PORTLAND, Aug. 80.—(To the Editor.)—On hehalf of hundreds of Portland music-lowers and out of respect to the splendid Ogden choir. I wish to say that the constant disturbance caused by the steady rustling of departing persons during the rendering of the beautiful "Irrigation Ode" at the Auditorium recently was very annoying. Should it become necessary to leave for home before a concert is over, there is certainly sufficient time between numbers to leave, without suddenly making up one's mind and leaving the mument a new selection begins. A real estate deal was consummated yesterday whereby a tract of \$2 acres of choice land under cultivation and adjoining the reservoir and Mount Scott car lines, in the vicinity of Mount Tabor, was purchased by the Hibernia Savings Bank from L. C. Kern, for a consideration of \$11,000. The banking institution completed the deal for their clients, E. R. Richardson, May Hirsch and Churchill & Co.

Mr. Rosenfeld has been writing for the stage for 25 years. Before that he was a reporter on the New York newspapers, the Sun, Times and World. Then he founded "Puck," the lamented H. C. Bunner being his assistant. Then he left that sort of thing to write plays. He began by adapting things from the German, heing a thorough student of that language. Thanks to him we have "The Black Hurzar" and a lot of other fine musical things. He then made a musical skit from Frank Stockton's "Lady or the Tiger," then "The Senator" in 189, and then for Roland Reed he wrote "The Politician." "A Possible Case," "Lend

FIRE DEPARTMENT CRITICISED BY BUSINESS MAN.

Charge That There Was Delay at East Side Fire Are Resented by Chief and Assistant.

EXCERPTS FROM J. J. KADDER-LY LETTER-Alarm turned in 6:55 A. M.; Engine No. 7 was at East Pine and East Third streets; Engine No. 1 was at Fourth street, between Morrison and Yamhill; Engine No. 7, after 30 minutes' delay, succeeded in pumping a stream on fire; this engine was three blocks away from fire; firemen neglected to turn water into hydrant until advised by East Side citizen; water pressure on East Side registered 74 pounds; a 30,000 gallon reservoir was ready for use, but firemen did not know it was there; fireboat did not get into operation until after 40 minutes from time fire broke out; it was then too late to do any good.

DENIALS IN TOTO BY CHIEF CAMPBELL AND ASSISTANT CHIEF HOLDEN-Alarm turned in at 7:01, as recorded by mechanical clock; Engine No. 7 was within one block of fire at Third and East Oak streets; Engine No. 1 was at Union avenue and East Alder street; Engine No. 7 was throwing water on fire three minutes after alarm; this engine was but two blocks from origin of fire; it was not necessary to turn water into bydrants because water is always there ready for use; firemen take orders from superiors, not from East Side citizens; water pressure in no section of the city is as high as 74 pounds; a small water cletern was used in addition to hydrants, water from same being drawn within five minutes after fire started. but this cistern does not contain any-where near 30,000 gallons of water; fireboat responded to second alarm 14 min-utes after first alarm, using 3700 feet of hose, which was able to throw a stream on and over the Kadderly building at East Oak and Stath streets.

....... J. J. Kadderly, a prominent business man who was one of the heavy losers in the big East Side fire ten days ago, has written a letter in which he criticises Chief Campbell and his entire fire department, saying that the chief was respon-sible for the big loss to property owners and that the department, by its inefficiency, was responsible for the spread of the flames. Mr. Kadderly goes into detall explaining the exact positions which fire apparatus was placed and giving the exact time at which certain engines and the fire boat arrived on the

scene of the conflagration.
After reasting the chief to a brown turn, and in a sarcastic vein alluding to him as a negligent official, he said that the department is not organized and never will be under the present system. Chief Campbell was considerably hurriby the allegations of Kadderly, and at the same time his tre was aroused because of the personal remarks that the letter contained. Chief Holden was also indignant because of the sturs made against the Portland department, and was vehe-ment in his denials of the remarks made by Kadderly

'Mr. Kadderly has either been malic lously misinformed or he does not know what he is talking about," said Chief Campbell yesterday, "The difficulties under which we labored at that fire are not small. The elevated roadways were in terrible condition, but every effort was made, even at the risk of life, to get the fire under control as soon as possible. Along Union avenue, under the elevated road, is a six-inch water main, and also a gas main. We had to fight the fire from the West and North sides because if this main had broken we would have been shut off from a large supply of water. To make the matter worse the gas main broke and spread the flames under the roadway for fully an hour This occupied a great deal of our atten-

Chief Campbell was reluctant to make a direct statement contradicting the alle-gations of Kadderly, saying that if any one wished to make an investigation he would be willing to be submitted to any questioning and could show where Kad-derly knew not whereof he was speak-

Said Chief Holden: "Not a branch of the department would be 30 minutes late to any fire. If it were it would be laughed out of existence by other mem-bers of the department. It makes not an iota of difference whether it is a palace that burns or a shanty the department will respond to a call of fire from one as soon as it will from another. I will leave it to my chief to contradict the statements of Mr. Kadderly, but I can say this much that the department say this much that the department was conducted admirably and no difficulty was experienced whatever in making connections with any hydrants or stations, and that the fire was fough scientifically in every particular."

DESIRE ROADWAY REPAIRED

Only Narrow Alley on Union Avenue Now Left Open.

There is urgent need for the immediate repair of the Union-avenue elevated road-way between Stark and Oak streets. Only one-half of this roadway now is left for the use of the public, the other half having been damaged by the fire so it is dangerous and cannot be used. There is left a narrow alley about 30 feet wide for all the traffic in that portion of East Portland, since the fire destroyed Grand avenue and part of Union avenue. It is constantly crowded with vehicles moving in both directions, besides pedestrians, causing great inconvenience.

What remains of the Union-avenue elemants madden does not make to be very

substantial, but just how much damage has been done can be easily ascertained. The public is anxious that this roadway should be repaired the full width as soon as possible, as it is the only avenue left the transaction of business between East Morrison and Burnaide streets, with-out traveling out to East Eighth street. Business men of the district are partic-
