SEA LEVEL CANA

Foreign Experts on Board Said to Favor This Plan. -

QUESTION YET UNSETTLED

Commission Will Leave for the Isthmus of Panama About September 27-Studying the Plans and Data.

WASHINGTON, Sept. 15 .- A majority of the foreign members of the consulting board of engineers of the Isthmian canal appear to favor a sea-level canal No attempt has yet been made to pass upon this question at any of the regular board meetings, but the fact is that the majority of the foreign delegates who have been closely studying the wast amount of data collected and laid before the board by the canal commisgion are at present of the opinion that a sea-level canal would be better than a lock canal.

The board met today for the first time in a week in Washington and talked about dams. A decision on this guestion of dams was, however, postoned until the board has visited the sthmus. The members expect to sall from New York with the canal commission September 26 or 27. Next Weinesday Buneau Varilla and Linden W. Bates will explain to the board their respective plans of canal con-

NO MORE PANAMA FOR HIM

Salem Plumber Tells of His Experience on the Isthmus.

BALEM. Or., Sept. 15 .- (Special.)-"I Bon't believe I want any more of life in Panama." says John Kaiser, a well-known resident of Salem, who returned yesterday from the Isthmus, where he had been for several months working as a plumber on Government works. "The opportunities for a workman, skilled or unskilled, are as a rule no better in Pan-ama than they are here, and the mar who goes to that climate must face un usual dangers of disease and perhaps death. There is nothing pleasant in conman must endure the unpleasant features of life in the tropics without increasing his wages enough to justify going to that

"As has been said in the papers, sank tary conditions in the Canal Zone are being rapidly improved, but they are still far from perfect. Even under improved conditions the American who goes there must take the greatest precautions to ward off malaria, yellow fever and bubonic plague. If a man will take care of himself he can keep well, but most men get careless after a while and then they

Mr. Kaiser was employed by the depart ment engaged in improving the sanitary conditions. As a plumber he received 56 cents an hour, which, he says, is no more than a man could earn on similar work in this country. He knows of no occu-pation at which a working man can do setter in Panama than he can in America.

Mr. Kaiser continued: "Though the temperature is perhaps not much higher in Panama than it is in this country, the heaf is much more oppressive. The atmosphere carries so much moisture that a pair of blacked shoes left unused a week will be entirely covered with moid. The meat of beef cattle is apongy and tough and not at all palatable. The water, even though purified, is warm and unpleasant to drink.

There isonly one line of business in which I thought I saw an opportunity for Americans, and that was in the establish. ment of eating houses on an American plan. Americans on the Isthmus would patronize such houses.

"Every steamer going to Panama car-ies many Americans, but every steamer oming from there carries nearly as many more. It takes most men about three months to get all they want of that clinate and country. I would rather work ten hours for \$3 in Salem than eight hours for \$5 in Panama, and would save ch money here as there. That tells

CHARGES AGAINST YOUNG.

Commander of Bennington to B Tried for Neglect of Duty.

WASHINGTON Sept. 15.—The Navy Department today made public the folcharges and specifications on Commander Lucien Young who inded the gunboat Bernington, which was blown up by a boiler exploxion in San Diego harbor, will be tried before naval court-martial ordered convened at San Francisco today

Charge-Neglect of duty.

Reciting first, that Commander Young failed to enforce paragraph nine, article 1606. United States Navy regulations, which provides that all valves throughout the engineering department are to be re moved at least once each week; second, that he falled to enforce paragraph two, article 1609, providing that the safety valves will be partially lifted by the hand gear at least once each week, when not under steam, to insure their good working order; third, and fourth, that he falled to enforce other provisions of the regulations (Article 652%) under which it was his duty to see that sentinel valves were kept in good condition and efficient working order, and fifth that he failed to comply with the provisions of the regu-lations found in article 437, and article 570, requiring the commanding officer to approve the smooth log and, sixth, that he falled to give such orders and precautionary instructions as were appro-priate and necessary to insure the effi-cient condition of the engineering de-partment of the vessel under his command for the efficiency of which he was charged with responsibility."

