Money rates were stiffly held and the fore stoney rates were stirlly held and the loce-cast of the currency movement for the week indicated the expected heavy decline in cash reserves by the banks. But it was inferred from the absence of flurry in the call money market that the supply of cash was fully abreast of money market needs. The esti-

mates of the currency movement covers five days and includes a loss in sub-Treasury operations of \$4.385,000. On the direct movement by express, the banks have continued to loss and it is believed that the drain has been sufficient to bring the total loss in cash to considerably over \$7,000,000, which would be more than sufficient to wise out the sur-

to considerably over \$7,000,000, which would be more than sufficient to wipe out the surplus as it stood last week without a reduction in the reserve requirements which would conserve the surplus. Reduction of deposits by loan contraction on a large scale is confidently expected, however, as a feature of temorrow's bank statement.

A brisk rally in the price of copper in the Lendon market was a help to Amaignmated Copper here. A good effect was produced also by the report of a settlement of the freight rate disputs as between the Guif and Atlantic port railroads. The absence of any renewed selling pressure on the market encouraged some fresh buying late in the day, and the closing was strong at the top level. closing was strong at the top level. Bonds were irregular. Total sales, par value, \$2.735,000. United States bonds were all unchanged on call.

IMPROVEMENT REPORTED IN ALMOST EVERY LINE.

Liberal Consumption Causes Slight Rise in Commodity Prices. Firm Tone in Hides.

NEW YORK Sept 8.—Dun's weekly review of trade tomorrow will say:
Commercial news is most satisfactory, improvement being reported in almost every case, except the further decline in the prices of securities. Crops are being harvested undr most, favorable conditions and a few weeks more without severe front will put the rield of corn and colton beyond danger. Considering the prosperous conditions, labor struggles are exceptionally few.
Liberal consumption has caused a further slight rise in the level of commodity prices. Dun's index number on September 1 advancing to \$100,308 from \$90,546 a month previous and \$70,822 a year ago, when husiness was much less vigorous.
