

CHAMPION OF PEACE

Congress of Parliaments Thus Hails Roosevelt.

WORKS FOR ARBITRATION

Interparliamentary Union Will Submit Model Arbitration Treaty and Plan for Congress of Nations at The Hague.

BRUSSELS, Aug. 28.—The opening of the Inter-Parliamentary Congress in the National Palace this morning was the occasion of a notable demonstration in behalf of President Roosevelt and the success of the peace conference at Portsmouth.

The welcoming address, delivered by Minister of State Deceuninck, aroused a storm of applause when he referred to President Roosevelt's two conspicuous movements in behalf of peace in first calling another meeting of The Hague Conference, and secondly, in bringing together the plenipotentiaries of Russia and Japan.

Thanks to Roosevelt, Peacemaker.

"President Roosevelt, Oyster Bay.—The Inter-Parliamentary Congress at Brussels assembled, sends greetings and has the honor to advise you that it has passed resolutions expressing its high appreciation of your action in calling a second conference at The Hague in the interest of international peace, and its profound thanks for your noble efforts in the interests of humanity to terminate the Russo-Japanese War.

At the afternoon session the Congress discussed the American propositions of Representative Richard Bartholdt, of the United States, for a model arbitration treaty and a permanent Congress of the Nations.

Mr. Bartholdt said:

"The status of our common cause in the United States is more favorable than it does at the present time. Two causes have mainly contributed towards this revival of interest in the peace movement—the meeting of the Inter-Parliamentary Conference at Brussels and the growing disgust with that barbarous war in the Orient.

Under the Hague Convention, the President already enjoys a larger measure of discretion than the new treaties, in their amended form, have conferred upon him. The failure of these treaties may prove a blessing in disguise. It justifies the hope that the coming autumn will see approval by The Hague Conference of a treaty wider in scope and yet more definite in detail.

It is with pardonable pride we Americans point to the historical fact that it was left to an American President, not only to open the doors of The Hague again, but also to stop, in the interest of both the belligerents and humanity, the war between Russia and Japan.

Representative James L. Slayden, of Texas, spoke in favor of the proposition. Herr Von Plehne, president of Austrian Upper House, opposed immediate action, owing to the magnitude of the subject. The Congress resolved to refer the treaty proposition to a committee with instruction to report within three months.

Count Apponyi announced that he would support plans for the permanent Congress of the Nations, and said that he would move tomorrow that special committee report thereon within three months.

Sent to The Hague Conference.

This action contemplates having the projects for a model arbitration treaty and a permanent Congress ready for submission in the second Hague conference, which is expected to follow the close of the Russo-Japanese War.

A brilliant reception in honor of the delegates was held tonight by the members of the Belgian Senate and Chamber of Representatives.

Representative W. A. Smith, of Michigan, left tonight for Berlin where he will have an audience with Emperor William.

COLD COURTESY TO BRITISH

German Receive Fleet with Courtesy, Officials Are Cordial.

SWINEMUNDE, Prussia, Aug. 28.—The presence of the British and German fleets in these waters today brought an influx of visitors, who evidently were prompted by curiosity, for, though their demeanor was no way hostile, it was notably cold. Throughout the day there was a constant succession of visitors to the British vessels.

The customary official visits were exchanged between the Admirals and the shore authorities, but no attempt at special decorations in honor of the fleets was made.

The authorities this evening gave a banquet in honor of the British officers. The utmost cordiality prevailed during the banquet.

WILL MANAGE MACEDONIA.

Powers Inform Porte They Will Control Finances.

CONSTANTINOPLE, Aug. 28.—A collective note from the six Embassies giving notice of the appointment of Commissioners to control the finances of Macedonia was presented to the Porte today.

Courtesy to Channel Fleet.

BERLIN, Aug. 28.—The visit of the British channel fleet to German Baltic ports, beginning with Swinemunde, has been received with every show of courtesy and pleasure by the German naval authorities. The newspapers carefully avoid saying anything unpleasant and there is evident determination to greet the visitors properly.

German Marines Surprise Insurgents

BERLIN, Aug. 28.—A detachment of marines and sailors from the German cruiser Bussard surprised about 1000 insurgent natives, half of whom were armed with rifles, near Kowoni, German East Africa, August 25. The Germans killed 27 of the insurgents and drove many others into the river, where they were drowned. No German casualties have been reported.

French Cruisers Held in Readiness.

