Factors tending to strengthen the market were an advance in the price of wheat at Liverpool and the reports of zero weather in Kansas and Nebraska. The weekly statistics, however, furnished encuiragement for the bears. The world's shipments for the week were 12,448,000 bushels, against 9,200,000 for the corresponding week of last year, and the amount of breaktuffs on ocean passage showed an increase of 4,388,000 bushels. Poor demand for cash wheat at the principal grain centers of the United States increased the selling movement, and prices steadily declined. The low point of the day for May was reached at SPASANC. The market closed weak with May at SPAC, a less of \$450c. The following Rvestock prices were quoted yesterday in the local market:
