START ON THIRTEENTH .- Delegates National Encampment, G. A. R. which meets in Denver September 4, will leave Portland August 20 and will be joined at Seattle and Tacoma, Wash, by those going from that state. Outside of the delegates the attendance from Oregon and Washington will not be so large as expected, Adjutant J. L. Wells has received a few letters of inquiry in this department, but he knows nothing definite as to the probable number who will attend. J. S. Goss, department commander for Washington, was in Portland this week to see Adjuint Wells and he was unable to say how many would go. However, all will arrange to travel together. It is expected that quite a number of the delegates will return East by way of Portland and take in the Exposition

Here a requiem Roosevelt took office after the death of mass was celebrated in the presence of McKinley, Miss Reel was reappointed. the relatives and friends of the deceased. Mr. Skanott was 25 years old, a native of Oregon and lived at 372 Ross street, Mc-Millen's addition. For several years he had been a practicing attorney in this city and was well respected. His father and mother are now making a tour of Europe. BRIDGING THE BREAK .- A force of mer

were at work completing the trestle on Grand avenue between Stark and Oak street for the street rallway. This trestie was practically completed last evening. No new piles were used, only new timbers were set up on solid foundations, and part of the standing partly burned plies were used. Ralia will be laid over bridge. Men were also at work yester-day repairing the Oak-street sewer.

OTHERS SEEKING INVESTMENT.—Failure to establish another woolen mill at Selfwood, on the former site of the Portland Woolen Mills, has not discouraged the people, as other enterprises are seeking investment there. D. M. Donaugh, president of the Sellwood Board of Trade, says that capitalists outside of the woolen men have been making inquiries about this site and stand ready to put in man-ufacturing plants. The site being ideal for manufacturing purposes, it is likely soon to attract some enterprise.

WILL SAVE THE PINGERS.-J. Wolff, who runs a wood-sawing machine in Montavilla, a few days ago permitted his right hand to come in contact with the whiri-ing saw, with the result that the four fingers were nearly torn from his hand.
They were left hanging by the tendons and shreds of flesh. The physician who was called to attend Mr. Wolff carefully stillched, the manufed flagrens together. stitched the mangled fingers together, and yesterday said he thought they would be saved.

STARTS ON POWER-HOUSE.-Work has been started on the new power-house for the Oregon Water-Power Company at the Gotf Links. This building will be of stone and will cost about \$20,000. It is needed to transform the voltage of the electric current and is similar to the power plant at Gresham. The central power generator will be at Cazadero, where work is going forward on one of the largest electric plants in the North-

WOULD CHANGE NAME OF POSTOFFICE. A petition is being circulated in the town of Lents, at the end of the Mount Scott rallway, asking the Postoffice Depart-ment to change the official name of that postoffice to Mount Scott. This change is asked on the grounds that the district is more widely known as Mount Scott than Leuts, although Lents is a name derived from the name of the founder of that district—that of a well-known ploneer family. There is considerable op-position to this change. Mrs. C. B. Coffee, the postmistress, objects. The old resi dents cling to the pioneer name of Lents, A remonstrance will soon be circulated, and the department will be called on to

settle the contention FUNERAL OF MRS. LENORA LANGLEY.— The funeral of Mrs. Lenora Langley, who died at the bome of her daughter. Mrs. George W. MISS ESTELLE REEL HAS NEW PLACE IN WOMAN'S WORK.

Wyoming Teacher Achieves Success as Superintendent of Instruction for Children of Aborigines.

Miss Estelle Reel, National Superinten dent of Indian Schools, has been in Port-iand attending the Institute of Indian Teachers, held last week in the Ameriun inn. Miss Reel is one of the foremost Indian instructors in this country, and since she was appointed to the office she holds, has made a splendid record for herself on the lines of practical educa-tion for the Red race. Before going to

the Exposition, owing to the heavy traf-fic. The Oregon Railway and Navigation Company has been making repairs to the lower portion, which is occupied by the trains.

The Oregon Railway and Navigation id with such marked success that President McKinley's attention was attracted to her, and it was through personal in-terest of the President that the appointment was made. She was the first woman funeral of James B. Sinnett, who died to hold this important position. St. Johns Churches Support Councilmen Shields, Leggett and Brice.

The United Evangelical, Methodist, Baptist, Congregational and Adventist churches of St. Johns yesterday morning took a decided stand at the morning services in support of Councilmen Shields, Leggett and Brice in their fight against the licensing of saloons in that city. Rev. E. McVickers, at the United Evangelical; the new trestle at once, and the Monta-tilla and East Twenty-eighth-street cars will be sent back over the Morrison Rev. Mr. Campbell, at the Methodist, and Rev. Mr. Upshaw, at the Congregations Church, made some pertinent remarks, when the following resolutions were adopted in all the churches:

Wherean, the churches of St. Johns have supposed the liquer traffic in every way in which it has been presented in the past, and Whereas. The question was submitted to a your of the propie by the urgent request of the liquor faction, and the result was a hand-mene majority in favor of no Beense, and Whereus, Part of the men who were elected to the office of Councilman have been tru to their pleage as candidates, to their prin-ciples as temperance men, and to the voice of the people as expressed at the ballot-box in opposing all suggretions of granting sulcon licenses in any manner; therefore, Resolved, That we, the churches of St.