TOULON, Aug. 28.—The French naval authorities have been ordered to hold two cruisers in readiness to proceed to Morocco in case the Sultan's reply to the French demands in reference to the im-

prisonment of the French Algerian merchant, Bouzian, are unsatisfactory. Everything is quiet here.

Panic on French Sugar Market.

PARIS, Aug. 28.—There was another collapse in the sugar market today, owing to the sudden death, under circumstances indicating suicide, of Ernest Crozier, chairman of the board of directors of the Say sugar refinery, the most important concern in the trade. Shares fell 250 points from 97 to 80. The sugar market suspended operations. The foreign exchanges, according to report, have not been affected by the incident.

More Cholera in East Prussia.

BERLIN, Aug. 28.—The official Reichs Anzeiger today says that since August 15, seven cholera cases in the district of East Prussia, have occurred in the Elcheh district, East Prussia. Traffic from Elcheh has been placed under medical and police patrol.

Police Minister Killed by Bomb.

VIENNA, Aug. 28.—(Special.)—Information was received last night from Cascothan that the police minister there was blown to pieces by a bomb. The assassin escaped.

KILLED BY BURSTING PIPE

Two Dead and Three Dying From Scalding Steam.

DANVILLE, Ill., Aug. 28.—Two men are dead and three more in a dying condition as a result of the bursting of a 16-inch steam pipe in the Danville electric light plant this afternoon. John Richards, Georgetown, and William Thornton, Danville, died tonight. The others injured are: Ed Caldwell, Georgetown; A. A. Tuttle and Samuel Niccum, Danville.

More Coal in Canada.

Halifax (N. S.) Herald. The biggest coal strike ever made in Canada was made yesterday, when Deputy Inspector of Mines Neville uncovered the northern outcrop of the Mullins seam near Lingan, about nine miles in a straight line from where the Cape Breton Coal, Iron & Railway Company is operating at Broughton. This discovery adds over 100 per cent to the Dominion Coal Company's proved coal areas on land, and assures numerous other leaseholders of a profitable coal seam in their leases. The Dominion Coal Company holds the leases upon which the strike has been made, and will undoubtedly proceed with their development. The seam is known as the Mullins seam and has been lost to prospectors for upward of 50 years. It showed six feet of clean coal, equal in quality to the coal of the Low Point area, and its outcrop line will measure from 15 to 20 miles, extending from Lingan to Mira Bay, its greatest distance from the coast line being at Broughton. This shows a land area of about 100 square miles, of 65,000,000 tons of coal. President Ross is jubilant over the discovery, as it adds a long lease of existence to the operations of the Dominion Coal Company. The discovery has created a big sensation among mining men. The seam is only about 70 feet from the surface, but this is only on the outcrop. The find also establishes the important fact that the Tracy and the Mullins are two distinct seams, a matter about which there had been some doubt.

Entries on Utah Reservation.

VERNAL, Utah, Aug. 28.—The land office here today began accepting entries on the lands of the Utah reservation in the order determined by the

ALL ALONG COAST

Yellow Fever Cases Scattered Far and Wide.

IN MEMPHIS AND NATCHEZ

Panic Prevails at Leveille, People Distracted by Fright and Grief.

Gulf Port Has Long Cealed Epidemic.

YELLOW FEVER AT NEW ORLEANS

NEW ORLEANS, Aug. 28.—Yellow fever report to 6 P. M.: New cases..... 45 Total cases to date..... 1,758 Deaths..... 269 New deaths..... 269 Total dead..... 420 Remaining under treatment..... 181

NEW ORLEANS, Aug. 28.—One of the deaths from yellow fever today is Sister Mary Engleberta, of the Convent of Perpetual Adoration, and her case was not reported until death. It is the first from that institution, though there have been several cases in that neighborhood.

Reports from the country tonight are: Patterson, six cases; Eighth Ward of Jefferson Parish, one case; Shreveport, one death; Hanson City, two cases and one death; Donaldville, one case (this is a new development, and is traced to Port Barrow, across the bayou); Port Barrow, one case; St. Rose, three cases; Pecan Grove, one case; Good Hope Plantation, one death; Wavend Plantation, south of Patterson, six cases; Bellesea Plantation, west of Patterson, four cases. Gulfport reports one new case, and Mississippi City none.

CREW OBJECTS TO QUARANTINE

Sailors on Gulf Steamer Mutiny, but Are Subdued.

