SHIPOFF TURNS RADICAL

Declares Latest Manifesto Leaves Parliament at Mercy of Czar.

ST. PETERSBURG, March 28.-Dmitri Shipoff, of Moscow, who is generally recognized as one of the most rational of the Liberal leaders, takes anything but an optimistic view of the future of the Empire. M. Shipoff took a middle position after the manifesto of October seceding at that time from the Radical constitutional wing of the Zemstvoists, on the ground that the people must be gradually prepared for self-government. He regarded the promises of the manifesto as sufficient for the present. Now, however, M. Shipoff believes that the

Government is showing bad faith. In the course of an interview today, he severely condemned the manifesto of March 6, saying that it did not make of the Council of Empire a second cham-ber of the National Parliament, but interposed between the monarch and the people the same old bureaucratic barrier, robbing the people's branch of the Parliament of rights which it is supposed to have and not realizing the prom responsible ministry, leaving the Parliament at the mercy of the government, through the sovereign's power of proregation. He predicted that the struggle between the government and the people, while having been long in unfolding, was far from being ended. He saw only strife ahead when the parliament meets. Only a Parliament elected on the basis of uni-versal suffrage, M. Shipoff declares, will

satisfy the people's land demands.

M. Shipoff bemoans the lack of moral conscientiousness and sense of responsi-bility to a high principle among the Russian people as a whole, but says that this is only the natural result of long oppression by the bureaucracy.

He says that it is already apparent

from the progress of the elections that the peasants are possessed of a single idea, the getting of land, and that to-gether with the small land-owning class they are combining against the big land-owners. In a large number of the provinces, M. Shipoff says, this combination will be able to elect members of the Parliament with their undeveloped polit-ical ideas. As a result, the Parliament will become a tower of Babel.

As transmitted, the order read that the troops would be re-turned after eight more months' service. This caused murmuring, and after the Houses were loo fire and the greater part of Vladivostok

About 700 or 800 were killed when resisting the Cossacks brought to Vladivostok to quell the rebellion. The funeral of the soldiers killed by machine guns at the commandant's house was attended by thousands of soldiers, sailors and civil-ians, carrying red flags and singing revolutionary songs, The coffins were covered with wreaths reading "To the Memory of the Martyrs and Shame of Their

ST. PETERSBURG, March 28 .- The Province of Koslroma, European Rus-sia, is the first to have completed its elections to the Provincial Congress. Forty-six pensants, 19 noblemen, 18 merchants, six professional men and three priests were returned. The pre-ponderance of peasants is significant, considering that they were only entitled to elect 29 delegates, while the andowners had 35, the cities 28 and

the workmen seven delegates. The results show that the small land owners, who in reality are only peasants of the more prosperous class, holding their property in severalty, stood together against the big landlords and chose exclusively peasants. The peasant electors are not class fled and have but one plank in their platform, namely, the distribution of land. The others are divided.
