect.

The demand for sixteen and eighteen mesh acroen wire has been so great that there is a shortage of it here and cheesecloth is being used in many places as a emporary substitute

### Suspects Held on Swinburne Island.

NEW YORK, July 30.-Health Officer Doty visited the quarantine islands in the lower bay today and shortly afterward three passengers of the steamer Segur-anca, namely. Miss Hecker, Henry Boyd and Miss Wempe, were released, together with the two members of the crew of the steamer Eldorado, which arrived yes-terday from New Orleans, and were held for observation, owing to high tempera-

The four passengers of the Seguranca detained at Hoffman Island, are quite comfortable, and if all goes well, will be released probably tomorrow. The ten members of the crew of the Seguranca are pleasantly situated at Swinburne Island, In the two new wards recently erected on the island. Of the number only two are seriously ill. They are Thomas Mc-Gill, one of the Seguranca's stewards.

and Vincent Novo, a fireman, and Vincent Novo, a fireman, McGill is resting comfortably and is somewhat better. Vincent Novo, how-ever, is quite ill. One physician said be could not definitely state whether these men are suffering from yellow fever. The an investigaton of the neghborhood sus- bacteriological examination would not be

### Area of Disease Restricted.

WASHINGTON, July 26,-A dispatch WASHINGTON. July 20.—A dispatch was received by Surgeon-General Wyman, of the Public Health and Marine Hospital Service, from Dr. J. H. White, in charge of the service work at New Orleans today, telling of the steps taken by Surgeon E. F. Richardson, who is supervising the work in the infected district for the City Board of Health. It reports that Thursday and Friday there were 1918 houses inspected, 19 cases of sickness were investigated, and 2000 or more tanks and cisterns ofted.

The officials of the Marine Hospital Service express the opinion that the fact that the area of the disease has been well restricted is an encouraging feature of the present outbreak. But two other places outside of the State of Louisiana, they say, have officially reported a case of the fever, a notable contrast to former outbreaks when it spread with greater ra-

Guarding Against Yellow Jack. MEMPHIS, Tenn., July 30.-The report given out yesterday following the meet-ing of the state, city and county Boards of Health regarding the quarantine reg-ulations established against New Orienna against fever-infected districts proves to be partly erroneous. The official statement is to the effect that West Tennosses and Hamilton County will close its doors against the fever districts.

against the lever districts.

No quarantine rules for the entire state have been promulgated. Strict vigilance is being maintained by quarantine officials who are guarding the approaches from the south to this division of the state.

### Crew Has Malarial Fever.

NEW YORK, July 20.—it was announced tonight that of the ten men of the crew of the Seguranca under detention eight were suffering from malarial fever only and that while there was still some doubt regarding the fireman and steward it was probable that they were suffering from the same form of fever.

### INJURED ARE DOING WELL

Court of Inquiry on Bennington Disaster Is Ready for Task.

SAN DIEGO, July M.-The report from

British Government Will Send Fleet to Baltic Sea.

WILLIAM'S PLAN KNOWN

When He First Sounded the Power on Closing of Baltic, Word Was Immediately Sent Great Britain.

SPECIAL CABLE.

LONDON, July 31.—It is understood that the British government is closely watching the scheme of the Kaiser to make the Baltic a closed sea. The forthcoming visit of the British fleet to the Baltic. it is averred here, means that Great Britain desired to convey a gentle hint to the Kaiser that the British Foreign Office is fully cognizant of what is go-ing on and that it intends to check at

the very outset anything that might prove detrimental to Britain's power. The Kalser, it is absolutely known, beconferring with the Czar, caused all of the powers, with the exception of Great Britain and France, to be sounded on the subject of closing the Baltic. That German diplomacy blundered in the matter is sure, inasmuch as Great Britain knew the move as soon as the advances had been made to the first of the nations. This move on the part of the Kaiser, while not of itself unfriendly, yet taken in connection with other matters that have developed, notably, the Moroccan situation, was regarded as prejudicial to England, and the Foreign Office immediately set on foot plans to checkmate the

The Kaiser's diplomacy juggling being discovered by the powers approached, thanks to a hint from the British Ambassador, they promptly disavowed all connection with the scheme and the Kaiser was forced to resort to the Czar. Even here he received scant comfort, and telegrams from Stockholm, St. Petersburg, Fome, Paris and other centers indicate that the Baltic plan has not the slightest chance of success.

#### Changes in Greek Cabinet.

ATHENS, July M.-M. Beauduris, Min-ATHENS, July 30.—M. Beauduris, Min-ister of Marine, has been appointed Min-ister of War, and Epammondas Delyan-nis, a nephew of the late Premier Delyan-nis, has been given the portfolio of Min-

#### Auto Accident in Bay City.

SAN FRANCISCO, July 30 .- An automobile accident took place this afternoon in which two persons were seriously in-jured. While returning from a drive to the ocean beach, the machine, with Mrs. Sol Camp. of Goldfield, Nev., Mrs. Baren and Chauffeur Karl Berlin on board, got beyond control on descending a hill and overturned in the vicinity of Nineteenth avenue and H street.

avenue and H street.

Mrs. Camp sustained innumerable contusions and a broken rib, while Berlin had a rib fractured and received severe internal injuries. Mrs. Baron escaped uninjured.

### Milling Wheat for Mexico.

SAN FRANCISCO, July 20 .- The Kosmos steamer Theben, which sailed today for the southern coast on her way to Europe, carried 1000 tons of milling wheat for Guaymas, Mexico. For several months past the Mexican government has abol-iched the duty on wheat, owing to the short crop in the Hermosillo district and steamers sailing from here have received consignments of wheat sufficiently large to warrant them in calling at Guaymas, far up the Gulf of California. The duty will be imposed again on August II.

### Carmen Hurt in Collision.

SALT LAKE CITY, July 29 .- A collimon between two empty trolley cars near the Oregon Short Line depot tonight resulted in the serious injury of Conductor Jack Wright and Motorman
