SANITATION AT MOUNT TABOR.-The Sanitation at Mount Tabou. The Board of Directors of Mount Tabor Dis-trict No. 5, in which there are three school buildings, and 530 pupils, is wrest-ing with the problem of sanitation for the West-avenue building. Here some 200 pupils attend. The conditions of the closets has become so dangerous that closets has become so dangerous that Principal Adams has informed the di-rectors that something must be done, but the question is what can be done without sewers. It was contemplated to put in a septic tank, but the people living near-by objected and that had to be abandoned. It is a serious question with the district and it must be solved soon.

STRANGE SPITZ MURDER.-Vincent Hill, residing at 650 Umatilla street, has reported to the police the peculiar death of his Spiz dog, a valuable canine, which occurred several days ago. He believes the pet was hadly benten by some one while impounded. Dog-catchers picked up the Spitz, as it had no license. They im-pounded it, but Mr. Hill redeemed it within an hour. From that time forth it refused to cat or drink, and in two days lied. He they have the second of the control o died. He thought it so strange that he called in a veterinary, who investigated and said death was due to internal injuries, such as would easily be inflicted

INSTITUTE NEEDS LATERATURE.-The street is doing a very useful work fur-nishing literature to the crews of ships which land at Portland. Donations of which land at Portland. Donations of magazines and books of all languages are received at the Institute and then given out where they are most needed. At present there are more ships in port than can be supplied and Rev. A. E. Ber. nays, who is in charge of the Institute, is acter. There is a special need of German and French magazines and periodicals at

WHITE RIBBONERS MEET President Stevens Tells of Work to Be Done in Annual Report.

LOS ANGELES, Oct. 27.-The first lay's session of the 22d annual convention of the National Woman's Chris-tian Temperance Union was devoted to routine business. Devotional exercises, the appointment of the usual commit-tees and the hearing of various re-ports by the executive officials of the

organization occupied the entire time

organization occupied the entire time of the morning and afternoon sessions. The feature of the first session was the annual address of the president, Mrs. Lillian Stevens, of Maine. Mrs. Stevens' address recited the work of the W. C. T. U. during the last year, commented upon the various legislative measures the organization is urging both in state Legislatures and in ing both in state Legislatures and in the National Congress, and spoke very encouragingly of the future growth of the temperance movement. In her annual address Mrs. Stevens reviewed the developments of the past year and saw much reason for encouragement. She was positive in her attitude against the re-establishment of the army eaf-teen. She read letters from Secretary of War Taft and others showing that of War Taft and others, showing that Army officers as a rule claim there is more drunketness among the enlisted men since the canteen has been abolished than before, but she insisted that no statistics have been compiled to support their position.

"The attempt to restore the canteen is only a small part of the work of the liquor element of this bountry," said the president. "I confidently predict that Congress will take no adverse ac-

tion the coming Winter."

Mrs. Stevens touched on all the questions with which the temperance organization concerns itself, including Mormonism, the purity crusade, patent medicines and the Gothenburg system of regulating the liquor traffic. She declared the W. C. T. U. to be unqualifiedly opposed to the Gothenburg system, which she considered would be She saw much to encourage the advo-cates of equal suffrage, and believes the time to be near when all women, as well as men, may exercise the privi-lege of the ballot.

Reports of the National officers and heads of the departments occurred at the afternoon session.

Pilots Will Check Soundings of Engineers Sunday.

GOVERNMENT MAP ISSUED

Two Pilot Commissioners Will Accompany Tug to Verify Work Upon Which Depths Have Been Determined.

The United States Engineer's office has completed the map of the survey recently made of the Columbia River bar, and oples are now ready for distribution to masters of vessels and all interested par-ties. Duplicates of the map were sent last night to the Pilot Commissioners and the bar pilots, so that they might receive at first hand the benefit of the Governnent's work.
Although the map just issued shows a

depth of from 254 to over 36 feet at low water in the common channel over the bar, the actual depth is about six inches less, the difference being explained in the note to the map, which reads as follows: "Soundings are expressed in feet and refer to the datum plane of the zero of the mean of the lower low waters at Fort Stevens wharf. The plane of the mean of the lower low water at Fort Stevens wharf is approximately from half a foot to a foot higher than on the bar, which duce the depth shown that The further notation that "the indings have not been reduced to the mean of the lower low waters on the bar, so that comparison with pre-vious charts can be made," is self-explanatory in view of the main statement, and allows the use of the new map in conjunction with all former surveys. Heretofore all surveys of the bar have

been based on the plane of the zero at Fort Stevens, which is, as stated in the notation to the map, from half a foot to a foot (the exact measurement has never been obtained) higher than the bar zero. Realizing the meaning of this difference, the Government last year established a gauge on the jetty which would record the true bar zero, but in the storms this gauge was carried away and there has as yet been no opportunity to replace it. The bar gauge will be put in again shortly, however, but in the meantime all sur veys must necessarily be based upon the Fort Stevens zero.

The bar pilots are now looking forward to early verification of their own sound-ings previously made, or of the Governsoundings.

While supposed to be secret, it has leaked out that on Sunday morning, weather conditions permitting, two pilot commissioners and several of the bar pliots will go out from Astoria to make soundings on the bar. The main object of this pilots' survey seems to be to estab-lish to their own satisfaction the correct-ness of the official soundings. No doubt can possibly exist as to where reliability is to be placed where men skilled and unskilled are employed in a work, and with Government figures before them and the secrecy enjoined in their coming work. it is thought, among those who know, that possibly the pilots fear that they may have made a mistake.

"The only pity," said an interested par-ty yesterday, "is that the pilots have not seen fit to invite some Government offi-cials on their tug to witness the soundings. Then we would have certain knowlto who is right and wrong.

## Sultan the Meanest Man in World

Dr. John Baptist, Visiting Armenian, at the Same Time Considers Him the Greatest Diplomat

R. JOHN BAPTIST, who will lecture at the Y. M. C. A. Sunday, ta a native Armenian, and for many years was the court photographer of the Sultan of Turkey. The young Armenian once witnessed the assassination of about 800 of his countrymen because of their religious faith, and upon becoming converted, fied from the country lest he be numbered among the victims. Dr. Raptist has been in this country about nine years, and has become quite a prom-inent lecturer. One of his most famous lectures is known as "The Meanest Man in the World," and deals principally with the Sultan. His real name is Hovhanness Mugarditch Cheenegeonian, and John

Baptist is simply a translation.

The Sultan of Turkey is certainly the meanest man in the world, but I think meanest man in the world, but I think he is the greatest diplomat of modern times," said Dr. Baptist at the Hood Hotel last night. "While he is a despot and rules with almost unbelievable cruelly, he has an unusually strong intellect. He is always in great fear of being aneassinated, and is a very unhappy man. A fortune-teller once predicted that he would die of some contagious disease, and in his precautions to prevent being stricken down by any such malady he has made Constantinople one of the cleanest cities in Europe. The Sultan washes his hands about every 15 minutes. washes his hands about every is minutes.

"The Sultan has 600 wives in his harem, and I think they are the prettiest women in the world. I have photographed them time and time again, and know what they look like. Very few people have ever been in the harem. The wives all wash in milk daily, and their Sultan of Turkey."
