the bottom of the river. Testimony taken at the Government Inspectors' investigation yesterday revealed the fact that the mammoth and costly dredge was in charge of a man who failed to comply with the law showing lights while under tow. This apparently throws the expense of raising or replacing the Manzanita on the Port of Portland, and while the cost will run into many thousands dollars, it will be much less than would have been the case had the dredge gone to the bottom. It might have been economy on the part of the commission to spend more money in salary for a man who was familiar with the simplest rules of river navigation, instead of being obliged to pay out thousands in damage caused by negligence or ignorance.

It is well understood that the idea of removing the state institutions of Oregon to Portland is not at present likely to be realized. It belongs to the domain of academic rather than practical discussion; and yet there are times when academic discussion has great value not only for the sake of the principles involved, but also to implant what Oliver Wendell Holmes has wittily called the eggs of thought in the minds of the people, to hatch when time and opportunity shall direct.

The fact that he was paid but \$55 per month in a position where he had the handling of \$100,000 per year does not mitigate the offense of the Adams Express Company clerk who stole \$105,000.
