

RUMORS OF A TRANSCONTINENTAL SYSTEM ARE RIFE.

TWO COMPANIES FORMED

SALEM, Or., Nov. 5.—(Special.)—That the Portland Railway Company has an important interest in the application for a franchise for a front street in Portland is here considered no certain to be classed as a theory. Several weeks ago the electric light and street railway systems in Salem changed hands and it was then announced by the new owners that they intended to take over the Portland street railway had also become interested in the Salem plan. It was further announced that the new investors proposed the extension of the system here and had in view the construction of interurban electric railway lines.

Since that time the Portland capitalists have secured the electric light plant at Eugene and have begun surveys for a road from Salem to Portland. Much of the right of way has been secured through negotiations conducted by Mayor F. W. Waters, of this city, who is acting for the Citizens' Light & Power Company, of this city.

The main, in the business section, of the Portland street railway systems was issued from the office of the Citizens' Light & Power Company in this city the evening of the day the transfer of stock took place and there has since been no doubt here upon that subject. When, therefore, Manager Welch and Attorney McVey, representing the stock company, appeared before the Portland City Council committee and asked for a franchise for the Salem company, the inevitable conclusion was that both the Salem and the Portland railway systems would be interested in the franchise, if granted.

It has also been asserted, by an official in a position to know that the Salem-Portland electric line, which is eventually to be a Roseburg-Portland line, will in the end be made a part of a transcontinental line. The proposed continental road it is proposed to connect with, cannot be learned definitely, but it is denied that either the Southern Pacific or Gould lines have an interest in the project.

From statements that have been made it has been inferred, though perhaps without good reason, that the Willamette Valley line will be extended across the Corvallis and Eastern, but this theory is somewhat discounted by the fact that the Valley road is projected as far as Eugene.

The announcement in yesterday's Oregonian that the Willamette Valley Railway Company will be incorporated this week to construct the Portland-Salem electric line has been followed by a rumor, emanating from what seems to be an authoritative source, that two companies will be formed, one to build the road from Portland to Eugene and the other to build the road from Eugene to Corvallis and Independence.

ELECTRIC LIGHT SWINDLER Sells "Frosting" to Colfax People and Leaves Before Trial is Made.

COLFAX, Wash., Nov. 5.—(Special.)—An unscrupulous swindler who had a thriving business at 50 cents to \$1 a head, and then suddenly left town, taking the Portland train, the man reached Colfax from Lewiston, and a witness testified after noon about 5:30 o'clock, near his parents' home. Clarence and a younger brother went to a nearby potato field to dig potatoes. They took a rifle with them to shoot at any game they might come across.

They loaded their sacks of potatoes on a sled, threw the gun on top of the sacks, Clarence got on the front end of the sled and the younger boy took the front seat and drove the team. In a few moments the younger boy heard a report from the gun, and on looking around he discovered that Clarence was shot. He drove rapidly to the house, and at once a messenger was dispatched to Oregon City for a surgeon.

The boy died in 20 minutes after the accident. The coroner was notified, but he thought it unnecessary to hold an inquest as the shooting was plainly accidental.

PRAIRIE CITY HAS PURE WATER

Rock-Lined Reservoir Is 200 Feet Above the Town.

PRAIRIE CITY, Or., Nov. 5.—(Special.)—The new water system for this city is almost completed by the contractors. It is a first-class gravity system, and consists of water led from a spring of pure water through a four-inch wood pipe, about 1 1/2 miles into a 100,000-gallon reservoir, coming into the reservoir with a fall of 28 feet. The reservoir is excavated in clay-cement-gravel, on a hill 30 feet deep above the city, and lined with one-foot rock walls in line, and plastered with coats of two-inch thickness of

There Is Style

In Carpets, just as in dresses or hats. Some rooms look dignified and restful while others are hopelessly dowdy. It is chiefly a matter of carpets. You cannot be sure that you have seen the best Carpet for your rooms until you see our stock. Our carpets are chosen for their style, and you can find in our immense stock just the correct thing, no matter what price you want to pay.

Seventh and Washington Streets, Portland, Oregon.

European Plan \$1.00, \$1.50, \$2.00 per Day.

ce ment, and the bottom is covered with six inches of gravel and cement.

fight AGAINST RINDER WANES

Stories of the Captain's Arrest Come to Naught.

SEATTLE, Wash., Nov. 5.—(Special.)—Captain John H. Rinder took the HIII steamship Minnesota to sea today, setting at rest again the story that he was to be immediately arrested for naturalization frauds. That is a story that has been told with additional detail each time the Minnesota has come into port and it has collapsed just as frequently. While the big liner was in oriental waters, the story was sent out from San Francisco to the effect that Captain Rinder had deserted the boat rather than face the charges of illegal naturalization, but he brought the boat in and met a new story that he was to be arrested when the vessel docked.

The fight on Rinder is moderating. That was shown a few days ago when Captain Rinder was asked to join the Masters' and Pilots' Association, which has led in the attacks on him. As a matter of fact the meeting between the representatives of the association and Rinder was extremely cordial though they have fought bitterly in the past. Rinder called attention to the fact that there was a right on against him and declared that while this existed he could not consider joining any other association. The masters and pilots acknowledged his position.

El Paso Opera-House Burned.

EL PASO, Tex., Nov. 5.—The Myar Opera-House, erected in 1877, and considered one of the finest buildings between San Antonio, Texas, and Los Angeles, was totally destroyed by fire last night. Besides the playhouse and a hotel, there was a number of stores located in the building. The total loss is over \$100,000. The guests of the hotel were unable to save anything.
