New York Financiers Will Raise

NEW YORK, Aug. 30 - American bank-ers are now prepared to float a great Russian loan, and it is stated this morn-ing that, as a matter of fact, financiers in this disk bank had the theorem.

Russian loan in mind for several months past, and the Russian government has

known that upon the conclusion of peace it could raise money here. Hitherto the foreign bankers have taken the first steps

in raising money for the combatants, and

American bankers were expected to as-

sociate themselves, with the foreign

houses. But the American firms will this time, it is understood in financial circles, ask London, Berlin and Paris to

take a part in the new loan. Although one or two well-known bank-

ing firms will assume the leadership in the new loan, it is stated a syndicate, in-cluding many other banks and firms,

will participate. The exact size of the new loan is not known, but some esti-mates place the figures at \$100,000,000.

It was also said that another Japanese loan will be floated here, and, as the case of Russia's borrowing, local bankers will.

stage. Snortly before the State Convention was held last year, a compact was entered into between Mr. Gooding and Mr. Borah, under which the latter threw his support to Mr. Gooding for the Gubernatorial nomination and made the latter's success possible. There has been much confusion respecting the nature of that compact, but its essence was that Mr. Gooding would keep his hands off the Senatorial suffered considerable damage. Letter Written by Third Person.

At the time of the convention it was stated an agreement in writing existed, but it proved to be in the form of a letwritten by a third man. The writer the letter was the editor of the Pocatello Tribune, George N. Ifft. It set forth. the obligation Mr. Gooding was willing to take upon himself, and further stated he had read the letter and indersed the accuracy of the statement. This agree-ment, however, was ratified before the convention met, Mr. Gooding reiterating it to a number of Mr. Borah's warm sup-

It is said there are notes in existence of a conference between representatives of both leaders, at which it was agreed on behalf of Mr. Gooding that he would do more than set forth in the lift letter. So far as those can see who are friends of both men, and who keep close to both, there is a disposition on the part of both to adhere to the terms of that compact. Mr. Borah supports the administration of the Governor, and is assenting to his renomination or, rather, he is not offering opposition to it. If his attitude is not misunderstood, he is entirely willing that the Governor should be renominated, and has confidence the latter will live up to the agreement. Governor Gooding, on his part, always tells those who have a right o approach him on the subject that he is under that colligation to Mr. Borah, and proposes to discharge it.

If the two men could settle the matter themselves, there would be little chance of friction; but, as in so many such cases, friends of each seek to drag him away from the contract or create conditions which would make it impossible for them to remain on a friendly footing.

diseases-Contagious Blood Poison-with Mercury and Potash as it would be to conquer the king of the forest in a hand-to-hand encounter, as thousands who have had their health ruined and lives blighted through the use of these minerals will testify. They took the treatment faith-fully, only to find when it was left off, the disease returned with more power, combined with

the awful effects of these minerals, such as mercurial rheumatism, necrosi of the bones, salivation, inflammation of the stomach and bowels, etc. When the virus of Contagious Blood Poison enters the blood it quickly contaminates every drop of that vital fluid, and every muscle, nerve, tissue and bone becomes affected, and soon the foul symptoms of sore mouth and throat, copper-colored blotches, falling hair and eyebrows, swollen glands, sores, , make their appearance. Mercury and Potash can only cover up these evidences for awhile; they cannot cure the disease. S. S. S. has for many years been recognized as a specific for Contagious Blood Poison-a perfect antidote for the deadly virus that is so far-reaching in its effects on the system. S. S.
