Aim of Germany's Insistence in Moroccan Affair.

NOT DECEIVED FRANCE

Wants Neutral Power to Name Inspector-General of Police Whom She Could Control-France Prefers Present Way.

ALGECTRAS, March III .- (Special.) -- Success or failure of the Moroccan conference still depends upon Germany. When Ger-many, in consequence of the almost universal disapproval which her position ex-cited, appeared to concede the principle of the Franco-Spanish police, the delegates supposed an agreement was at hand and all menace of war vanished. Closer scrutiny of the Austro-German proposal for an Inspector-General, particularly in the light of Herr von Radowitz's private description of this functionary, showed that Germany continued to demand the oternationalization of Morocco.

It is expected that France's opposition

to such a scheme will finally lead Germany to abandon it, but in the meantimany to abandon it, but in the meantime the state of tension and uncertainty has been resumed. If Germany insists that the Inspector-General possess the right to control the police, no settlement can be amicably effected. The French will not permit a stalking borse in the form of a supreme executive officer to enter Morocco with Germany behind him disguised as Sweden, Holland or Switz-erland. To allow this would be to allow the Kaiser to accomplish by a trick what he has been powerless to achieve openly. The neutral delegates are anxious that Prance shall not be unyielding as to nonessentials, but realize that Germany's latest move looks like a subtle attempt to attenuate the French position until the world will be unable to see it, while leaving it in substance as large as originally. It is doubtful if the Kaiser's negotiations will real autotion will real autotion. tiations will gain anything from this ef-fort. Warns Away State Officials, Being Ready for Martyrdom.

MARSEILLES, March 13.—An exciting scene occurred today at the doors of the cathedral. The local authorities attempted to take an inventory under the church and state separation law, whereupon the bishop, wearing his mitre, surrounded by the congregation chanting, ordered the authorities not to enter the cathedral. The bishop read a declaration denouncing the law as renewing the evils which brought on the revolution and the reign of terror. The bishop added:

that I am prepared to suffer imprison-ment, exile or death in defending the rights of the church."

The authorities withdrew in order to avoid trouble. The cathedral will be closed day and night and guards who will keep regular watches have been organized to resist the govern-ment inspectors.

Shortly after our last annual meeting we left the Home which had sheltered us for many years and which has contributed largely to the history of the city philanthropies and entered the new and commodious bouse which for years has seemed a necessity.

In the main we have realized our anticipations of greater comfort, convenience and sanitary conditions. Already the extension of our work has faxed the capacity of the Home, especially in the tofant denortment. Unatinted attention has been given the inmates of the Home, both old and roung, by
the different physicians of our staff, to whom
we are greatly indebted. Busy with private
practice they still find time to promptly respond to the call of charity.

Forty-five children have been admitted during the year, which makes the number of
admissions 517 since the Home was incorporated under its present management.

Within the year there have been 12
deaths, five occurring in the month of Auquest from some steamers, eccentrally contagtguat from some sickness, ecentingly contagious and swift in fatal results. Generally epeaking, the health of the babies has been good. Three of the older ones have recently been transferred to the Children's

The greatest responsibility of life is the training of children. The most important duty that devolves upon the management of this institution is the choosing of homes for those who are given into our custody, and experience has taught us much in the selecting of the few among the many who apply to us for children. Not all people who have at heart the best interests of the child have wisdom and discretion in the training.

More and more as the years go by do we realize the necessity of the Baby Home; more and more do we see the need of united carnand more do we see the need of united, carn est and unselfish endeavor in its management; more and more do we know of the genuine sorrows borne by a class of humanity diffi-cult to reach and to help, but none the less descrying of encouragement; more and more do we know of the need of that charity that helps the unfortunate to help himself and to maintain self-respect. May those who contin-

ue in this work be given the necessary fore sight, judgment and wisdom that make for better conditions and better results in the broad field of philanthropy. PANIC AMONG PASSENGERS
