Top Grade of City Creamery Raised to 32 1-2 Cents.

LOCAL SUPPLY IS SHORT

Oats Weaker Notwithstanding in Valley Farmers Refuse to Sell. Barley Active and Steady. Wheat Moderate.

BUTTER-Top city grade advanced, EGGS-Fresh stock in active de-

POULTRY-Lively movement ex-FRUIT-Three care of bananas ar-

POTATOES -Market dull and prices NUTS-First car of new almonds

The expected advance in extra creamery local made, will take place this Butter, local made, will take place this morning. One of the city creameries has sent out a new price list effective today, quoting the top grade at 32% cents, with no changes in the other grades. The market has been strong for some time with a great scarcity of fancy butter. Eastern butter is plentiful yet, but a certain class of trade demands butter of local manufacture.

The egg market moves along evenly with

The egg market moves along evenly with an antive inquiry for strictly fresh stock at top prices, but held eggs, of which too many are coming in, are hard to dispose of. There was no poultry market yesterday, as no stock was carried over and none came in. If promises are fulfilled, the week will be a sufficient one in this line.

WEEK WAS GOOD FOR FARM WORK. Late Crops Matured Rapidly-Hop and Prune

Picking Under Way.

Oregon section, says in part: The temperatures during the week were higher than usual and no rain fell, except a small amount near the immediate coast. The warm and dry weather caused late crops to mature rapidly, and hop-picking is now general and pruneptcking has begun in many orchards. No lice or mold is reported in the hops and the crop is turning out better than expected & few weeks ago. With another week or ten days of favorable weather the bulk of the hop crop will be mafely bouned. nes indicate yields better than last year, but considerably less than a full crop. Threshing is now practically completed and the grain crop, it is thought, will about equal that of last year. Passurage is very short and stock is losing flesh, especially districts, where the supply of milk is even less than usual at this time of the year. Corn is doing well and the crop of mature will be larger than usual, if the weather ontinues good for a week or two longer. Potatoes hadly need rain and this crop is its condition being dependent upon the soil and the time of planting. Potatoes planted late on high land are the poorest. Pears are plentiful. Apples are small in size and about half of a full crop of latsurjeties is indicated.

LARGE OFFERINGS OF OATS.

Plenty Came From East of Mountains, Though Valley Farmers Hold.

hough many Willamette Valley farmers market has weakened, though dealers quote unchanged prices. The valley pool contains from 25,000 to 30,000 bushels and the members of it expect much higher prices. Even without the large receipts from the eastern counties, dealers do not believe that oats would be much higher, as many buyers would take harley instead. In fact trading in barley is heavy, as there is considerable difference in price. This activity in barley is keeping the price of that occeal steady in the face of good receipts. The hay market tains are very large and the local the face of good receipts. The hay market is weak, as arrivals are in excess of the

back their supplies has caused some decrease in the activity of the market. Prices

only change reported in milifeed was m decline in chop to \$15 per ton.

FRUIT IN GOOD DEMAND. Four Cars of Banamas Arrive, Most of the

The demand for fruit was good yesterday

and most of the receipts cleaned up. About

ground cherries were also on the street.

The potato market is not in good shape and prices are almost wholly nominal on Front street. The local demand is small and is being filled now by farmers. Johbers are quoting 65@70 cents for fancy stock.

The first car of new crop almonds of the arrived yesterday and was distributed. season arrived yesterday and was distributed slong the street.

Bank clearings of the Northwestern cities resterday were as follows:

Foreign Banks Take Steps to Accumulate Reserves.

ANTICIPATE LARGE LOANS

Money Situation Continues to Dominate New York Stock Market. Lack of Selling Pressure Checks Bears.

NEW YORK, Sept. 11.-The stock murket remained under the shadow of the money situation today. The influence was mostly sentimental as there was little disturbance of cans and no notable change in the rate for money. The principal event of the day in in the official discount rate of the Imperial Bank of Germany from 3 to 4 per cent. It was generally expected that after the rise is the Bank of England rate the German insti tution would raise the rate, but the advance tution woold raise the rate, but the advance of a fill I per cent was not expected.

The incident is a movement in the international contest new developing between the world's money markets. The great foreign banks seem to desire to accumulate reserves in preparation for large government and other loans to be floated. It is clear that they will have to contend with pressure from New York to other additional to the content with pressure from New York to other additional to the content with pressure from New York to other additional to the content of the co

do this. Probably the action of the English and the German banks was partly a defensive measure against New York's demands. It did not prevent a forther violent break in foreign exchange rates here in New York which carried the price of demand scerling within measurable distance of the rate at which gold could be engaged for import at It is expected that before that rate

advanced in the London market today as one such obstacle.