MOBILE, Ala., Aug. 28.—Pilot Will Dogan, who returned this afternoon from the lower bay, reports mutiny among the discharged crew of the steamer Alps, which left this port Saturday bound for Port Limon. The men mutinied when they found they were to be detained at quarantine, and during the night the engineer of the Alps shot one of the crew. At last accounts the vessel was still in quarantine.

Texas Puts Ban on Memphis.

HOUSTON, Tex., Aug. 28.—State Health Officer Tabor today quarantined against Memphis. The restrictions apply to all people from Memphis. Passengers coming through the Memphis gateway will continue to be admitted to Texas. The quarantine authorities have also placed the ban on bananas.

No Yellow Fever in Virginia.

RICHMOND, Va., Aug. 28.—After a medical examination today, it was officially declared that the supposed case of yellow fever in Lumbenburg County was a mistaken fever only, and that quarantine was therefore unnecessary.

Steadily Gains on Disease—Gulf Port Proved to Have Cases.

NEW ORLEANS, Aug. 28.—Though New Orleans is now in the midst of a period usually critical in yellow fever epidemics, there is no present indication that the Federal authorities are to lose their grip on the situation. Monday always shows an increase over Sunday in the number of new cases, because Sunday is a good deal of a holiday for the inspecting force

she was told that she had yellow fever. She said she had lived in a house about a mile from the railroad station, close to a house in which two young men had been sick just 14 days prior to her attack. She said that for several days she had noticed four or five doctors visiting the house, leading her to believe that a consultation was in progress. Subsequently it was announced that the sickness was malaria. Dr. Wadlin was ordered to investigate. The result was the turning up of three cases of yellow fever in the territory in which Mrs. Collins lived.

As a result of the discovery of the cases at Gulfport and Mississippi City, numbers of doctors here who have patients on the Mississippi coast are now advising their return to the city.

QUARANTINE CAUSES WRANGLE

Health Board Resigns in Resentment at Governor's Action.

LITTLE ROCK, Ark., Aug. 28.—Four members of the State Board of Health today mailed to Governor Davis their resignations on account of friction that has arisen between the board and the state health officer, Governor Davis' action yesterday in assuming full charge of the quarantine situation. The Governor gave orders that special permits of the Board, issued to Louisiana persons, be disregarded and that no more charges be made for health certificates.

SUSPICIOUS CASE AT NATCHEZ

City and County Health Officers Disagree About It.

NATCHEZ, Miss., Aug. 28.—City Health Officer Dr. Fitchell refused to accept the diagnosis of the county health officers and other physicians that there is a pronounced case of yellow fever at Natchez. Dr. Young, of the Marine Hospital Service, and a special train. The suspicious cases are a negro and a Mrs. Einstein, living in the same block.

THE NORTH FOR HEALTH

ARCTIC EXPLORATION AS CURE FOR CONSUMPTION.

Polar Climate Said to Have Beneficial Influence on Sufferers From Tuberculosis.

London Tid Bits. The so-called "cures" for consumption are almost as numerous as the victims themselves and scarcely a day passes without the hope of a cure being raised by the advertised "discovery" of some novel but "absolutely reliable" method of battling with the scourge.

Each victim of tuberculosis, as every reader knows, is only too willing to try any remedy recommended, and will cheerfully put himself to the inconvenience and discomfort of sleeping in a snuggly for hours at a time, or of some "ray" machine if only he may thereby be restored to health. But so far, the doctors tell us, no certain cure has been found, and it therefore seems to be wondered at that an experiment soon to be tried by Dr. Frederick Sohon, of Washington, is being followed with the greatest possible interest.

Dr. Sohon has accompanied Lieut. Peary on two expeditions in search of the North Pole, and it is due to this taste for exploration and adventure that his attention was attracted to Arctic Circle as possessing a climate absolutely antagonistic to every kind of pneumonia disease. Dr. Sohon is now busy fitting out a magnificent vessel, which will shortly convey a number of patients suffering from tuberculosis to Greenland, where they will remain for at least three months, at the end of which time he feels perfectly confident they will return permanently cured.

In the course of an interesting interview with the celebrated scientist regarding his proposed search for a consumption cure within the Arctic Circle, the doctor evidenced much enthusiasm about the expedition. He has no doubt whatever about its success. "This has been a pet scheme of mine for years," he said, "and I have ever since I made my first trip with Peary in search of the North Pole in 1897. I have been laying my plans for a long time, but it was only a month ago that I saw any chance of their being realized. Now, however, we are all ready, and by the end of this month I hope we shall be well on our way to Baffin Land."

"When I went to the Arctic regions with Peary in 1897," continued the doctor, "I was myself a sufferer from consumption, and scarcely expected to return to my own country. But I recovered so rapidly that I was astonished, and it was in this way that I first began to consider the curative properties of an Arctic climate. According to my theory the germ of consumption can only exist in a climate that is nearly as warm as the human body, and though I made many bacteriological cultures in Greenland I never found a disease germ."

"The atmosphere to the very northern boundary of Greenland and far above the Arctic Circle is so clear that it is unable to judge correctly the distance of even near-by objects. One may walk toward a point apparently but a mile away and walk for an hour without seeing anything but a hazy blue sky. It may be getting nearer to it or even very near from the starting point. One may try to throw at a mark apparently within easy range, only to find that the strongest throw will cover but half of the distance. There is no dust or other harmful atmosphere contamination. There is no dirt; the rocks are clean, and every bit of dead lichen or moss that is not carried away by the melting snow in Spring is greedily held fast by the living roots."

"Just to give you an idea of the general conditions facing the health, I may tell you that in the Arctic circle meat never spoils when exposed to the air, and though if kept away from the direct sunlight, it will keep for months without decay. It will not rot. In fact, nothing decays. Ex-

posed bodies do not rot, they simply disintegrate and disappear under the influence of the elements. I was astonished when at Cape Sabine with Commander Greely, and during the time of the clothing, skins and furs in the former camp of Lieutenant Greely.

"Then again, the arctic air induces a prodigious appetite, and the taste runs naturally to the kind of food the sufferer from tuberculosis needs, which we wish to give him at home, but which he has no appetite for and cannot assimilate. In the North man craves meat, and particularly fat meat. The Eskimoes are so full-blooded, from their exclusively flesh and lubber food that violent exertion always makes them bleed from the nose, and they also bleed from excitement or laughter.

"Another remarkable thing in favor of consumption is the invariable and extraordinary increase in weight of a crew in the North subsisting on salt pork, corned beef, potatoes and bread. I might also state that on both occasions in which I have been to Greenland I have exceeded my usual maximum weight, gaining the first time thirty pounds in two months, and the second time nineteen pounds in six weeks.

"In the arctic region in Summer there is a period of three months of never-ceasing sunlight—every hour in the twenty-four. Think of the effect of a continuous sun bath of fourteen weeks! Even above the arctic circle, during the Summer months, the temperature seldom falls to freezing. In July and August it never freezes, the temperature remaining from thirty-five degrees to forty-five degrees. There is no increase of heat during the day and no cooling off at night. For of night there is none and the temperature must remain the same.

"We shall penetrate into the interior of Greenland, going about seventy-five miles up the Omekak Fjord, a place that I have visited before and know well. Those who form the party will live on the boat, but there is plenty of game and other amusements to be found for those who are able to indulge in such exercise. The personal outfit I am recommending the travelers to take consists merely of ordinary light winter apparel.

"The regions of perpetual sunshine, for which we soon intend to set sail, can be reached within ten days from Nova Scotia, or less than three weeks from New York, and the trip can be made in safety and comfort in a suitable vessel converted and appointed for the purpose. Fog is inevitable, and bad weather as luck brings it, but then these are the usual chances of an ocean trip.

"As a safeguard against possible severe

BUCK'S STOVES AND RANGES. \$5.00 IN THIRTY DAYS. \$1.00 PER WEEK THEREAFTER. What more liberal terms could you ask than this offer of the most satisfactory and economical of all modern ranges—Buck's. A range with perfect baking and fuel-saving qualities, complete construction and finish throughout; these are the most essential requirements to be considered in the selection of a range. Above all, consider our inducive offer of any "Buck's" in our stock at the above quoted terms.

BUCK'S An Enviably Record of Over 57 Years. THE BUCK'S OVEN. The vital part of any stove or range. To this part of a range or stove is looked for successful results, and from the Buck's oven comes forth nothing but these results. Large, roomy and well ventilated, it bakes evenly; and its enamel-lined racks and door render it most easy and agreeable to take care of. WE MAKE LIBERAL ALLOWANCES IN EXCHANGE FOR OLD STOVES AND RANGES.
