THE MORNING OREGONIAN, TUESDAY, FEBRUARY 20, 1906.

est to see what will be the outcome of some of the railroad building that is going on in the State of Washington. The old heads and the wise ones think that they can see more than appears on the surface They are watching, with a good deal of interest, the developments around Spokane. There are several projects under way in that district, including the Spokane & International, the Spokane & Inland and the Spokane & Big Bend. Some of these may be entirely local in nature, but it is known that the Spokane & International is very intimately connected with the Canadian Pacific, and there is a possibility that some of the others may have more than ordinary significance when all is known about them.

The following table gives the projected illeage of the different roads mentioned here as well as the character of the road and the state of construction: Spokane & International, steam, 140

miles, graded. Spokane & Inland, steam and electric, 100 miles partly built.

Spokane & Big Bend, electric, 100 miles. projected

Open Palouse and Big Bend.

The Snokane & Inland is very largely backed by F. A. Biackwell, one of the prominent capitalists of Spokane. He is esident of the Coeur d'Alene & Spokane, and also of the Howard Lumber Company, which owns very large tracts of timber in the State of Idaho. The line will run southeast from Spokane for a distance of about 100 miles into the Palous country. Its course will lie between the Oregon Raliway & Navigation and the Northern Pacific, and some question the possibility of its success, were it not regarded as practically certain that it is working in harmony with the timber interests in that section. The Potlatch Lumber Company has large supplies of timber, and this new road will probably get the most of the lumber haul from the Potlatch country up to Spokane. A novel feature in connection with the road will be that it will carry passengers in the daytime by electricity, and at night will haul lumber and other freight traffic by steam. This company has a contract with the Washington Water rower

Company for electric power. The Spokane & Big Bend is merely a project as yet, as no construction work has been done. So far it appears to have gone little farther than to secure provision for sufficient power from the Wash-

which it would have to build is already very well occupied or will be probably in the near future. CHECK EVIL OF DIVORCE National Convention Meets to Draft Charge Against A. McCafferty Uniform State Law. WASHINGTON, Feb. 19.-Governor Sam uel W. Pennypacker, of Pennsylvania, was chosen president of the Congress or Uniform Divorce Laws, which convened here today. He outlined the objects of the Congress. The initiative had been taken

In Pennsylvania, he said, and 42 states and the District of Columbia had sent delegates. Continuing, he said: Of the three states which are unrep one, South Carolina, does not permit divorce-ment for any cause and, therefore, only two of the 45 states have failed to indicate an appreciation of the significance of the movemeet upon which you have embarked. The dissolution of the marriage tie has become so common as to be regarded as an ordinary

so common as to be regarded as an ordinary event, awakening no comment and meeting with little or no disaporval. There are more divorces granted annually in the United States of America than in any other country upon earth except Japan. A writer who has investigated the subject de-clares that at the time of the census of 1900 there are 198.184 divorced persons living in the United States; that there were nearly 70,000 divorces granted in 1903 and that the proportion of divorces to marriages is increas-ing with alarming rapidity. We may well re-gard such degeneracy in morals and such loss of that fiber which gives character to a Na-tion with the gravest apprehension. with the gravest apprehension.

Albert R. Dabney, California, was elected vice-president. The resolutions com-mittee includes J. F. Alishee, Idaho; O. J. Kraemer, Oregon, and I. N. Gillette, Cal. A resolution was adopted appointing a ittee to draw up a uniform marriage license. The delegates called on President Roose

velt this afternoon, being introduced by Mr. Pennypacker. The President wished them ood-speed in their work, but made no formal remarks.

Winner at Ascot.

LOS ANGELES, Cal., Feb. 11 .- C. E. Durnell, alleged by McCafferty and others with being in collusion with Ascot track officials in fixing handlcaps on horses. created a sensation after the fifth race today, when he secured the horse. The Hueguenot, the winner of the race, for the purpose, he declared, of proving that he had been "doped." The Huguenot was running in McCafferty's colors. When Durnell had the horse knocked down to him he said:

"I got this horse to prove that he had been 'doped.' If necessary to prove it I will have him killed and disacted." Durnell invited several prominent vet-erinarians to examine The Huguenot, and they decided that "dope" had been

In connection with the local turf scan-dal, Manager J. W. Brooks made the fol-lowing statement to the Associated Press

tonight: "I want to say at the very outset that there is not a word of truth in the pub-lished statement signed by J. J. Mc-Cafferty, Charles Boots and H. McDan-iel, alleging I have an interest in certain purses raised at Ascot and that I have been in collusion with C. E. Durnall and been in collusion with C. E. Durnell and W. T. Williams in the matter of fixing the weights of horses entered by these

two stables in handlcaps and stakes. "If these men who have stirred up this trouble can prove that I own one hair of a racehorse, or that I bet one cent on Bear Catcher to beat Handmarra in the special match race, I will forfeit in the special match race, I will interest \$500 to any charity in Los Angeles. Fur-thermore, unless they do prove these charges they name within the next 48 hours, I shall ask that they be ruled off the turf for life. If I cannot get that sort of a ruling here I shall carry it to San Prancisco and ask that they be

San Francisco and ask that they be barred from ever racing again. "I was told today by K. I. Holland. Joseph H. James, Denny Bros, and others whose names were used as sub-

stantiating the charges of these men, that they knew nothing of the matter, were not dissatisfied, and had never been asociated with the malcontents.

