New York Banker Says Grafter Means Thief.

# PLUNDER BY THE TARIFF

At Convention, Financier Denounce: Recent Developments of High Finance as Dishonest and National Peril.

ANNAPOLIS, Md., Oct. 5 -- Dishonesty in high places in the state, the judiciary and great financial institutions and corporations and palliation of such acts by the masses gravely threaten the future of the country, according to views ex-pressed today by J. Edward Simmons, president of the Fourth National Bank of New York, in an address before the Maryland Bankers' Association. He pointed to the lessons taught by the fall of the ancient Roman republic, the reign of terror in France and the disasters which befell Russian arms in the recent conflict in the Far East, all of which, he said, were due sto palliated dishonesty. He spoke on "Honesty Is the Best Policy," and said:

I hear voices from the East and voices from the West, ill-boding voices, voices from the pulpit and the divine, voices from the college and the educator, voices from the college and the educator, voices from the brush and its bar, voices from the press and its sages, the voice of the President himself, denouncing is ringing tones and deploring the universal spread of selfshness in its meanest and most regulate form—that form of dishonesty. They bewall one universal cambival of dishonesty. Alas, the voices are not unconfirmed.

# Sugar-Coating Name Thief.

He deplored the conditions which have led men to tolerate the terms "graft" and "grafters," and said he feared the very use of the works was an indication of men's tolerance of a thief and his trade. He called upon the members of the association to give their assistance in remedying a condition which makes it possible "for men who pose as the salt of the earth and who condemn, without

of the earth and who condemn, without reserve, those who steal \$50 or forge a check for \$100, or accept a bribe, who themselves make millions by lying, by missepresentation, by frabd and by bribery, without receiving punishment or even criticism, while the man who steals the pairry sum is sent to jail.

He denounced the men of stainless private life who, "In the interest of corporations, of the trusts, of the gas company, of the railroad company, of the insurance company, have recourse to every villiany named in the decalogue; who do the deeds of the highwayman with the air of a saint."

# Trusts Foster Socialism.

Mr. Simmons said that the workings and dangers of great corporations and multi-millionaires' enterprises have not been and are not as fully understood as their advantages. He believed that their dark side has not been investigated and set out as lucidly and forcibly as their bright side.

bright side.

He referred to the growth of the So-clalist movement as shown by the last Presidential elections as due largely to the fact that the masses see large fortunes accumulated by dishonest means, and, when so accumulated, combined to smother individual enterprise. He besmother individual enterprise. He believed, however, that the situation is not
without hope, as the very fact that the
country has awakened to the conditions
and that fearless and able men are organizing and leading a campaign against
dishonesty are grounds for hope that a
far-reaching process has already begun.
Mr. Simmons discussed the tariff, scoring
severely those, who debauch the Legislature to enact laws crushing their competitors in business or to exact tribute
from their fellow-citizens under the name
of duty. He said:

of duty. He said:

of duty. He said:

I recognize readily the vast blessings which union or consolidation for business purposes, if properly guarded and honestly conducted, may bring upon the Nation. We must not forget, however, that all trusts are menopolistic in tendency, and thus almost every industrial consolidation that has been effected has had for its object the curtailment of competition, and, when no competition exists, then monopoly prevails.

# Tariff for Plunder of Poor.

Under each circumstance it may be unjustifiable to make a tariff protect an industry, but I beid that no tariff is justified that has not for its sole aim the advantage of the accessities of our country in its entirely. The man who imposes a duty or leads another, with or without a brite, to impose a duty in order to fill his pockets, is lishonest, and all the more baneful is his dishonesty because he extracts his plunder, without danger to himself, from the poorer classes, who cannot resist. He does the deed of a highwayman with the air of a saint, and poses before his fellow-citizens with a self-eatished mise and surrounds his head with a self-cated halo.

While the situation that confronts us is undoubtedly serious, we cannot meet it by adopting pessimistic views. We certainly should not catagerate the evils that exist to the point of discouragement, but we should recognize their existence and should not under-rate their magnitude, comforting ourselves with the thought that gradual amelioration must come, as it slways has come, with persistence and intelligent efforts. The very fact that the nountry has awakened to the precalling conditions and that fearliess and able men are organizing and leading a campaign against them are grounds for hope that a far-reaching remedial process has already begun.

Walla Walla Valley Settlers Object to Circuit Court.

SALEM, Or., Oct. 5.—(Special.)—State Engineer J. H. Lewis returned today from the Deschutes country, where he investigated the irrigation systems being constructed under the provisions of the Carey act and the state irriga-tion law. Mr. Lewis will not now make public his conclusions upon the several questions that have arisen, but will probably report to the State Land Board at its meeting next Tuesday.

Mr. Lewis is in receipt of a copy of a motion filed by numerous settlers in the Walla Walla Valley, asking that the Circuit Court rescind its order directing a survey of the Walla Walla River to ascertain the water rights of the several water-users. The motion is based upon the reason that the survey will be too expensive a burden upon the settlers, who have not asked that the survey be made.

Mr. Lewis said today that the cost of the survey would be from the total of the survey would be from 10 to 15 cents an acre. He thinks an accurate survey necessary because the total amount of water and the amount to which each settler is entitled cannot be definitely determined by any other method.
