AT THE HOTELS.

Fully 2000 spectators attended the wrestling tournament at the Lewis and
Clark Exposition last night, and saw several of the finest and most interesting
exhibitions of the science of wrestling
that have ever taken place on the Facific Coast. The wrestling was pulled off
in the Auditorium, and last night's contests conclude the tournament which began Monday. It was held under the auspices of the Lewis and Clark Exposition,
with H. W. Kerrigan, manager of the
athietics, in direct charge.

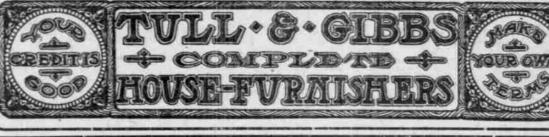

Edgar Frank, the clever little Multnomah boy, added more laurels to his altready long string of victories, in defeatling Barney, of the Olympic Club, in the
125-pound class. The interest centered
upon this match, and remarkable enthusiand was displayed at all times. Naturally Frank was the favorite, but his
doughty little antagonist was greeted by
considerable applause because of his
degree, and from the very beginning it
could be plainly seen that he would come
out the winner. He had Barney on the
floor early in the first bout, and, nithough
they wrested the time limit, neither could
gain a decision. It is generally conceded
that Frank had the best of the bout from
the beginning to the end, because he was

Buck's Heaters AN ECONOMICAL AND SUCCESSFUL SYSTEM OF HEATING

In this modern Heater is combined the true "hot blast" principle. By this principle the cold air, which is always near the floor, is drawn into the stove. Thus there is a constant circulation in your room, a most important feature from a health-giving standpoint and insures against dead air in the room. Thirty-eight per cent of heating power in soft coal is lost in ordinary heaters by being permitted to pass up the chimney in the form of gas, smoke and soot. This is saved in the Buck's "Hot Blast," thus effecting economy in fuel. Handsome in finish and perfect in construction, the prices of the Buck's "Hot Blast" are, \$16.00, \$18.00, \$23.00, \$26.00 and upward to \$40.00
