Coos Bay Would Then Have 30 Feet of Water on Bar.

VIEWS OF SENATOR FULTON

Harbor Can Be Made One of the Best on the Coast, With the Additional Aid of Dredging.

ASTORIA, Or., Oct. II .- (Special.) -- Senster Fulton and Collector Robb returned this afternoon from Coos Bay, where the Senator went to confer with the residents of that section regarding needed river and harbor improvements. Regard-ing what work he will recommend, Sena-

tor Fulton said this evening:
"We took soundings as we crossed the
bar going into Coos Bay about one hour before high tide, and found 26 feet on th shoal, which is about 300 yards in width I am satisfied that with the construction of a south jetty not to exceed a mile length there would soon be 35 feet water at low tide. The interior of has requires dredging, especially at two particular points. I believe that with a slight amount of dredging Coos Bay can be made one of the finest harbors on the Coast, and with the construction of the proposed south jetty its entrance can be

made an exceptionally good one.
"At the mouth of the Coquille River there is a south jetty, and the work of constructing a north jetty is now in progreas. There is at present 15 feet of water on the bar at high tide, and the channel s constantly improving. Dredging is, lowever, required inside the river, as it is impossible for laden sea craft to navigate as far as Coquille City without working the tides, all because of three principal

I shall endeavor to secure an appropriation for the construction of the proposed south jetty at Coos Bay, and for the building and operation of a suction dreage, which can be used at Coos Bay and at Coquille River."

WRIT OF REVIEW IS ORDERED

California Consolidated Mining Case Comes Up Again.

BOISE, Idaho, Oct. 31 .- (Special.) - The Supreme Court today ordered the issu-ance of a writ of review in the case of the California Consolidated Mining Company vs. Ralph T. Morgan, Judge of the First District Court of Shoshone County. and Abner G. Kearns, receiver of the Coeur d'Alene Bank. The writ is made returnable November 27.

The suit is an old one, having been started June 1, 1963. January 1, 1966. Manager Keane presented a petition to the District Court of Shosho order releasing the 3-16th interest in the California mine held by George B. Mc-Aulay and Van B. De Lashmutt from a 548,569 judgment held by the receiver of the Coeur d'Alene Bank. In consideration of this order Keane agreed to deposit in the First National Bank of Coeur d'Alene \$6000 subject to the court's order, to pro-tect the property described from all liens and judgments. The petitioner explained at that time he had an offer to sell the entire property of the company for a large sum, and could not do so until all

clouds were removed from the title, The District Court granted the order January 7, 1995, but August 1 set the order aside on a showing by the receiver of the Cocur d'Alene Bank that Kenne order and had not deposited the agreed \$172,086.18 have been paid by action of the District Court that Keans

Settlers on Irrigated Lands Are Safeguarded.

RESULT OF COMPROMISE

Many Provisions Desired by Des chutes Company Are Rejected and the State Land Board Concedes Points.

SALEM, Or., Oct. II .- (Special.)-The State Land Board and the Deschutes Ir rigation & Power Company reached an agreement regarding irrigation rules today after many long conferences and several heated arguments. The agreement is in the nature of a compromise, neither side being entirely satisfied, but the result is generally believed to be fair to both the brigation company and the settler. At any rate it settles a controversy that previously threatened the irrigation enterprise because of the uncertainties in

in the agreement reached the company adopts rules for the distribution of water and contracts for use in dealing with settlers, which rules and contracts have the approval of the State Land Board, company agrees that any settler who already made a contract with the com-pany may, if he chooses, surrender his contract and take one in the form approved by the board, the latter form being more advantageous to the settler. It is stipulated in the rules that the company shall furnish during the irrigation seaso of 100 days a sufficient quantity of water of 100 days a sufficient quantity of wa to make a depth of 1.8 feet on the land,

The board refused to put in the form of deed any of the conditions desired by the company, but, will execute simple deeds conveying the title of the state when the company's lien has been satisfied. The board also refused to declare the annual water rent charge a lien upon the land, but left this matter for the courts to decide, because the law is uncertain The matter of furnishing water for do-mestic purposes after the irrigation season was left undetermined for the same

claim of right to charge settlers interest on deferred payments where they are put in possession before metent has been issued. The board concluded that the setfiers who cannot pay in full can get a lower rate of interest from the company than it could from brokers, and since a very large proportion will be compelled to buy, on the installment plan it would be best for the settler to let the company ninke an interest agreement with those who so desire.

The members of the State Land Board feel satisfied that the settlers are fully protected by the rules and forms adopted and that though many of the provisions desired by the company have been rejected no injustice has been done the irrigation

VEGETABLE IUICE CURE FOR CONSUMPTION.

The newspapers announce

that all the prominent physicians of New York have received a circular from the New York Post Graduate Hospital giving an account of the wonderful cures of consumption through the use of the juice of raw vegetables and fruits. It seems that the treatment began by the use of potatoes, onions, beets, turnips, cabbages and celery. Later there were added sweet potatoes, apples, pineapples, carrots and parsnips, and still later rhubarb, summer squash, tomatoes, spinach, radishes, string beans and green peas in the pod.

It would seem to be absurd on its face that such treatment could be used to effectually combat consumption, yet so high an authority as Dr. Russell of the above-named hospital, who seems to have made the discovery and developed the treatment, states that eleven cases of well-developed pulmonary tuberculosis have been absolutely cured while fifty others are under treatment and progressing satisfactorily.

It is to be hoped that the long looked for cure of this dread disease has at last been found in this treatment, but the medical profession will, doubtless, be sceptical, as they are and should be on all new treatments until more than eleven cases have been cured by a combination of simple vegetable juices that contain little, if any, of the nourishment required by the consumptive. As Dr. Russell Men's blue flannel Sairts, worth says he has been the principle Men's Overalls, come quick advocate of nutrition as op- Black and tan Hose, worth 25c posed to medicine in the treatment of tuberculosis, he seems to contravert his own MEN'S FINE UNDERWEAR AT LESS theory in the use of these vegetable juices that possess such a small percentage of nutrition.

Hygiene and nutrition of the best sort are absolute reconsumption. If the laws of health are carefully observed and the body is sustained with nutritious, wholesome, easily digested food, the ravages of the disease may be arrested, even when the lung tissue is involved. There is little question that the best nutrition in the world in such cases is the old and much abused cod liver oil; not in its raw state but in the form best adapted for its immediate absorption into the body, as over. found in Scott's Emulsion of pure Norwegian cod liver oil which contains, in addition, the valuable hypophosphites You of lime and soda and glycer- Can ine. We hesitate to say that Be it will cure consumption, but | Cured after thirty years experience with it, the medical profession knows that it will arrest the progress of the disease and in its earlier stages generally effect a permanent cure. So certain are we of this that we challenge a comparative clinical test in any hospital or sanitarium where there are patients afflicted with this malady. If it will not cure more cases of consumption, if the same rules are observed, than the vegetable and fruit juice treatment, we will agree to supply the institution making the test with Scott's Emulsion free for a year. There is no doubt that Scott's Emulsion is the most concentrated form of nutrition in existence, and if consumption can be cured

at all it will do it.
