Most of the movement reflected the operation of well-defined parties to the speculation. The Beading movement naturally associated itself with the supposed strike outlook in the sa-thracite mining region. News of actual developments either in the anthracite or the bituminous mining dispute was vague and meager, but the rumors alleged a favorable prospect for a settlement. The copper and smelting stocks again moved upwards in common. The Hill stocks, accompanied by Northwestern, made another center of strength, and there was a movement in the Vanderbill group.

there was a movement in the Vanderbilt group in which New York Central fully shared. Atchison had the benefit of the extraordinary showing of net carnings for February, of which the rate of increase over the preceding Pebruary was no less than 132 per Current reports of gross earnings of raifroads, however, for the third week of the present month showed the unfortunate effect of the stormy weather.