Johns, have not lost any interest in maintaining the purity and chastity of our town, and we do watch every action of our Council with the keenest interest, and that the temperance members of said Council do have our profound sympathy in the contest for right, and we do assure them that they do have the undivided support of all the understand congregations of Si. Johns by a standing unanimous vote with all right-thinking procedures.

(Signed.) United Evangelical, Methodist, Congregational, Baptist and Advent Churches. The St. Johns Council meets this evenc, ostensibly to elect a successor to C. Edwards, who was declared unscated at the last regular meeting on a vote of three members, Councilmen Peterson, Thompson and Linquist, by Mayor King, the other three refusing to vote. Subse-quently, Edwards was recognized as a member by Recorder Hanks at roll-call. With Edwards in there is a majority against liquor licenses. With him out, there is a tie vote on the liquor license question, which gives the Mayor the deciding vote. So badly complicated has the situation become that the action of the Council cannot be predicted, but it is improhable that a successor to Edwards can be elected tonight. It would be reason-ably safe to predict that charges will be preferred in some form and that the squabble will get into the courts.

It looked as if the palmy days of the Baker had come again when the crowds lined up at the entrance of that theater yesterday for the opening performance of the Pay Poster Burlesquers. Every seat was sold at both performances, and there were many who stood up. Those who attended seemed to like the sort of show want" which local managers have been trying to locate for two or three years past. Meritorious features of the performance were the singing of "Asleep, in the Deep," by Vivian, a female bartione, and the coop many of Melayric Tree. and the coon songs of McIntyre. Two musical farces—"Cleopatra in Central Park" and "The Mysterious Mrs. Buffles" were presented. In both there is a con-iderable element of genuine comedy, aldressed and well trained.

The best feature of the show is the ollowistic includes the numbers by Vivian and McIntyre, already referred to; the sketch by George Wilson, called "A Thanksgiving Eve"; the Rozinos, in their eccentric ounding billiard act, and a monologue by Louis Ducre. The musical numbers "Come Into My Auto," "Venetian Maid," "Old Man Moon," "Zaza" and "Luja" were satisfactory. Same bill all week.

#### DUFUR ROAD NEAR END

Great Southern Track From The Dalles Almost Finished.

The Dalles Chronicle Track-laying on the Great Southern Railway is being prosecuted with the greatest vigor, and the rails are now in position for about twenty-two miles fr this city, or about a mile beyond Wr tham and about eight miles from Dufur The company has a track-laying machine at work that, with the aid of ploneers, is capable of finishing about two miles of track every day, ready for the rolling

There have been some very heavy rock uts, and considerable bridge building: but these are nearly all completed, and in a few days the iron horse will cele-brate its advent into the city of Dufur. The worst cut is said to be the first one about seven miles from this city, where, it is feared, during the rainy season there may be trouble from falling rocks. Some of the bridges are quite high; but none have been very difficult of construction. In time these wooden structures may be replaced by concrete and iron ones; but the bridges now erected will be perfectly safe for a long number of years and until travel is much more than it is at

There are about 100 men employed, and these are engaged in track-laying. In places the grade has to be widenedespecially in some of the cuts—and this consumes time. During the hot weather it was most difficult to keep the men, as the heat was so oppressive that the same crew would rarely be working two days at a time. Now that the weather is no difficulty is experienced in this

A force of men is now engaged in grad-ing a road on the hillside from the terminus of the Great Southern-beyond and, when this is completed it is expected that the railway will use the old road for part of its track to the river front, diverging at a proper point and crossing the O. R. & N. Co.'s track to the beach. There are a locomotive and special cars on the Great Southern now, and these have been engaged in hauling lumber for the new warehouses at Wrentham and other points on the road. The farmers in the vicinity of the road occasionally come into town on the freight cars, and leave their wagons at home.

There will be a large crop of wheat this year at Dufur and on Tygh Ridge, and it is expected the Great Southern will the completed to Dufur in time to remove the present harvest. From persons em-ployed on the road we are led to believe that Dufur will be reached about the 10th of next month, and that construction work will then stop until next Spring or Summer, when the road will be pushed much farther south.

#### GAS ENGINES ARE POPULAR

ARE BECOMING MORE FAVORED EVERY DAY.

Gradually Displacing the Small Steamer on Short and Quick Runs.

The wonderful growth in the gasoline launches in Portland's harbor, the Willamette River and the Columbia River is but a sign of a like growth in other places and countries, and one ! tempted to ask the reason growth; some say it is a fad and will not last; others say they are here to stay and will not only supersede the use of steam in boats but will make it pos-sible to compete with the railroads and though they might be trimmed somewhat for their own benefit. Besste Rosa is an attractive southertte, and made a hit in and work of the steamboat days of Mark both skits. The chorus is attractive well. Twain. No inspection, cheapness of fuel and economy of space have been the main reasons for the wonderful Impetus, together with the many late Improvements to gas engines brought out by the use of automobiles. The gas engines of few years ago were crude, cumberson affairs and gave a great deal of trouble to the operators, but a modern engine is simple, compact and light and if properly handled, reliable. Where steamers were used for huntingfishing-boats and excursion boats, the gasoline boat is now used. And so populars it become that five gasoline pleas unches have been launched in this city

In the past ten days.

That gas engines will gradually supplant steam in boats is the contention of several German inventors, one of whom is now building a steamer with a omplete gas plant on board for gener ating gas from authracite coal and a ts being built just to show that it is prac-tical to build gas engines of sufficient horsepower to propel any size boats, even battle-ships.