"January 9 the men making these charges appealed to the directors against the alleged favoritism of the handicap-per, alleging that Williams' and Durper, alleging that Williams and Dur-nell's horses were being given a big advantage in weight allotments in handl-caps and stakes. At that time I took the official record of the races and showed the directors that the 19 handlcaps run up to that date had been won by nine up to that date had been won by nine different stables and the six different

different stables and the six different stake events had been won by six differ-ent stables. The directors, on this show-ing, dropped the matter. "The disturbing element started out to secure the removal of Handicapper Ed-ward Jasper, who is one of the most competent handicappers in the country, as the racing men at Ascot will attest. I stated to the directors, and now re-peat, that I have had nothing whatever to do with the handicapping have never to do with the handlcapping, have never suggested the making up of a race to Jasper and in fact knew absolutely noth ing about his work until the official pro-grammes were published every two

RUSSIAN HAND-BEATEN COPPERWARE

Of the many different articles which we display and which are popularly known as "arts and crafts," there are none so oddly artistic as these hand-beaten copper pieces, such as vases, trays and steins in various sizes and odd shapes; jardinieres, bowls, candlesticks, teapots, tobacco jars and complete smoking outfits. The composition of most of these pieces is pure coper, others being inlaid with brass ornamentation. These pieces are most appropriate with the Mission design furniture, and present that crafty and handwrought appearance that lends a pleasing ornamental and distinctive effect. Of this collection there are no two pieces alike; and is worthy of the notice of all lovers of "arts and crafts."

cure terminal facilities in Spokane from the same company. The road will be built 100 miles long, and will run from Spokane through the Big Bend country to Davenport and north to the Columbia Tiver

Canadian Line to Chicago.

The most interesting, however, of all of these is the Spokane & International. which will take the Canadian Pacific into Spokane. This road is progressing rapidly toward completion. It has been delayed somewhat by the fact that the spur which was being built by the Canadian Pacific from the main line to Yakh was not finished until December, and in consequence supplies were held back. The and forced her to lead an evil life by beating road, nevertheless, is all graded, and it is confidently expected that it will be finished not later than July.

This road, it is said, will be 12 miles shorter from Spokane to St. Paul than any other line, and will make it possible for the Canadian Pacific to compete in a way that was not possible before with the Hill lines for Spokane traffic. It is said that the traffic arrangement with the Canadian Pacific is very close, and that it will be possible for passengers to go direct through from Spokane to Chicago. They will go over the Spokane & Inter-national, the Canadian Pacific and the Soo line into St. Paul, whence probably the Northwestern will be used to Chicago. This gives a new direct outlet for the Northwestern states. It means competi-tion of a vigorous sort for the Hill lines, and it suggests the possibility of curther Canadian Pacific is very close, and that it will be possible for passengers to go and it suggests the possibility of further development in connection with the competition for the traffic of the Coast cities.

May Run Trains to Portland.

The belief is gaining weight that the odd combination of the Canadian Pacific with Harriman is not altogether an impossibillity in the near future. It seems quite bility in the near future. It seems quite logical and probable that the Canadian Pacific will not be content to stop at Spokane, despite the fact that its officials have recently stated that for the present there will be no extension beyond that point. Perhaps not in the immediate future. It is likely, though, according to the view of many here, that the Canadian Pacific will form an alliance with the Harriman people, and will send its trains down over the Oregon Railroad & Navigation to Portland when the Spokane & International is completed. In this way it will be sure of getting a large share of the business of the Northern Pacific ports, and at the same time both it and the Harriman will be striking a blow at their old rivals, the Hill roads.

This feature in connection with the Spo kane & International makes it interesting to the Wall street people. There has been no announcement upon the subject, and It is not likely that anything will be said about the matter until it is an accomplished fact, but those who are used to watching such development here believe that this is the meaning of the situation. They think that, if the Canadian Pacific does not hitch up with the Union Pacific people, it will eventually make an alliance with some other line, or it will build ance with some other line, or it will build a line itself. The latter step would seem undesirable, as the territory through E. F. Winn, postmaster at Idaho Falis. a line itself. The latter step would seem

The directors of Ascot probably will meet tomorrow, when the matter will be brought before them.

Racing Men Are Fined.

LOS ANGELES. Feb. 19.-Judges A. W. Hamilton, Edward Cole and P. P. Pome-roy, of Ascot. handed down an official ruling on the protest of C. C. McCafferty against W. T. The evidence, according to the ruling, disclosed the fact that part of the money for claiming Durbar was lent to F. C. Wood by J. J. McCafferty, who, in turn, lent the money for the claim of the mare to W. T. Williams and wrote out a claim for him. Afterward Williams sold the mare to Wood and subsequently sold by Wood to J. J. McCafferty. The judges decided that this proceedure.

The judges decided that this procedure was in violation of racing rules and imposed a fine of \$1000 on W. T. Williams and \$1000 each on F. T. Wood and J. J. McCafferty, and ordered the return of the mare to the owner in whose name the mare to the owner in whose dame she ran the race in question. In another ruling concerning the horses Toupse and Cutter, claimed by C. E. Durnell from C. C. McCafferty, the last two named are fined \$1000 each.