It is believed that the holdings by an underwriting syndicate of railroad bothla have been transferred in large volume alroad either for delivery to purchasers or to hold with funds borrowed in foreign markets. The effect would be to refease large borrowings by the syndicate in the market. The bills offered in the exchange market which caused today's break were most of them bathers. today's break were most of them bankers bills, which means that they represented fur-ther borrowings of foreign funos. This is a process which anticipates the making of prices by an outward movement of commodities later

tain to continue for several weeks. It was this discouraging prospect which carried prical downward through early dealings. The jack of orgency in the seiling and some large individual buying of a few stocks of an impressive character held the bears in check and the market set about a dull recovery about midway of the cession. The Government crop report had its part in this, the condition both of own and Spring wheat being regarden ability holding the previous promise. Some positive strength in Canadian Pacific, St. Paul and Smelting, and a notable absorption of Eric and a strong sympathetic effect on the re-covery. Prices were carried generally above Saturday and the closing, waich was slightly

tregular, was at a higher level.

Honds were easy. Your cales, pur value, \$1,625,660. United States bonds were all un-

Posted CHICAGO, Sept. 11.—The wheat market opened firm, and as trading advanced additional strength developed. At the opening December was unchanged to 4c higher at 825c to 825c. Pit traders and commission because were fairly active bidders. The demand was due largely to a report made by a statistical committee amountant by the Russialistical committee amountant by the Russialistical committee amountant by the Russialistical committees. rnment bonds, steady; railroad bonds, statistical committee appointed by the Russian government. The committee was instructed to estimate the total rield of Russian corcals. The report of the committee showed a shortage of 12.800,000 hushels in Winter wheat, as compared with last year's total. In Spring wheat, the deficiency was estimated at 123,200,000 bushels. The effect of these figures was completely to offset the depressing influence of lower quotations at Liverpool and neutralize the marked effect of clear weather in the Northwest. As the upward trend gained headway, an influential buil became quite active on the buying side. In consequence, sellers became more wary, the result was a steady advance in prices. The Government crop report was about as had tatistical committee appointed by the Rus LONDON, Sept. 11.-Bar silver, steady, 28%4 Money, I per cent. YOUR FIRE INSURANCE POLICY OUGHT TO SUGGEST

Room 4, Ground Floor

Your CREDIT INSURANCE Profits

perhaps never. Protection against daily, hourly hazard is protection.

Some Manufacturers and Wholesalers say, "We don't lose often enough to justify taking Credit Insurance,"

-Do you die often enough to justify Life Insurance? -Do you burn out often enough to take Fire insurance? Insurance is to cover a certain risk—to protect you from a calamity.

Any moment may bring the news of a loss that will wipe out your year's profit—or several year's. Without warning, from a quarter you least expect—sooner or later it will come. Think of this seriously.

in your business.

Our Credit-Indemnity Bond

Protects Profits from the greatest dan-ger that threatens them. Is clear, concise and positive; no am-

biguous clauses.

Covers all forms of insolvency and discommode your business.

Investigate Credit Insurance and you will adopt it. Our bookiet "Collateral on Merchandles Accounts," tells the whole story.

Payments to Policyholders Past Three Years \$2,127,930.00, which means that

Average Condition of Spring Wheat When Harvested Is 87.3-Corn Makes Good Showing.

WASHINGTON, Sept. 11.—The Department of Agriculture at moon today issued the following crop bullerin.

The crop estimating board of the Bureau of Statistics of the Department of Agriculture finds from the reports of the correspond. cnix and agents of the bureau as follows:

The condition of cosm on September 1 was 88.5, as compared with 50 hat month, 84.6 on September 1 1904; 80.1 at the corresponding date in 1903, and a 10-year average of 81.7.

The average condition of Spring wheat when harvested was 87.3. This is the second year that Spring wheat has been separately reported upon on September 1. Comparison can therefore only be made with the condition one month ago, which was 88.2 and

can therefore only be made with the condition one month ago, which was \$8.2 and with that reported September 1, 1904, which was \$6.2. The condition of the five principal states is reported as follows: Minnesota, \$4; North Dakota, \$9; South Dakota, \$9; South Dakota, \$9.5 south Da

ago.
The average condition of flax on September was 94, as compared with 85.8 on September 1, 1994.
