ST, PETERSBURG, Jan. 23.-The attitude of the Russian people toward the monarchy, showing that the peasant as well as the soldier would be quick to resent anything directed against the person of the "Little Father," has been recognized by the Constitutional Democratic convention now in session here, which today, in spite of the objections of many Repub lican delegates, incorporated in its platform a clause declaring that "Ruseia is a constitutional parliamentary monarchy."

#### American Manufacturer Foresees Troublous Times for Empire.

MOSCOW, Jan. 21.—Alexander Barry, a naturalized American who is among the prominent manufacturers of Moscow, takes an exceedingly gloomy view of the situation here. Mr. Barry employs from 2009 to 3000 men, and unquestionably has a more profound knowledge of Russian conditions than any American in the empire. He is convinced that the Russian are not ripe for a full constitutional regime.

"The opening of the flood gates of agita-tion by the publication of the imperial reform manifesto only serves to demoralize portion of the masses who had already been disturbed by the agitators," he declared in an interview today. Continuing,

'The ignorant masses really have none of the political aspirations attributed to them by the agliators, but owing to their poverty, they are easy prey to the ap-peals for liberty, which for them means license. That they neither understand nor care for true political rights is shown by the fact that in Moscow less than 10 per cent, and in the provinces not over 2 per cent of the qualified voters will regis-Consequently it can be taken for granted that the National Assembly will e overwhelmingly conservative, and will ne an institution to register the de

"This in turn is sure to drive into the camp of the extremists the Liberals, intellectual classes and the visionary, imprac-ticable class, with ill-digested political ideals, who throughout the crisis and since the issuance of the reform manifesto have stood idly by exercising no influence of restraint. The revolutionary agitation will then take on a more dangerous phase. "Up to the present time it has been a mistake to imagine that the revolutionary ideas had taken deep root in the army. The agitation has been cleverly manipulated to give it that appearance. Like benzine rubbed on the surface, it is very inflammable, but soon evaporates if not set fire. Already some of the mines near Fairbanks have light furnished them by the Tanana Electric Company, and along one creek alone the wires are strung along for a distance of nine miles. In the Winter electricity will be generated by electricity, and in the Summer water power will be used. The electricity which is now furnished the mines by the c pany is generated by steam, as work only begun on the installation of the water power plant.