HAS NO FEAR OF COMPETITION

Germany Not Alarmed at American Trade in South America. BERLIN, Sept. 15 .- The action of Presi-

dent Roosevelt in sending Judge William L. Penfield, solicitor of the State Depart-ment, to investigate the trade relations setween the countries of South America between the cou and those of Europe, with the view of improving commerce with the countries lying to the south of the United States, has attracted considerable attention here. The Central Bureau for the preparation of commercial treaties a private organization, representing the views of a large section of Germany, declares the mission of Judge Penfield is an indication that the authorities at Washington mean to go forward "full ateam shead" to capture the South American markets. Nev-

go forward "full steam shead" to capture the South American markets. Nevertheless, it is pointed out by the bureau,
the action of the American Government
falls to find an adequate echo in the
American business world, and it adds
that there are many indications that the
commercial classes will not avail themselves of the advantages open to them
through governmental action.
The bureau calls attention to the reci-

procity treaty, between Cuba and the United States, which, although offering a heavy discrimination in favor of American imports, has not damaged the trade in German and other European goods to the extent apprehended, but that, on the contrary, imports from Germany are actually increasing in spite of the treaty. According to the bureau this proves that competition from the United States need not be feared in South America.

CZAR THROWS DOWN BARS.

Ukase Immediately Repeals Retalia tory Duties Against America.

ST. PETERSBURG, Sept. 15.—An imperial ukase abolishing the retaliatory duties on American imports was gazetted today, and was placed in immediate effect at all the Custom-Houses by telegraphic orders from the Ministry of Finance. The

Difference in Department Contracts Causes a Scandal.

WASHINGTON, Sept. 15 .- (Special.)-The Keep Commission, engaged in investigating departmental methods and inaugurating reforms, particularly in the purchase of supplies, has discovered differences in prices of supplies ranging from 20 to 100 per cent. All departments buy inder the same methods, letting contracts to the lowest responsible bidder, yet variations in prices of specific articles as bought for different departments are said to be nothing less than sensational in filiustrating the inadequacy of present methods. It is the plan of the commission to recommend that supplies be standardized as far as possible, and that a central purchasing office buy them for all depart-

President Butler said that in the Em-peror's opinion the United States is held in high regard by all the countries of Europe and that by the making of the Russo-Japanese peace treaty possible, this country had been bound closer than ever before to the old world.

Descritons Due to Poor Pay.

WASHINGTON, Sept. 15 .- General Frederick Punston, commanding the Department of California, in his annual report, quotes from his Judge-Advocate regarding desertions from the Army. The latter ascribes desertions to the poor pay received by enlisted men combared to what men receive in civil occupations. General Funston says the buildings at the Presidio, San Francisco, are not a credit to the United States and should be replaced. There is no further reason for maintaining the should be abandoned.

Chief of Police of Panama.

NEW YORK, Sept. 15 .- Policeman Jiminer, of this city, has been appointed Chief of Police of Panama. He was so notified yesterday by Consul-General Am-ador. He is the second policeman select-ed from the New York force for the Republic of Panama. The former, Sergeant Davis, died of yellow fever, after a short stay in the Isthmus. Jimines is a Spanlard and does not fear the disease.

Komura Said to Be Committing Slow Suicide.

TAKES HINT FROM JAPAN

Fellow-Countryman Says Peace En voy Takes Denunciation of Treaty as Disgrace and Has Taken Poison.

SIOUX CITY, Ia., Sept. 15.—(Special.)— Baron Komura, the Japanese peace pienipotentiary, is committing slow suicide, ac cording to Takashita, manager of a troupe of vaudeville performers now appearing here. Takashita is highly educated and speaks English. In the course of an in terview today regarding conditions in Japan, he inquired solicitously regarding the condition of Komura. He was told
