He said there were 15 per cent more employed in the watch movement factories now than in 1880. But there are 600 per cent more women employed and 200 per cent more children. Rainey thought that for the perpetuity of the race this condition ought to be investigated. "You must have been a mindreader," replied Payne.

"There are no leaders on the majority side of this House," continued Rainey. "The real leaders of the Republican party, are the McCurdys. Consequently, with a population of 20,000,000 in 1800, we used industrially and for fuel and light 30,000,000 gallons; that is one gallon of alcohol per capits. Leaving out of consideration the great inventions which have come since 1800, other new uses and improved methods, the same proportion would bring our use of denaturised alcohol today up to 25,000,000 gallons annually. It will be far greater than that.

HE LAXATIVE OF KNOWN QUALITY There are two classes of remedies: those of known quality and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active princi-ples and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their own personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character. There are two classes of purchasers: those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy.

To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer
